~ ~ ~ About the Cover ~ ~ ~

"The American Farm" was taken by thirteen year old Carson Diersing from New Palestine, Indiana. Carson's picture appears on the top left of the front cover.

The photograph on the top right of the front cover was taken by seventeen year old Rowan Caylor. He is from Ossion, Indiana and his picture is titled "Dairy Queen".

"Good Night Corn", appearing on the bottom left of the front cover, was taken by Cameron Moore. Cameron is from Howe, Indiana and is eighteen years old.

Zachery Turner took the photograph appearing on the bottom right of the front cover. His picture is titled, "Ready, Set, Go!". Zachery is from Howe, Indiana and is fifteen years old.

The photograph on the back cover was taken by ten year old Alison Robinson from Middlebury, Indiana. Alison calls her picture "Windmill at Bonneyville Mills".

We extend a special thanks to the farmers, agri-businesses, extension officials and others who voluntarily provided basic data used to prepare the statistics presented in this publication and to the corps of enumerators who so faithfully collected much of our raw data.

We would also like to thank all of the 4-H photography members that submitted pictures for use in our publication. All of the photos were included on posters displayed at the 2010 Indiana State Fair.

This issue of the, "2010-2011 Indiana Agricultural Statistics" publication provides you the most accurate, reliable, and unbiased information about Indiana's agricultural industry. Indiana agriculture continues to be an important and growing segment of the State's economy, with Indiana ranked in the top ten nationally for cash farm receipts. Hoosier farmers should take pride in the fact that despite adverse weather conditions, rising production expenses and input prices, Indiana agriculture continues to thrive. For 2011, Indiana continues to rank near the top nationally in the production of corn, soybeans, popcorn, blueberries, peppermint, spearmint, processing tomatoes, fresh market melons, and vegetables for processing. Indiana livestock producers put our state's rank at the top nationally for hogs, chickens, eggs, and turkeys.

Indiana has a rich agricultural heritage and farming tradition. This publication satisfies the need for data that is used to provide facts to decision makers that determine the future of Indiana's agricultural industry. It serves as the primary source of data for evaluating and measuring change in Indiana agriculture. The purpose of this publication is to provide the public with data to help them gain an understanding of the current situation of Indiana's farming community and future opportunities. We strive to exceed this goal.

This is the 85th edition, which serves as Indiana's Farmer 'Yearbook' and is published by the cooperative efforts of Purdue University and USDA's National Agricultural Statistics Service. This Federal/University cooperative effort has existed since 1925 and continues to enhance the opportunity for agricultural research programs for State specific statistical projects in support of agricultural researchers and decision makers. Some of those projects include Agronomic Survey of Indiana Corn and Soybean Growers, Plant Disease and Fungicide Use Survey, and Timber Price Survey. Results of these special research efforts are published by the individual research programs. Results from these special surveys are not a part of this publication but please feel free to contact us for reference to those researchers for additional information.

The information in this annual summary is collected from farmers who are surveyed throughout the year. The cooperation and support of Indiana's farmers in showing that "Agriculture Counts", is greatly appreciated. The voluntary response and cooperation of Indiana farmers, agricultural business firms, USDA Farm Service Agency County Staff, Purdue University County Extension Staff, NASDA Enumerators, and others across the state make this Publication possible. The Indiana Field Office of USDA's National Agricultural Statistics Service pledges the confidentiality of individual reports. We take every action necessary to ensure this pledge is upheld.

We are again pleased to feature the photography talents of 21 individual 4-H members within Indiana's 2010-2011 Agricultural Statistics Annual Summary. These photographs, exhibited at the 2010 Indiana State Fair, provide a glimpse of Indiana's agriculture from future farmers' perspective. We are grateful to all of the 4-H members who submitted their photos for publication.

Thank you for the opportunity to serve the agricultural community, with your help, in providing timely, accurate, and unbiased data. Please let us know your comments and suggestions.

Sincerely,

FARM INCOME

CASH RECEIPTS

Indiana farmers received $9.59 billion in cash receipts from farm marketings in 2010, 7 percent above 2009. Cash receipts from crops were up 3 percent, and receipts for livestock were 21 percent above the previous year. Marketings of crops at $6.73 billion, accounted for 70.2 percent of the total cash receipts in 2010 while livestock receipts, at $2.86 billion, accounted for the remaining 29.8 percent. In the previous year crop receipts accounted for 73.5 percent and livestock 26.5 percent of total cash receipts.

Corn was the leading source of income for Indiana farmers in 2010 and amounted to $3.50 billion. Soybeans were second at $2.71 billion and meat animals were third with $1.30 billion. Poultry and Eggs remained as the fourth leading contributor with $938 million and Dairy follows with $590 million. These five commodity groups accounted for 94 percent of the 2010 cash receipts.

