2017-2018

2017 CENSUS OF AGRICULTURE

YOUR VOICE. YOUR FUTURE. YOUR OPPORTUNITY.

It's a wrap! From everyone at USDA's National Agricultural Statistics Service:

A sincere and hearty

THANK YOU

for responding to the 2017 Census of Agriculture.

Look for results in February 2019.

~ ~ ~ About the Cover ~ ~ ~

"Catchin Some Zzzz's" was taken by fourteen year old Emma Stricker from Nabb, Indiana and appears on the front cover. Emma is a five year 4-H member and has taken the photography project for three years. She has always liked taking pictures and loves to take pictures of her animals.

The photograph on the back cover, "Sunset Cow", was taken by seventeen year old Hadley Martin from Marengo, Indiana. Hadley took this picture one evening while she was enjoying the sunset with her cows.

We extend a special thanks to the farmers, agri-businesses, extension officials and others who voluntarily provided basic data used to prepare the statistics presented in this publication and to the corps of enumerators who so faithfully collected much of our raw data.

We would also like to thank all of the 4-H photography members that submitted pictures for use in our publication. All of the photos were included on posters displayed at the 2017 Indiana State Fair.

Karen Plaut, Glenn W. Sample Dean of Agriculture

This information is very important, but just as important are the people. We take this opportunity to thank the following for helping provide this valuable resource to the farmers of Indiana.

In this 2017-2018 annual issue of the "Indiana Agricultural Statistics" publication you will find information about Indiana's entire agricultural industry. This is the 92th edition and is published by the cooperative efforts of Purdue University and USDA's National Agricultural Statistics Service. This year's edition will be the fourth edition that will be published and available from a free mobile app created by Purdue University. The app is available for Apple iPhone, iPad and iPod touch as well as Android users. It can be obtained through iTunes, Google Play and Amazon. Links to those sites where the app can be downloaded are in Purdue Extension's **The Education Store** or use the Quick Response Code (QRC) located on page 138 in this book.

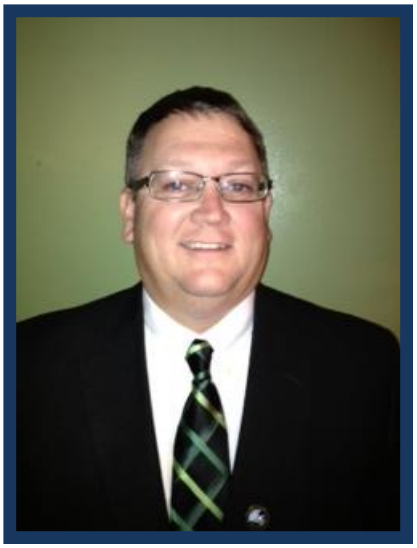
We are again pleased to feature the photography talents of 20 individual 4-H members within Indiana's 2017-2018 Agricultural Statistics Annual Summary. These photographs, exhibited at the 2017 Indiana State Fair, provide a glimpse of Indiana's agriculture from future farmers' perspective. We are grateful to all of the 4-H members who submitted their photos for publication.

This publication satisfies the growing need for accurate, reliable and unbiased information and data. As you look at the book realize that the **2017 Census of Agriculture** will be published February 21, 2019. We would especially like to thank all of the farmers who participated in completing the Census of Agriculture. The data in this publication is collected from Indiana Farmers, agricultural businesses, USDA Farm Service Agency County Staff, Purdue University County Extension Staff, NASDA Enumerators and others that make this Publication possible.

This data is used to provide facts to decision makers that determine the future of Indiana's agricultural industry. The goal for this publication remains unchanged. It is to provide the public with data to help them understand the current situation of Indiana's farming community and future opportunities. While we strive to exceed this goal the Indiana Field Office of USDA's National Agricultural Statistics Service assures that all individual reports and business data are held in the strictest confidence. We take every action possible to protect your data.

Indiana agriculture continues to be a growing segment of the State's economy, with Indiana ranked in the top ten nationally for farm receipts. Hoosier farmers should take pride in the fact that even with adverse weather conditions, rising production expenses and prices, Indiana agriculture continues to thrive. Indiana continues to rank near the top nationally in the production of corn, soybeans, popcorn, blueberries, peppermint, spearmint, processing tomatoes, fresh market melons, and vegetables for processing. Indiana livestock producers put our state's rank at the top for hogs, chickens, eggs, and turkeys.

