~ ~ ~ About the Cover ~ ~ ~

"Busy Bee" was taken by nine year old Lacy Mae Schilmiller from Floyds Knobs, Indiana and appears on the front cover. Lacy is a first year 4-H member. She wanted to try the photography project and said "it was a lot of fun". She was able to capture the bee on her mom's Mexican Sunflower (Tithonia).

The photograph on the back cover, "Farm Sunrise", was taken by ten year old Ellie Powell from Tipton, Indiana. She is a first year member of 4-H. Ellie said that her mom woke her up to see the pretty sunrise and she wanted to capture it. She said her mom inspires her and she likes to capture the beauty around her.

We extend a special thanks to the farmers, agri-businesses, extension officials and others who voluntarily provided basic data used to prepare the statistics presented in this publication and to the corps of enumerators who so faithfully collected much of our raw data.

We would also like to thank all of the 4-H photography members that submitted pictures for use in our publication. All of the photos were included on posters displayed at the 2018 Indiana State Fair.

Karen Plaut, Glenn W. Sample Dean of Agriculture

This information is very important, but just as important are the people. We take this opportunity to thank the following for helping provide this valuable resource to the farmers of Indiana.

In this 2018-2019 annual issue of the "Indiana Agricultural Statistics" publication you will find information about Indiana's entire agricultural industry. This is the 93rd edition and is published by the cooperative efforts of Purdue University and USDA's National Agricultural Statistics Service. This year's edition will be the fifth edition that will be published and available from a free mobile app created by Purdue University. The app is available for Apple iPhone, iPad and iPod touch as well as Android users. It can be obtained through iTunes, Google Play and Amazon. Links to those sites where the app can be downloaded are in Purdue Extension's **The Education Store** or use the Quick Response Code (QRC) located on page 142 in this book.

We are again pleased to feature the photography talents of 17 individual 4-H members within Indiana's 2018-2019 Agricultural Statistics Annual Summary. These photographs, exhibited at the 2018 Indiana State Fair, provide a glimpse of Indiana's agriculture from future farmers' perspective. We are grateful to all of the 4-H members who submitted their photos for publication.

This publication satisfies the growing need for accurate, reliable and unbiased information and data. As you look at the book you will notice that we have included highlights of the **2017 Census of Agriculture**. These numbers are located in the Census Highlights section and also in County Highlights. We would especially like to thank all of the farmers who participated in completing the Census of Agriculture. The data in this publication is collected from Indiana Farmers, agricultural businesses, USDA Farm Service Agency County Staff, Purdue University County Extension Staff, NASDA Enumerators and others that make this Publication possible.

This data is used to provide facts to decision makers that determine the future of Indiana's agricultural industry. The goal for this publication remains unchanged. It is to provide the public with data to help them understand the current situation of Indiana's farming community and future opportunities. While we strive to exceed this goal the Indiana Field Office of USDA's National Agricultural Statistics Service assures that all individual reports and business data are held in the strictest confidence. We take every action possible to protect your data.

Indiana agriculture continues to be a growing segment of the State's economy, with Indiana ranked in the top ten nationally for farm receipts. Hoosier farmers should take pride in the fact that even with adverse weather conditions, rising production expenses and prices, Indiana agriculture continues to thrive. Indiana continues to rank near the top nationally in the production of corn, soybeans, popcorn, blueberries, peppermint, spearmint, processing tomatoes, fresh market melons, and vegetables for processing. Indiana livestock producers put our state's rank at the top for hogs, chickens, eggs, and turkeys.

This Federal/University cooperative effort has existed since 1925 and continues to enhance the opportunity for agricultural research programs for State specific statistical projects in support of agricultural researchers and decision makers. Some of those projects include Agronomic Survey of Indiana Corn and Soybean Growers, Plant Disease and Fungicide Use Survey, and Timber Price Survey. Results of these special research efforts are published by the individual research programs. Results from these special surveys are not a part of this publication but please feel free to contact us for reference to those researchers for additional information.