1/ Value of Agricultural sector production is the gross value of the commodities and services produced within a year. Net value-added is the sector's contribution to the National economy and is the sum of the income from production earned by all factors-of-production, regardless of ownership. Net farm income is the farm operators' share of income from the sector's production activities. The concept presented is consistent with that employed by the Organization for Economic Cooperation and Development.

2/ A positive value of inventory change represents current-year production not sold by December 31. A negative value is an offset to production from prior years included in current-year sales.

The above estimates of Growing Degree Days (GDD) Normals are derived from normal temperatures (1971-2000) at mid-month and the corresponding GDD. For example, a weekly average temperature of 60°F resulted in 84 GDD. The basic formula is: 1/2 (max T -50) + 1/2 (min T -50) = GDD for one day. The maximum temperature is not allowed to exceed 86 degrees F. Negative units are not accumulated.

CROP HIGHLIGHTS

ACREAGE: Indiana's five major field crops totaled nearly 12.0 million acres for harvest during 2010, down slightly from 2009. Corn acreage for harvest was up five percent from a year ago, while soybean acreage for harvest was down two percent. Winter wheat acreage harvested was down 49 percent from a year ago, but all hay harvested acreage was up 8 percent from the 2009 level. Oat acreage for harvest increased 14 percent from 2009. Other crops showing harvested acreage changes were tomatoes for fresh market, up 13 percent while tomatoes for processing decreased 2 percent. Sweet corn acreage for harvest increased 7 percent, while watermelon harvested acreage decreased 4 percent from 2009. In addition, snap beans for processing increased 25 percent, while cucumbers for processing decreased 20 percent from 2009. Furthermore, cantaloupes for fresh market increased 5 percent.

YIELDS: The 2010 growing season got off to a quick start during April and early May. Corn planting moved at a record pace and by May 2nd, 71 percent of the crop had already been planted. However, rain showers during the last 3 weeks of May slowed planting to a more average pace. Wet weather continued throughout June slowing soybean planting and making harvest of hay crops difficult. Winter wheat harvest moved at a good pace with minor rain delays. Wheat yields were average with some disease issues and low test weights reported. July brought warmer temperatures and adequate moisture to sustain the crops in most areas. However, by the second week of August, hot and dry conditions had begun to deplete topsoil moisture placing stress on the major field crops. Extremely dry conditions continued throughout the fall forcing the corn and soybean crops to mature very rapidly and pasture conditions to plummet. By October 10th, harvest of both corn and soybeans was moving at record setting paces with 80 percent of the corn harvested and 79 percent of the soybean crop harvested. The majority of counties in Indiana were under burn bans due to the drought and several combine fires were reported. Many farmers hesitated to plant winter wheat as there was insufficient soil moisture for germination to occur in many areas. Ninety-eight percent of both the corn and soybean crops had been harvested by the end of October.

The average yield for corn in 2010 was 157 bushels per acre, 14 bushels below the 2009 yield. Soybeans yielded 48.5 bushels per acre, just .5 bushel below 2009. The average yield for winter wheat, at 60 bushels per acre, was 7 bushels below the previous year's yield of 67 bushels per acre. The average oat yield of 66 bushels per acre was down 3 bushels from the previous year's yield of 69 bushels per acre. All hay yield at 2.83 tons per acre was up from the 2009 yield of 2.77 tons per acre. Popcorn averaged 4,700 pounds per acre, up 400 pounds from the 4,300 pounds per acre produced a year earlier.

PRODUCTION: Corn produced during 2010 totaled 898.0 million bushels, 4 percent below the 2009 level of 933.7 million bushels. Soybean production was 258.5 million bushels, 3 percent below the 266.6 million bushels produced a year earlier. Winter wheat production decreased 54 percent from a year earlier, to 13.8 million bushels. Popcorn production totaled 296.1 million pounds, 15 percent above the 2009 level. Oat production of 528 thousand bushels was 9 percent above the 483 thousand bushels produced in 2009. All hay production, at 1.89 million tons, increased 10 percent. Peppermint production increased 39 percent while spearmint production increased 63 percent from 2009. Apple production decreased 13 percent to 26.0 million pounds. Blueberry production totaled 3.6 million pounds, a 3 percent decrease from the previous year.

BIOTECHNOLOGY VARIETIES

The National Agricultural Statistics Service conducts the June Agricultural Survey in all States each year. Randomly selected farmers across Indiana are asked if they planted corn or soybean seeds that, through biotechnology, are resistant to herbicides, insects, or both. Conventionally bred herbicide resistant varieties were excluded. Insect resistant varieties include only those containing bacillus thuringiensis (Bt). Stacked gene varieties include those containing biotech traits for both herbicide and insect resistance.