This Federal/University cooperative effort has existed since 1925 and continues to enhance the opportunity for agricultural research programs for State specific statistical projects in support of agricultural researchers and decision makers. Some of those projects include Agronomic Survey of Indiana Corn and Soybean Growers, Plant Disease and Fungicide Use Survey, and Timber Price Survey. Results of these special research efforts are published by the individual research programs. Results from these special surveys are not a part of this publication but please feel free to contact us for reference to those researchers for additional information.



Thank you for the opportunity to serve the agricultural community, with your help, in providing timely, accurate, and unbiased data. Please let us know your comments and suggestions.

Sincerely,

Greg Matli
State Statistician

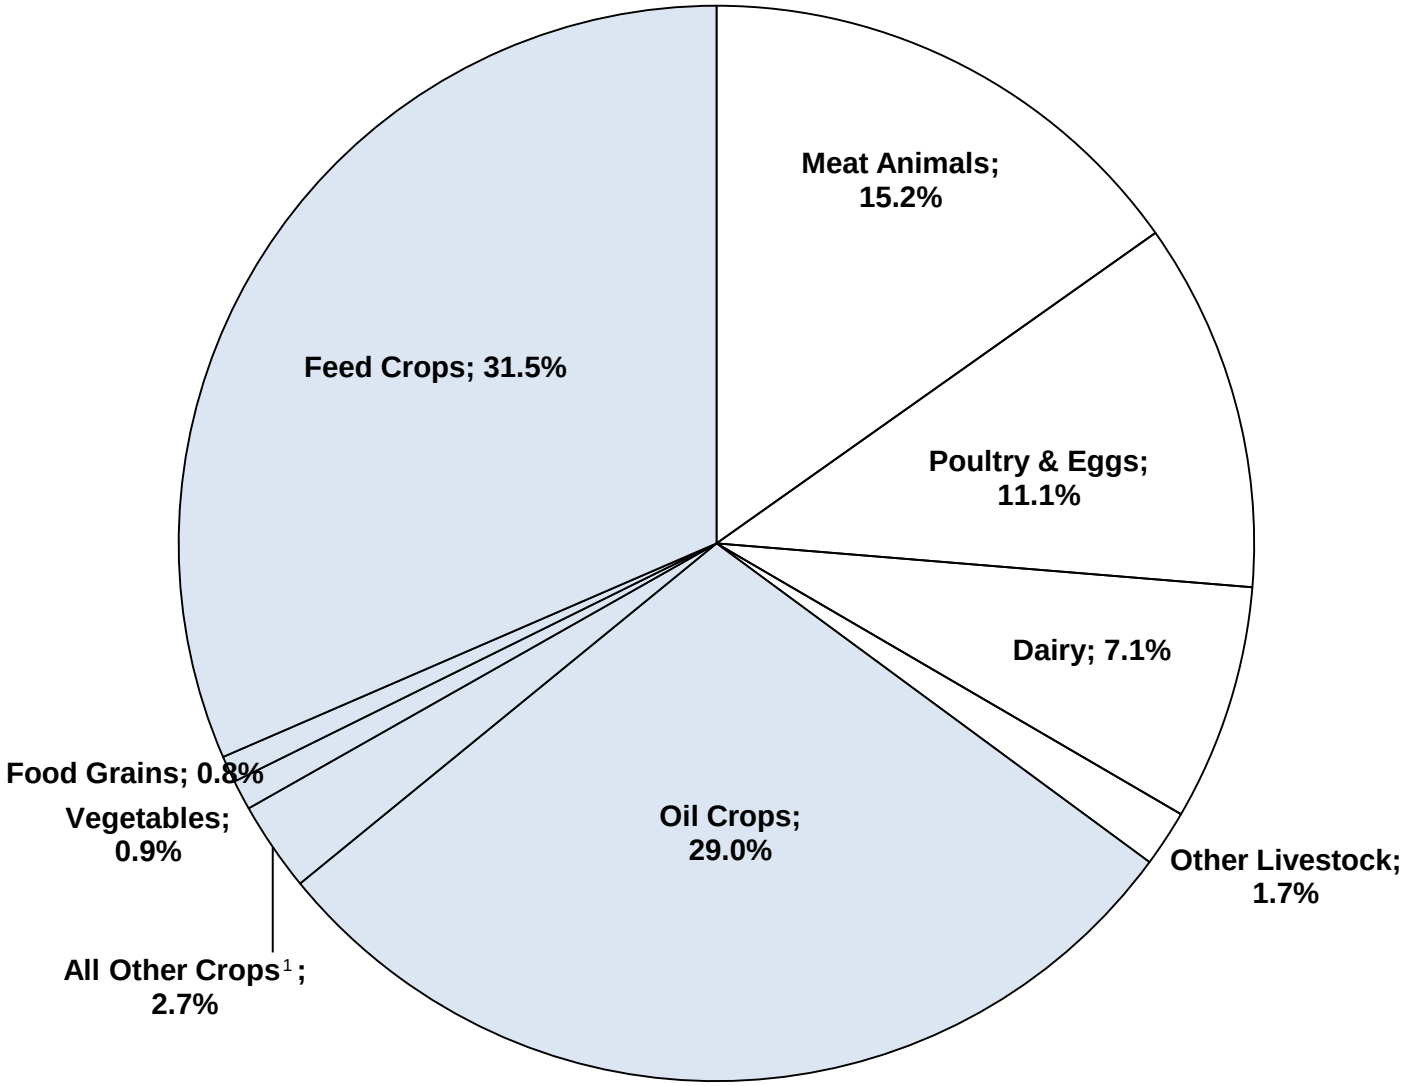
FARM INCOME

CASH RECEIPTS

Indiana farmers received $10.6 billion in cash receipts from farm marketing's in 2017, 6 percent above 2016. Cash receipts from crops were up 4 percent, and receipts for livestock were 10 percent above the previous year. Marketing's of crops at $6.91 billion, accounted for 64.9 percent of the total cash receipts in 2017 while livestock receipts, at $3.73 billion, accounted for the remaining 35.1 percent. In the previous year crop receipts accounted for 66.3 percent and livestock 33.7 percent of total cash receipts.

Corn was the leading source of income for Indiana farmers in 2017 and amounted to $3.28 billion. Soybeans were second at $3.08 billion and meat animals remained in third place with $1.62 billion. Poultry and eggs was the fourth leading contributor with $1.18 billion and Dairy follows with $750 million. These five commodity groups accounted for almost 93 percent of the 2017 cash receipts.

2017 Indiana Cash Receipts



[1] Includes fruits and nuts.