Thank you for the opportunity to serve the agricultural community, with your help, in providing timely, accurate, and unbiased data. Please let us know your comments and suggestions.

Sincerely,

Greg Matli
State Statistician

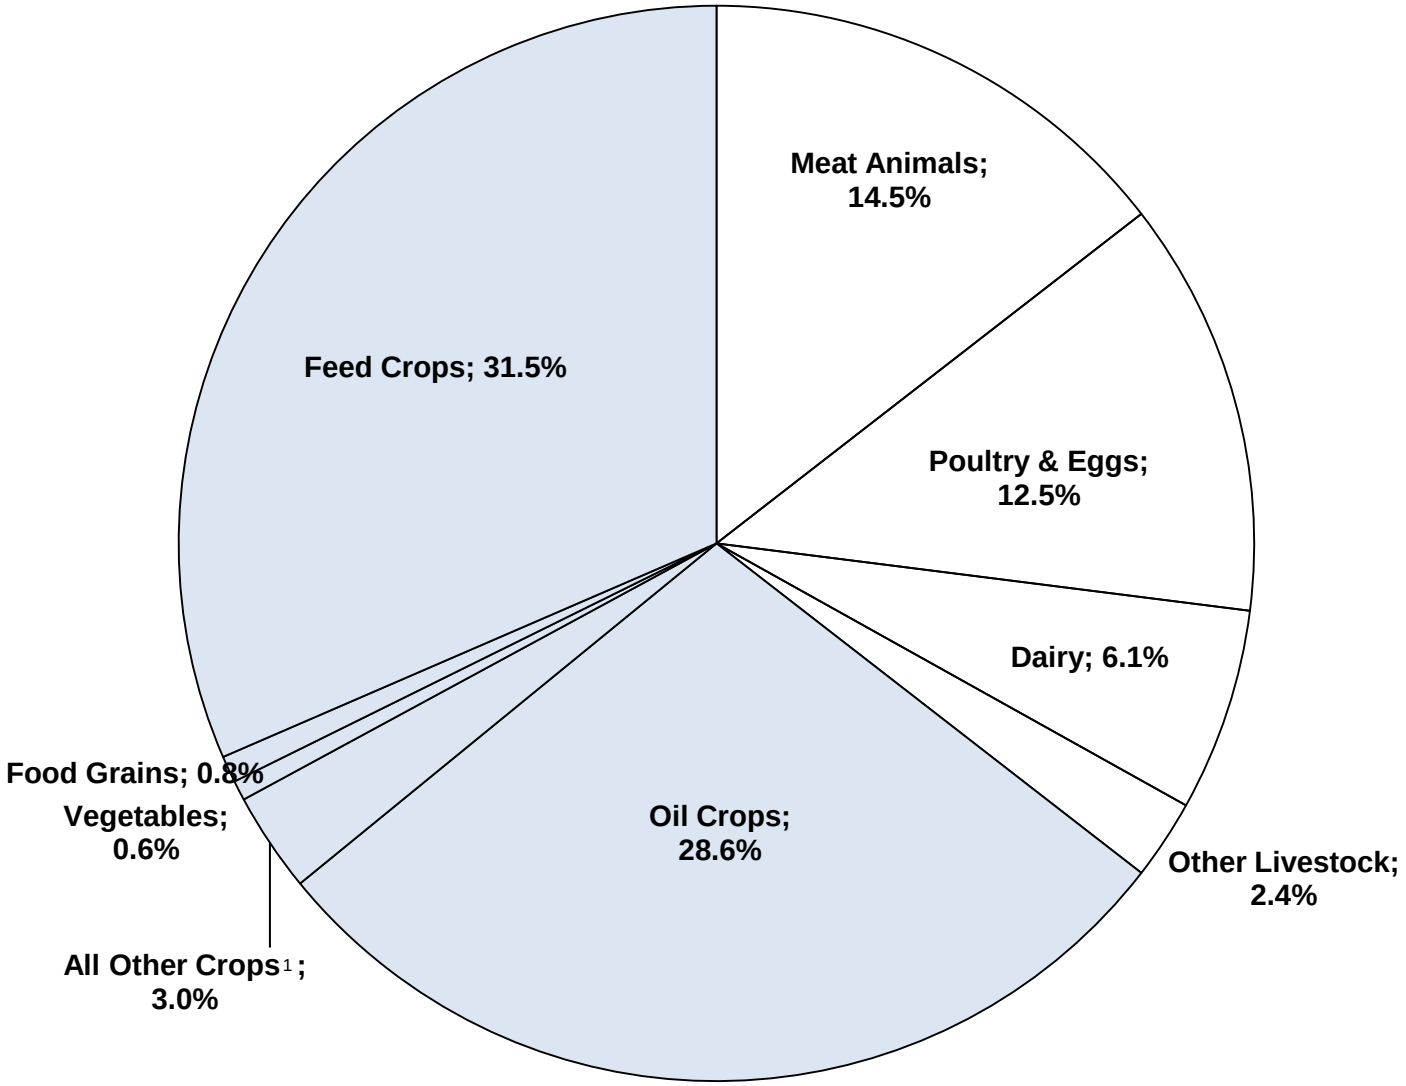
FARM INCOME

CASH RECEIPTS

Indiana farmers received $10.7 billion in cash receipts from farm marketing's in 2018, up fractionally from 2017. Cash receipts from crops were up 1 percent, and receipts for livestock were 1 percent below the previous year. Marketing's of crops at $6.91 billion, accounted for 64.6 percent of the total cash receipts in 2018 while livestock receipts, at $3.80 billion, accounted for the remaining 35.4 percent. In the previous year crop receipts accounted for 64.2 percent and livestock 35.8 percent of total cash receipts.

Corn was the leading source of income for Indiana farmers in 2018 and amounted to $3.32 billion. Soybeans were second at $3.06 billion and meat animals remained in third place with $1.55 billion. Poultry and eggs was the fourth leading contributor with $1.34 billion and Dairy follows with $649 million. These five commodity groups accounted for almost 93 percent of the 2018 cash receipts.

2018 Indiana Cash Receipts



[1] Includes fruits and nuts.

[1] Value of Agricultural sector production is the gross value of the commodities and services produced within a year. Net value-added is the sector's contribution to the National economy and is the sum of the income from production earned by all factors-of-production, regardless of ownership. Net farm income is the farm operators' share of income from the sector's production activities. The concept presented is consistent with that employed by the Organization for Economic Cooperation and Development.

Net Farm Income	2,843,860	1,251,729	1,503,097	1,714,171	**2,136,815**

[1] Value of Agricultural sector production is the gross value of the commodities and services produced within a year. Net value-added is the sector's contribution to the National economy and is the sum of the income from production earned by all factors-of-production, regardless of ownership. Net farm income is the farm operators' share of income from the sector's production activities. The concept presented is consistent with that employed by the Organization for Economic Cooperation and Development.

[2] Includes expenses associated with operator dwellings.

[3] Includes federal and private crop and livestock insurance premiums as well as casualty, hail, motor vehicle and all other insurance.

State	0	0	30	186	374	609	744	683	448	235	36	0	3,345

The above estimates of Growing Degree Days (GDD) Normals are derived from normal temperatures (1971-2000) at mid-month and the corresponding GDD. For example, a weekly average temperature of 60ºF resulted in 84 GDD. The basic formula is: 1/2 (max T -50) + 1/2 (min T -50) = GDD for one day. The maximum temperature is not allowed to exceed 86 degrees F. Negative units are not accumulated.