LIVESTOCK HIGHLIGHTS

The total value of the four major species of livestock and poultry on Indiana farms January 1, 2011 (December 1, 2010 for swine and chickens) amounted to $1,247.9 million, up 11 percent from a year earlier.

HOG AND PIG numbers (December 1, 2010), at 3.65 million, were up 1 percent from a year earlier. The average value per head increased from $84.00 in 2009 to $110.00 in 2010. This raised the total inventory value to $401.5 million, 33 percent above a year ago. Indiana remained in fifth place in the nation for the number of hogs on hand December 1, 2019.

CATTLE inventory numbers, at 850,000, were down 2 percent from January 1, 2010 but value per head, at $920 was $50 above the previous year. Total cattle inventory value, at $782.0 million, increased 3 percent from the $756.9 million last year. Cows and heifers that have calved totaled 385,000 head, down 1 percent from a year earlier. Of this total, 213,000 were beef cows, down 4 percent; and 172,000 were milk cows, up 2 percent from the previous year.

Total **SHEEP** inventory, at 50,000 head for January 1, 2011, was down 4 percent, from a year earlier. Breeding sheep totaled 44,000 head. Average value per head at $227.00, was up $40.00 from 2010. Total inventory value at $11.4 million was 17 percent above the previous year.

Total **CHICKEN** inventory, excluding broilers, on December 1, 2010, at 30.6 million birds, was down 3 percent from last year. With this inventory, Indiana held on to third place in the nation for total chickens, excluding broilers, and remained in third position for hens and pullets of laying age (23.4 million). The total value of the chicken inventory was $52.1 million, down 8 percent from 2009. The value per bird decreased $0.10 from the previous year to $1.70.

1/ NASS will no longer estimate numbers from survey data for Cattle County estimates. The new approach for setting livestock county numbers, termed "raking', utilizes county level livestock information from the Census of Agriculture, administrative data and current year state-level Agricultural Statistics Board (ASB) inventory and production estimates. To provide the data user with a consistent data series, NASS has established county numbers using the raking approach for commodities beginning with data from the 2007 Census. For cattle, this new methodology was implemented with the 2008 numbers. These new data items are available in both Quick Stats 1.0 and Quick Stats 2.0 databases. Previously established estimates for these years have been removed from all versions of Quick Stats. District level estimates will no longer be published for Cattle. This is consistent with the Census of Agriculture. For more information about this new methodology, go to http://www.nass.usda.gov/Data_and_Statistics/County_Data_Files/Livestock_County_Estimates/index.asp 2/ Published in Other Counties.

1/ NASS will no longer estimate numbers from survey data for Cattle County estimates. The new approach for setting livestock county numbers, termed "raking', utilizes county level livestock information from the Census of Agriculture, administrative data and current year state-level Agricultural Statistics Board (ASB) inventory and production estimates. To provide the data user with a consistent data series, NASS has established county numbers using the raking approach for commodities beginning with data from the 2007 Census. For cattle, this new methodology was implemented with the 2008 numbers. These new data items are available in both Quick Stats 1.0 and Quick Stats 2.0 databases. Previously established estimates for these years have been removed from all versions of Quick Stats. District level estimates will no longer be published for Cattle. This is consistent with the Census of Agriculture. For more information about this new methodology, go to http://www.nass.usda.gov/Data_and_Statistics/County_Data_Files/Livestock_County_Estimates/index.asp 2/ Published in Other Counties.