[1] Value of Agricultural sector production is the gross value of the commodities and services produced within a year. Net value-added is the sector's contribution to the National economy and is the sum of the income from production earned by all factors-of-production, regardless of ownership. Net farm income is the farm operators' share of income from the sector's production activities. The concept presented is consistent with that employed by the Organization for Economic Cooperation and Development.

[1] Value of Agricultural sector production is the gross value of the commodities and services produced within a year. Net value-added is the sector's contribution to the National economy and is the sum of the income from production earned by all factors-of-production, regardless of ownership. Net farm income is the farm operators' share of income from the sector's production activities. The concept presented is consistent with that employed by the Organization for Economic Cooperation and Development.

[2] Includes expenses associated with operator dwellings.

[3] Includes federal and private crop and livestock insurance premiums as well as casualty, hail, motor vehicle and all other insurance.

State	0	0	30	186	374	609	744	683	448	235	36	0	3,345

The above estimates of Growing Degree Days (GDD) Normals are derived from normal temperatures (1971-2000) at mid-month and the corresponding GDD. For example, a weekly average temperature of 60ºF resulted in 84 GDD. The basic formula is: 1/2 (max T -50) + 1/2 (min T -50) = GDD for one day. The maximum temperature is not allowed to exceed 86 degrees F. Negative units are not accumulated.

CROP HIGHLIGHTS

ACREAGE: Indiana's principal field crops totaled 12.7 million acres for harvest during 2017, up one percent from 2016. Soybean acreage in 2017 was up 300 thousand acres from the previous year; corn for grain was down 280 thousand acres. Soybean acreage was an all-time high. Hay acreages saw increases with alfalfa and other hay up 60,000 and 20,000 acres respectively.