CROP HIGHLIGHTS

ACREAGE: Indiana's principal field crops totaled 12.1 million acres for harvest during 2018, unchanged from 2017. Soybean acreage at 5.95 million and corn acreage at 5.35 million were both unchanged from 2017.

YIELDS: The 2018 spring planting season started off cold, wet, and snowy in some areas, keeping planters out of the fields for most of April. Average statewide temperatures were recorded at 6.1 degrees below normal for the month, and farmers saw an average of only 2.35 days suitable for fieldwork per week. Flooding events in early April kept soil moisture high, even as the weather started to cooperate towards the end of the month. By the end of April, planting progress for corn and soybeans was well behind that of the previous year and the 5-year average.

Ideal weather conditions in May kicked planting into high gear. Consistently above average temperatures and below average rainfall gave farmers a weekly average of 5.4 days suitable for fieldwork, allowing significant planting progress to be made as previously saturated fields dried out. The month of May saw crop progress go from being well behind schedule to far ahead of the previous year and 5-year average in terms of corn and soybeans planted and emerged. By the first week of June, planting was wrapping up and winter wheat harvest was beginning.

Erratic weather in June resulted in the replanting of some soybean fields, either due to dry conditions thwarting emergence or flood damage from localized storm events depending on the area. In general, the high temperatures and above average rainfall benefitted the corn and soybean crops, as progress continued to stay ahead of the 5-year average.

June saw fewer days suitable for fieldwork than May, averaging 4.3 days per week. With planting wrapped up for the most part, farmers kept busy with winter wheat harvest, planting double-cropped soybeans, and applying herbicide to corn and soybean fields. By the end of June, corn and soybeans were rated 76% and 71% in good to excellent condition, respectively, with crop emergence, corn silking, and soybeans blooming all either on pace or ahead of schedule.

Irrigation rigs that had sat largely unused through June got put to work come July. At the start of the month, topsoil and subsoil moisture levels sat right at 90% adequate to surplus. However, the first two weeks of July only saw an average of 0.73 inches of precipitation, 39% of normal, throughout the State. Signs of drought stress were reported in fields across the State by mid-July, with topsoil and subsoil moisture levels reported at 43% and 35% short to very short, respectively, for the week ending July 15. Relief came late in the third week of July, with rain and storm systems moving through most areas allowing soil moisture to replenish slightly.

The final days of July brought cool temperatures and very little rain, which caused soil moisture to fall back to the mid-July levels. The residual moisture and cooler temperatures helped corn and soybeans weather the dry week well. Both corn and soybeans were progressing ahead of schedule and were reported at 69% and 67% in good to excellent condition, respectively.

As the season progressed, the Indiana corn and soybean crop continued to benefit from good weather. At the beginning of September, corn and soybeans were both rated 72% good to excellent condition.

Very good harvesting weather finished out the season. The Indiana corn yield was 189 bushels per acre which was a record high. Soybeans yielded 58.5 bushels per acre on average which was also a record high.

PRODUCTION: Indiana corn production in 2018 totaled 983 million bushels, 5 percent above 2017's total of 936 million bushels. Indiana's soybean production totaled 346 million bushels, up 8 percent from 2017's 321 million bushels. Indiana wheat production at 18.5 million bushels was up 4 percent. All hay production at, 1.38 million tons, was down 7 percent from the previous year.

BIOTECHNOLOGY VARIETIES

The National Agricultural Statistics Service conducts the June Agricultural Survey in all States each year. Randomly selected farmers across Indiana are asked if they planted corn or soybean seeds that, through biotechnology, are resistant to herbicides, insects, or both. Conventionally bred herbicide resistant varieties were excluded. Insect resistant varieties include only those containing bacillus thuringiensis (Bt). Stacked gene varieties include those containing biotech traits for both herbicide and insect resistance.