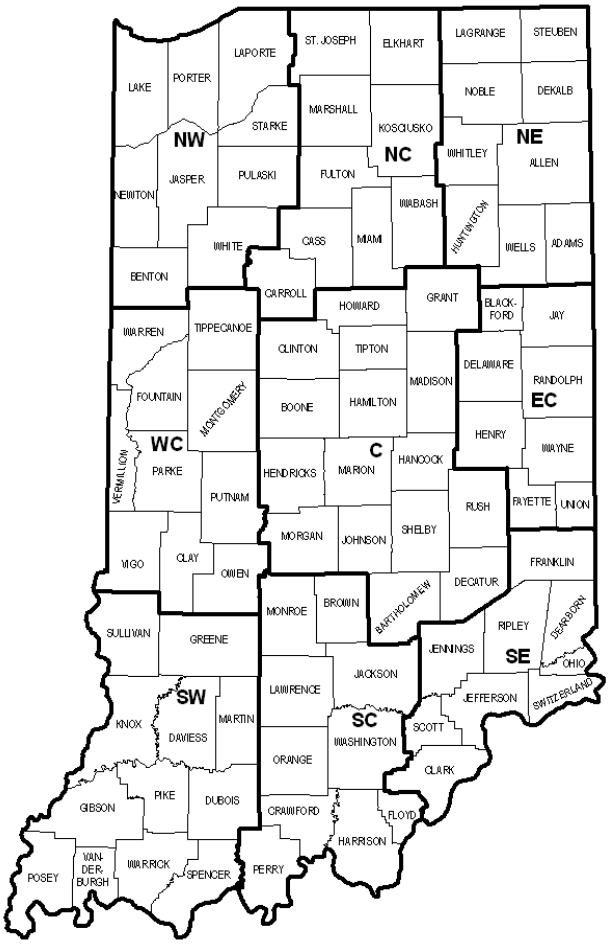
COUNTY HIGHLIGHTS



COUNTY HIGHLIGHTS

The following pages of county statistics represent the results of a survey of over 15,000 farm operators following the 2010 harvest season. In addition to these data are selected items of interest from the U.S. Population Census, 2007 Census of Agriculture, and 2009 Cash Receipts information from the Bureau of Economics Analysis. The County Highlights section summarizes the importance of agriculture to each and every Indiana county while comparing the magnitude of importance across counties.

Planted acreage for hay is represented by three dashes because this category is not estimated, planted acreage and yield for popcorn are represented by three dashes because these categories are not surveyed; in all other places the three dashes represent zero for that county. An asterisk signifies that the county has data for this item, but it cannot be disclosed for confidentiality purposes. The 2007 Chicken data from Census includes only layers twenty weeks old and older.

Below is a list of comparable items at the state level.

REPORTS AND DATA FROM USDA'S NATIONAL AGRICULTURAL STATISTICS SERVICE (NASS)

Internet:

Reports and data from NASS as well as the Indiana Field Office are available on the internet.

For access, choose from the following:

NASS

http://www.nass.usda.gov/

Today's reports will be listed on the screen. To select from other reports, click on the **More** button next to "Today's Reports from NASS". You will then be redirected to another screen to make your selections.

Indiana Field Office

http://www.nass.usda.gov/Statistics_by_State/Indiana/

Publications pertaining to data specific to Indiana can be accessed from our Home page listed above. For a list of available reports, click on **Indiana Publications**, or choose from the drop down menu below "Indiana Publications", and then click on the yellow **go** button.

Data for other States can be accessed by choosing the desired State under the **Statistics by State** button on the bottom left side of the screen.

Internet Published Estimates Database:

Historical County, State, and U.S. information is available on the Internet FREE OF CHARGE. The database uses custom extracts based on commodity, year, State, and other selection criteria to produces an output file compatible for updating databases and/or spreadsheets. The database can be accessed from the NASS Home page shown above, or any State Field Office Home page. Just click on the **Quick Stats** button and follow the instructions. Searches for U.S. and State, State and County, and the Census of Agriculture data can be queried from here.

NASS Subject Specialists:

NASS maintains a listing of subject and commodity specialists for the various program areas. From the NASS Home page, click on **Publications**, then select **Contact a Specialist** in the **I Want To....** box on the right hand side of the screen.

NASS Customer Service:

NASS operates an information center, staffed 7:30 a.m. to 4:00 p.m. ET Monday-Friday, to assist you with accessing reports and data via the Internet, or obtaining printed copies. Please call **1-800-727-9540**.

E-Mail Subscriptions:

NASS Reports: Subscriptions to NASS reports are offered free through our e-mail service. From the right side of the NASS Home page, select National under **Receive reports by E-mail**. First time users will be required to set up an account. Select **Register** and follow instructions to choose the National reports you would like to receive and they will be delivered as soon as they are published.

Indiana Field Office Reports: State specific reports are also available free via e-mail. From the right side of the NASS Home page, select State under the heading **Receive reports by E-mail**. Reports from all states are available with this selection. Scroll down to select the reports you want, enter your name and e-mail address, and then click on **Submit**. Or, on the right side of the Indiana Field Office Home page, select Subscribe to IN reports. This will give you only reports for Indiana. After entering your name and e-mail address, click on **Submit**. E-mail reports available through the Indiana Field Office include: All Reports, Agriculture Report, Crop-Weather, Crops and Livestock, Miscellaneous, Press Releases.

Printed Report Subscriptions:

Printed copies of **NASS** reports are available for a fee to subscribers. To subscribe for national reports, call toll-free **1-800-999-6779** and ask for a list of reports and prices.

The **Indiana Field Office** also offers subscriptions to the following printed reports by completing the form on the next page and mailing it to our office, or by calling **1-800-363-0469**.