YIELDS: The beginning of the 2017 season saw flooding rains and the 2nd warmest April on record for the State, preventing farmers from getting a timely start on spring fieldwork. Farmers received a much appreciated break at the end of April when the rain lessened and fields began to dry out. Unfortunately, this reprieve in weather was only temporary as increased precipitation and cold temperatures arrived in May. Heavy rain showers followed each round of planting leading to slower than normal emergence and germination. Many of the plants that made it out of the ground were submerged in water, which ultimately created more work for farmers as they replanted many acres during the spring. There were also a few days of freezing temperatures in May that kept growth behind schedule. June brought warm, sunny days that provided ideal conditions for the replanted fields.

Beginning with the first seeds sown in April through the final planting day in June, Indiana farmers had an average of 3.3 days per week that were suitable for fieldwork. Although farmers had fewer days available to work in the fields than last year, they were able to remain close to last year's planting pace. The first half of the planting season for both corn and soybeans began ahead of schedule, but repeated heavy rain showers in May slowed planting pace, putting it slightly behind the five-year average by the end of the month.

Winter wheat harvest progressed ahead of last year and the five-year average for most of the harvest period, which meant that double-cropped soybeans made it in the ground fairly quickly. Soybeans began to emerge quickly in mid-May, but growth tapered off due to cold temperatures and wet weather late in the month. Many soybean fields needed to be replanted due to poor emergence, and the replanted seedlings seemed to grow fairly well despite the weather.

By mid-June, 98% of corn was planted and 86% had emerged, on pace with 2016 but slightly behind the five-year average. Much of the crop would be replanted due to oversaturation. Towards the end of the June, corn fields began to show large variation in height, maturity and condition, with only 46% in good to excellent condition.
Warmer and sunnier conditions in late June and early July provided farmers with many opportunities to replant damaged crops. Average days suitable for fieldwork jumped to 4.9 days per week. The storms returned in July, leaving standing water in many fields, stunting crop development.

During the final days of June, corn and soybean progress were both slightly behind average, with corn only 8% silking and soybeans 14% blooming. Increased humidity at the end of the month kept farmers very busy applying late-season Nitrogen and spraying to protect corn fields from a variety of diseases. The excess moisture from the rain also left some soybeans yellowed. Soybean condition remained relatively steady at 51% good to excellent through the beginning of July.

As the season progressed, heavy rains with strong winds persisted, making the season challenging for farmers. Weed pressures increased and crop condition declined, largely due to decreased efficiency of sprays and Nitrogen loss from the numerous storms. By the end of July, both corn and soybeans were rated under 50% in good to excellent condition for the Central and Southern regions, and over 50% in Northern region. Corn and soybeans in Central Indiana were rated near 40% good to excellent, a result of saturating rains throughout the growing season.

The Indiana corn yield was 180 bushels per acre, while soybeans yielded 54 bushels per acre on average.

PRODUCTION: Indiana corn production in 2017 totaled 934 million bushels, 1 percent below 2016's total of 946 million bushels. Indiana's soybean production totaled 321 million bushels, down 1 percent from 2016's 324 million bushels. Indiana wheat production at 17.8 million bushels was down 21 percent mostly on fewer acres, though yield was also lower than the previous year. All hay production at, 1.64 million tons, was down 8 percent from the previous year.

BIOTECHNOLOGY VARIETIES

The National Agricultural Statistics Service conducts the June Agricultural Survey in all States each year. Randomly selected farmers across Indiana are asked if they planted corn or soybean seeds that, through biotechnology, are resistant to herbicides, insects, or both. Conventionally bred herbicide resistant varieties were excluded. Insect resistant varieties include only those containing bacillus thuringiensis (Bt). Stacked gene varieties include those containing biotech traits for both herbicide and insect resistance.

LIVESTOCK HIGHLIGHTS

HOG AND PIG numbers (December 1, 2017), at 4.0 million, were down 2 percent from a year earlier. The average value per head decreased from $95.00 in 2016 to $101.00 in 2017. This raised the total inventory value to $404 million, 4 percent above a year ago. Indiana remained in fifth place in the nation for the number of hogs on hand December 1, 2017.