LIVESTOCK HIGHLIGHTS

HOG AND PIG numbers (December 1, 2018), at 4.2 million, were up 5 percent from a year earlier. The average value per head decreased from $101.00 in 2017 to $97.00 in 2018. This raised the total inventory value to $407.4 million, 1 percent above a year ago. Indiana remained in fifth place in the nation for the number of hogs on hand December 1, 2018.

CATTLE inventory numbers, at 880,000, were up 2 percent from January 1, 2018 while value per head, at $910 was $160 below the previous year. Total cattle inventory value, at $801 million, decreased 13 percent from the $920 million last year. Cows and heifers that have calved totaled 390,000 head, down 1 percent from a year earlier. Of this total, 209,000 were beef cows, up fractionally; and 181,000 were milk cows, down 3 percent from the previous year.

Total **SHEEP** inventory, at 60,000 head for January 1, 2019, was up 5 percent from a year earlier. Breeding sheep totaled 52,000 head. Average value per head at $235.00, was up $6.00 from 2018. Total inventory value at $14.1 million was 8 percent above the previous year.

Total **CHICKEN** inventory, excluding broilers, on December 1, 2018, at 44.4 million birds, was up 2 percent from the previous year. With this inventory, Indiana remained in second place in the nation for total chickens, excluding broilers, and for layers (34.6 million). The total value of the chicken inventory was $102.1 million, up 24 percent from 2017. The value per bird, at $2.30 was up $0.40 from the previous year.

[1] Prior to January 1, 1970, definition was milk cows and beef cows 2 years old and over.

HOGS AND PIGS

The total pig crop in 2018 was down 9 percent from the pig crop in 2017. Sows farrowed during the year was down 10 percent from the previous year, while litter rates increased to 10.47. Hog and pig cash receipts totaled $1.20 billion, decreasing 3 percent from the previous year. Gross income of $1.20 billion (cash receipts plus value of home consumption), also decreased 3 percent from the previous year.

2019							
January-March	6,000	6,000	710	12	440	280	5

--- Represents zero.
[1] This report has been discontinued.
[2] Number of colonies plus all colonies moved into that state during the quarter.
[3] Percent lost is the number of lost colonies divided by maximum colonies.
[4] Defined as any surviving colony that was requeened or received new honey bees through nuc or package.
[5] Percent renovated is the number of renovated colonies divided by maximum colonies.

COLONY HEALTH STRESSORS WITH FIVE OR MORE COLONIES BY QUARTER, INDIANA, 2017-2019 [1]

Quarter	Varroa Mites	Other Pests and Parasites [2]	Diseases [3]	Pesticides	Other [4]	Unknown
			Percent			
2017						
January-March	15.8	8.0	5.2	4.1	10.4	7.1

[1] NASS will no longer estimate numbers from survey data for Cattle County estimates. The new approach for setting livestock county numbers, termed "raking', utilizes county level livestock information from the Census of Agriculture, administrative data and current year state-level Agricultural Statistics Board (ASB) inventory and production estimates. To provide the data user with a consistent data series, NASS has established county numbers using the raking approach for commodities beginning with data from the 2007 Census. For cattle, this new methodology was implemented with the 2008 numbers. These new data items are available in both Quick Stats 1.0 and Quick Stats 2.0 databases. Previously established estimates for these years have been removed from all versions of Quick Stats. District level estimates will no longer be published for Cattle. This is consistent with the Census of Agriculture. For more information about this new methodology, go to http://www.nass.usda.gov/Data_and_Statistics/County_Data_Files/Livestock_County_Estimates/index.asp