CATTLE inventory numbers, at 870,000, were down 2 percent from January 1, 2017 while value per head, at $1,060 was $30 below the previous year. Total cattle inventory value, at $922 million, decreased 5 percent from the $970 million last year. Cows and heifers that have calved totaled 395,000 head, unchanged from a year earlier. Of this total, 208,000 were beef cows, down 2 percent; and 187,000 were milk cows, up 1 percent from the previous year.

Total **SHEEP** inventory, at 53,000 head for January 1, 2018, was up 2 percent from a year earlier. Breeding sheep totaled 46,000 head. Average value per head at $229.00, was up $6.00 from 2017. Total inventory value at $12.1 million was 5 percent above the previous year.

Total **CHICKEN** inventory, excluding broilers, on December 1, 2017, at 42.0 million birds, was slightly below last year. With this inventory, Indiana remained in second place in the nation for total chickens, excluding broilers, and for layers (32.8 million). The total value of the chicken inventory was $79.9 million, down 18 percent from 2016. The value per bird, at $1.90 was down $0.40 from the previous year.

[1] Prior to January 1, 1970, definition was milk cows and beef cows 2 years old and over.

HOGS AND PIGS

The total pig crop in 2017 was down 1 percent from the pig crop in 2016. Sows farrowed during the year was down 1 percent from the previous year, while litter rates decreased to 10.36. Hog and pig cash receipts totaled $1.23 billion, increasing 21 percent from the previous year. Gross income of $1.23 billion (cash receipts plus value of home consumption), also increased 21 percent from the previous year.

BEES, HONEY AND COLONIES

NUMBER OF COLONIES, MAXIMUM, LOST, PERCENT LOST, ADDED, RENOVATED, AND PERCENT RENOVATED, WITH FIVE OR MORE COLONIES BY QUARTER, INDIANA, 2016-2018

Quarter	Number of Colonies	Maximum Colonies [1]	Lost Colonies	Percent Lost [2]	Added Colonies	Renovated Colonies [3]	Percent Renovated [4]
	Number	Number	Number	Percent	Number	Number	Percent
2016							
January-March	6,500	6,500	770	12	30	---	---
April-June	4,300	7,000	220	3	2,700	900	13
July-September	9,500	9,500	600	6	450	550	6
October-December	7,500	7,500	1,200	16	20	---	---
2017							
January-March	7,000	7,500	1,900	25	1,700	70	1
April-June	7,500	11,000	1,200	11	3,000	510	5
July-September	13,000	13,000	930	7	420	740	6
October-December	11,500	11,500	1,700	15	320	100	1
2018							
January-March	7,000	8,000	1,000	13	300	30	---
April-June	8,000	9,000	1,800	20	4,000	730	8

--- Represents zero.
[1] Number of colonies plus all colonies moved into that state during the quarter.
[2] Percent lost is the number of lost colonies divided by maximum colonies.
[3] Defined as any surviving colony that was requeened or received new honey bees through nuc or package.
[4] Percent renovated is the number of renovated colonies divided by maximum colonies.

COLONY HEALTH STRESSORS WITH FIVE OR MORE COLONIES BY QUARTER, INDIANA, 2016-2018 [1]

Quarter	Varroa Mites	Other Pests and Parasites [2]	Diseases [3]	Pesticides	Other [4]	Unknown
			Percent			
2016						
January-March	17.4	3.7	.9	.3	7.2	5.5

[1] NASS will no longer estimate numbers from survey data for Cattle County estimates. The new approach for setting livestock county numbers, termed "raking', utilizes county level livestock information from the Census of Agriculture, administrative data and current year state-level Agricultural Statistics Board (ASB) inventory and production estimates. To provide the data user with a consistent data series, NASS has established county numbers using the raking approach for commodities beginning with data from the 2007 Census. For cattle, this new methodology was implemented with the 2008 numbers. These new data items are available in both Quick Stats 1.0 and Quick Stats 2.0 databases. Previously established estimates for these years have been removed from all versions of Quick Stats. District level estimates will no longer be published for Cattle. This is consistent with the Census of Agriculture. For more information about this new methodology, go to http://www.nass.usda.gov/Data_and_Statistics/County_Data_Files/Livestock_County_Estimates/index.asp

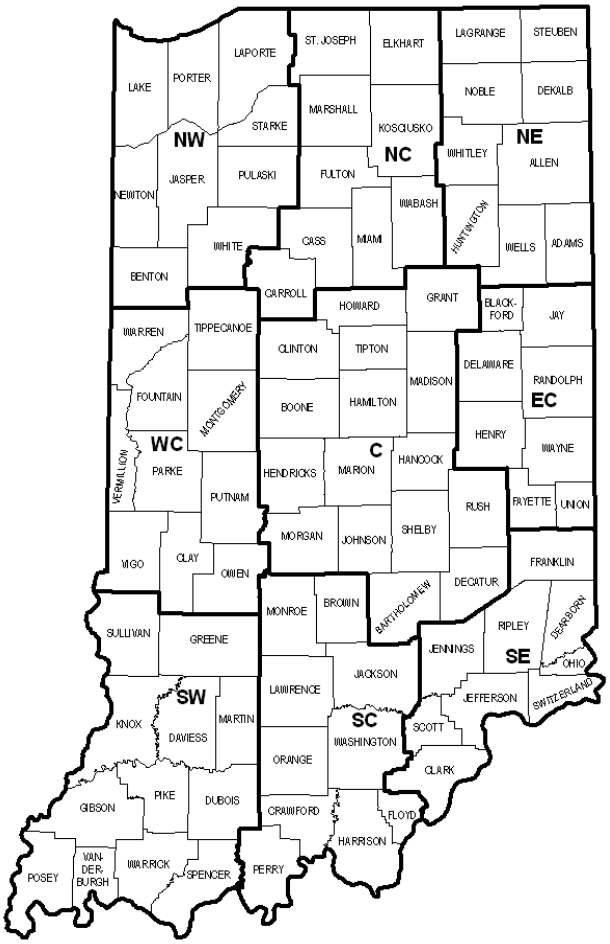
COUNTY HIGHLIGHTS



COUNTY HIGHLIGHTS

The following pages of county statistics represent the results of a survey of over 15,000 farm operators following the 2017 harvest season. In addition to these data are selected items of interest from the U.S. Population Census, 2012 Census of Agriculture, and 2016 Cash Receipts information from the Bureau of Economic Analysis. The County Highlights section summarizes the importance of agriculture to each and every Indiana County while comparing the magnitude of importance across counties.

Planted acreage for hay is represented by three dashes because this category is not estimated, planted acreage and yield for popcorn are represented by three dashes because these categories are not surveyed; in all other places the three dashes represent zero for that county. An asterisk signifies that the county has data for this item, but it cannot be disclosed for confidentiality purposes. The 2012 Chicken data from Census includes only layers twenty weeks old and older.

Below is a list of comparable items at the state level.

STATE DATA

2016 Census Population	6,619,680
2012 Total Land Area (acres)	22,928,756
2012 Number of Farms	58,695

CUSTOMER SERVICE

REPORTS AND DATA FROM USDA'S NATIONAL AGRICULTURAL STATISTICS SERVICE (NASS)

Internet:

Reports and data from NASS as well as the Indiana Field Office are available on the internet.

For access, choose from the following:

NASS

http://www.nass.usda.gov/

Today's reports will be listed on the screen. To select from other reports, click on the ***View previous reports*** link next to "Today's Reports". You will then be redirected to another screen to make your selections.

Indiana Field Office

http://www.nass.usda.gov/Statistics_by_State/Indiana/

Publications pertaining to data specific to Indiana can be accessed from our Home page listed above. There is a list of publications under **Indiana Publications**.

Data for other States can be accessed by choosing the desired State in the **Statistics by State** box on the right side of the screen.

NASS Subject Specialists:

NASS maintains a listing of subject and commodity specialists for the various program areas. From the NASS Home page, click on **Publications**, then select **Contact a Specialist** in the **I Want To....** box on the right hand side of the screen.