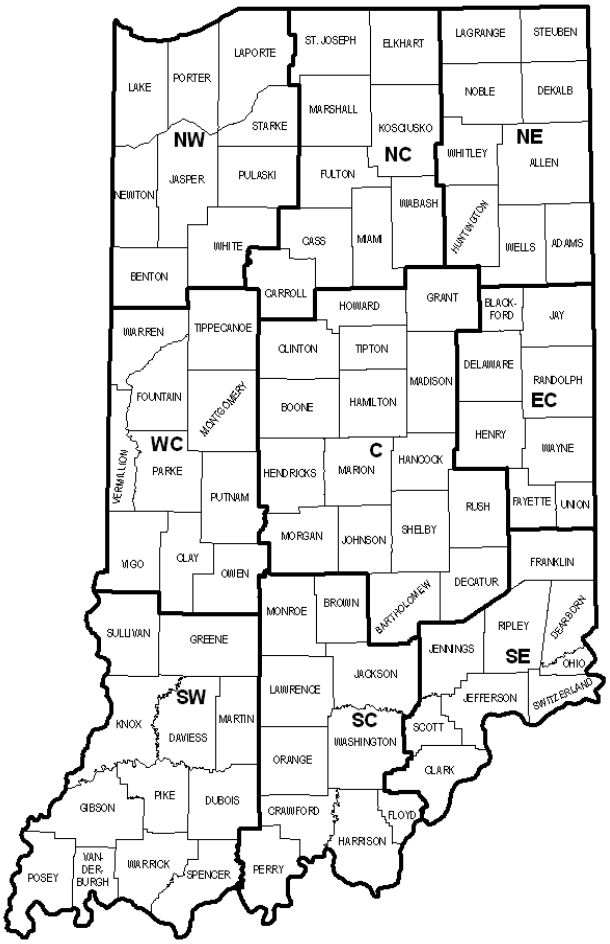
COUNTY HIGHLIGHTS



COUNTY HIGHLIGHTS

The following pages of county statistics represent the results of a survey of over 15,000 farm operators following the 2018 harvest season. In addition to these data are selected items of interest from the U.S. Population Census, 2017 Census of Agriculture, and 2017 Cash Receipts information from the Bureau of Economic Analysis. The County Highlights section summarizes the importance of agriculture to each and every Indiana County while comparing the magnitude of importance across counties.

Planted acreage for hay is represented by three dashes because this category is not estimated, planted acreage and yield for popcorn are represented by three dashes because these categories are not surveyed; in all other places the three dashes represent zero for that county. An asterisk signifies that the county has data for this item, but it cannot be disclosed for confidentiality purposes. The 2017 Chicken data from Census includes only layers twenty weeks old and older.

Below is a list of comparable items at the state level.

STATE DATA

2017 Census Population	6,666,818
2017 Total Land Area (acres)	22,928,355
2017 Number of Farms	56,649

CUSTOMER SERVICE

REPORTS AND DATA FROM USDA'S NATIONAL AGRICULTURAL STATISTICS SERVICE (NASS)

Internet:

Reports and data from NASS as well as the Indiana Field Office are available on the internet.

For access, choose from the following:

NASS

http://www.nass.usda.gov/

Today's reports will be listed on the screen. To select from other reports, click on the ***View previous reports*** link next to "Today's Reports". You will then be redirected to another screen to make your selections.

Indiana Field Office

http://www.nass.usda.gov/Statistics_by_State/Indiana/

Publications pertaining to data specific to Indiana can be accessed from our Home page listed above. There is a list of publications under **Indiana Publications**.

Data for other States can be accessed by choosing the desired State in the **Statistics by State** box on the right side of the screen.

NASS Subject Specialists:

NASS maintains a listing of subject and commodity specialists for the various program areas. From the NASS Home page, click on **Publications**, then select **Contact a Specialist** in the **I Want To....** box on the right hand side of the screen.