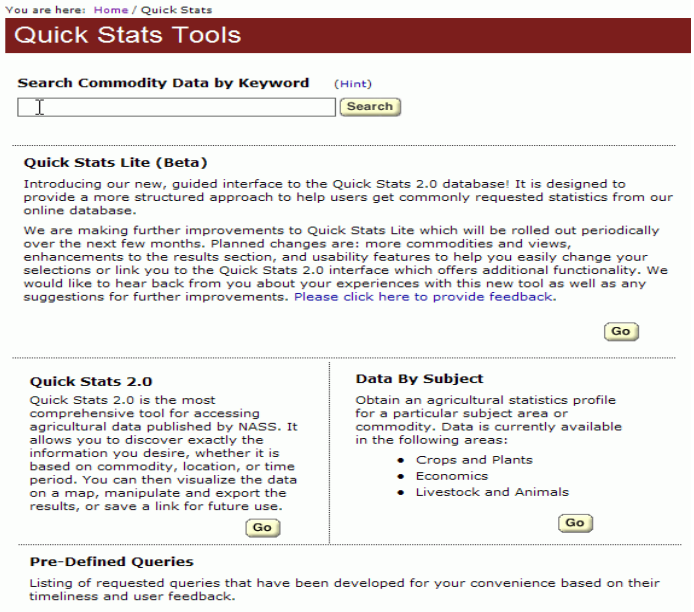
NASS Customer Service:

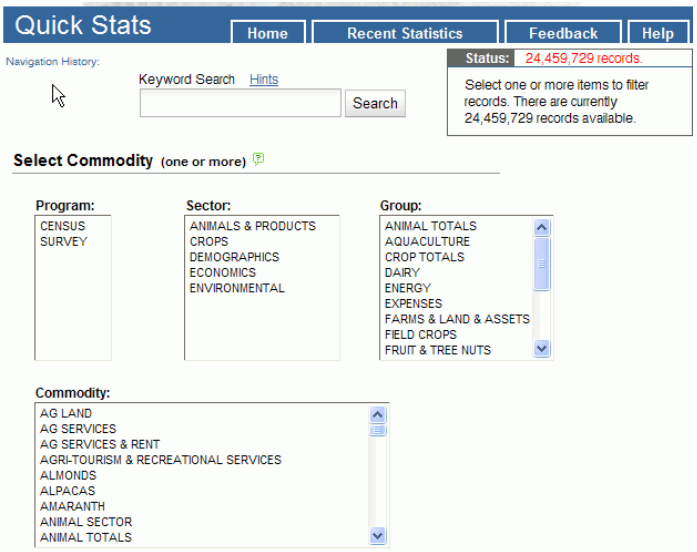
NASS operates an information center, staffed 7:30 a.m. to 4:00 p.m. ET Monday-Friday, to assist you with accessing reports and data via the Internet, or obtaining printed copies.

Please call **1-800-727-9540**.

Quick Stats Tools:

Historical County, State, and U.S. information is available on the Internet FREE OF CHARGE. The database uses custom extracts based on commodity, year, State, and other selection criteria to produces an output file compatible for updating databases and/or spreadsheets. The database can be accessed from the NASS Home page shown above, or any State Field Office Home page. Just click on the **Quick Stats** button and follow the instructions. Searches for U.S. and State, State and County, and the Census of Agriculture data can be queried from here.