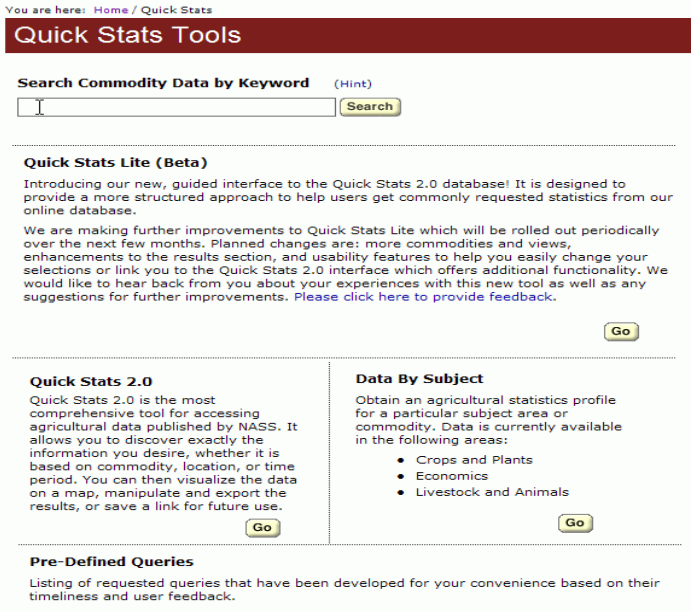
NASS Customer Service:

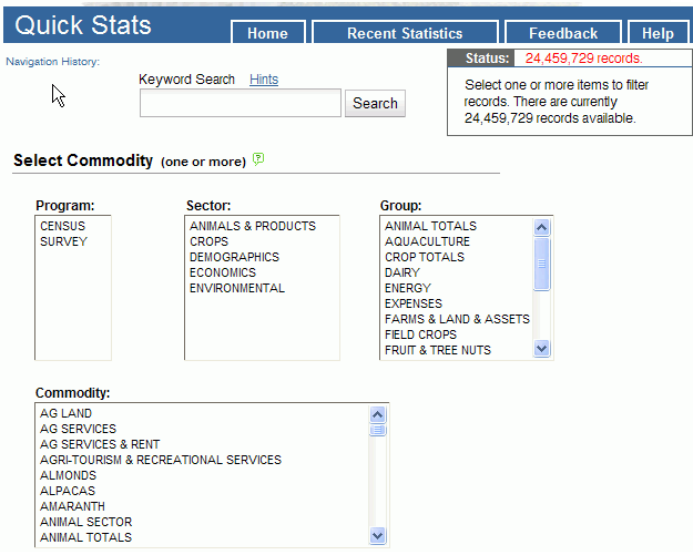
NASS operates an information center, staffed 7:30 a.m. to 4:00 p.m. ET Monday-Friday, to assist you with accessing reports and data via the Internet, or obtaining printed copies.

Please call **1-800-727-9540**.

Quick Stats Tools:

Historical County, State, and U.S. information is available on the Internet FREE OF CHARGE. The database uses custom extracts based on commodity, year, State, and other selection criteria to produces an output file compatible for updating databases and/or spreadsheets. The database can be accessed from the NASS Home page shown above, or any State Field Office Home page. Just click on the **Quick Stats** button and follow the instructions. Searches for U.S. and State, State and County, and the Census of Agriculture data can be queried from here.