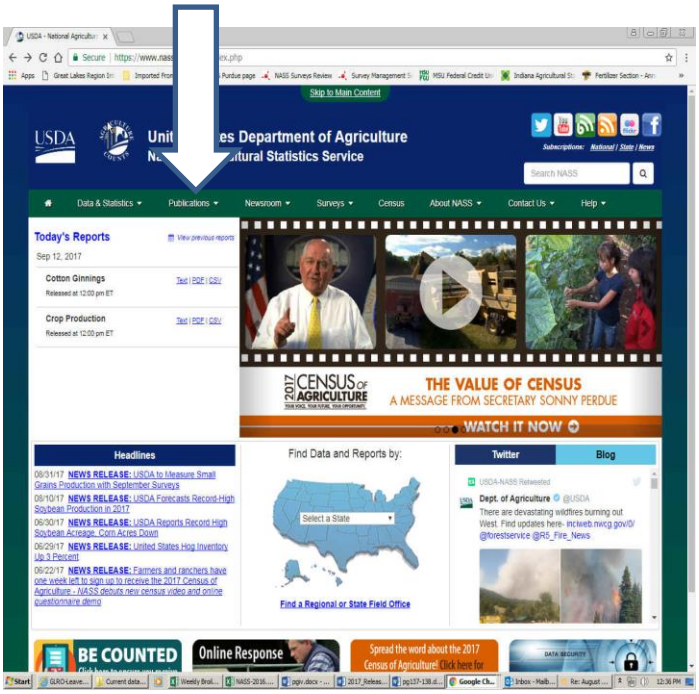




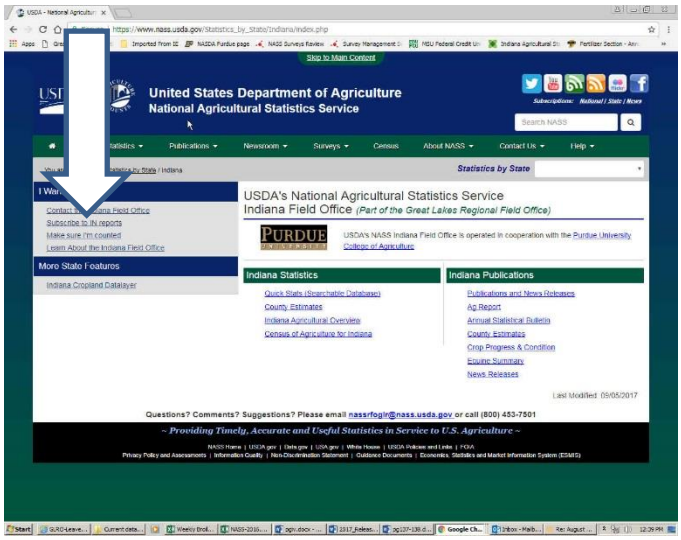
CUSTOMER SERVICE

E-Mail Subscriptions:

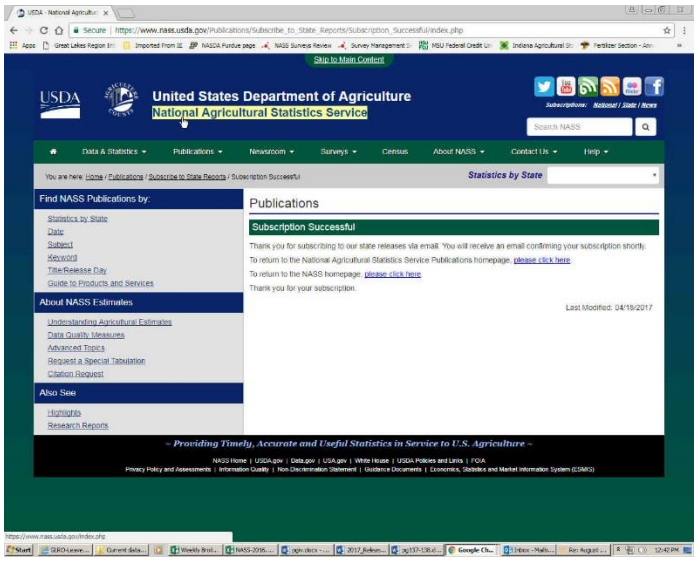
NASS Reports: Subscriptions to NASS reports are offered free through our e-mail service. Select the **Publications** drop down menu in the green bar of the NASS Home page. Select National Reports under **Receive reports by E-mail**. First time users will be required to set up an account. Select **Register** and follow instructions to choose the National reports you would like to receive and they will be delivered as soon as they are published.



Indiana Field Office Reports: State specific reports are also available free via e-mail. Under the **Publications** drop down menu of the NASS Home page, select State Reports under the heading **Receive reports by E-mail**. Reports from all states are available with this selection. Scroll down to select the reports you want, enter your name and e-mail address, and then click on **Subscribe**. Or, on the left side of the Indiana Field Office Home page, select Subscribe to IN reports. This will give you only reports for Indiana. After entering your name and e-mail address, click on **Subscribe**. E-mail reports available through the Indiana Field Office include: All Reports, Agriculture Report, Crop-Weather, Crops and Livestock, Miscellaneous, Press Releases.



Once you "Subscribe", you will receive a confirmation message in your email.



GET THE APP:

The Indiana Annual Bulletin is available in an electronic reader format.

Download the **FREE** App!

Compatible with Android and Apple Products.
Get it at iTunes, Google Play, and Amazon.