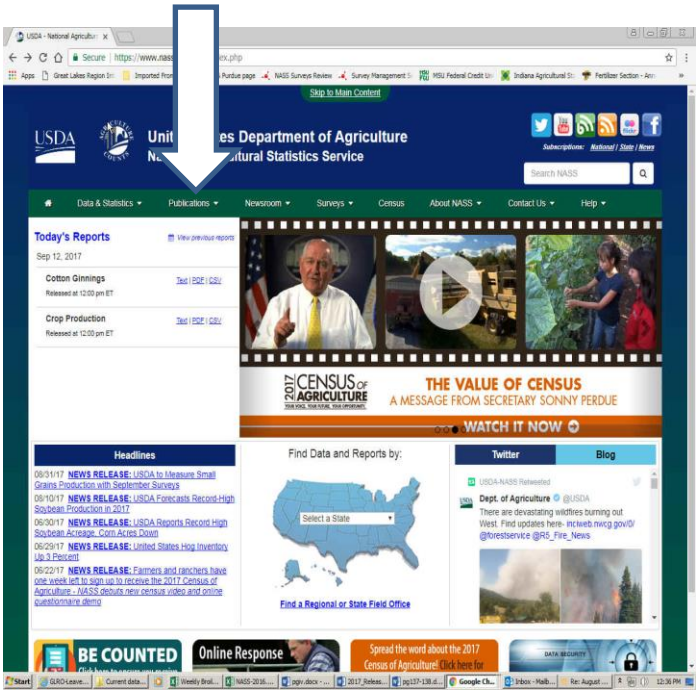




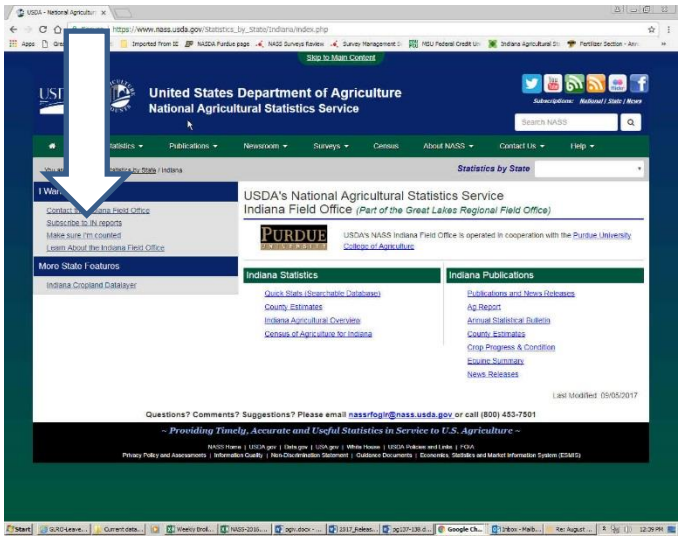
CUSTOMER SERVICE

E-Mail Subscriptions:

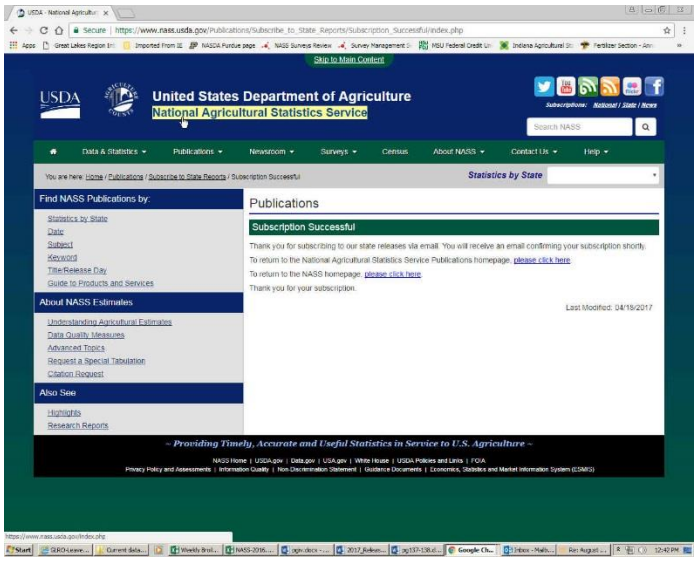
NASS Reports: Subscriptions to NASS reports are offered free through our e-mail service. Select the **Publications** drop down menu in the green bar of the NASS Home page. Select National Reports under **Receive reports by E-mail**. First time users will be required to set up an account. Select **Register** and follow instructions to choose the National reports you would like to receive and they will be delivered as soon as they are published.



Indiana Field Office Reports: State specific reports are also available free via e-mail. Under the **Publications** drop down menu of the NASS Home page, select State Reports under the heading **Receive reports by E-mail**. Reports from all states are available with this selection. Scroll down to select the reports you want, enter your name and e-mail address, and then click on **Subscribe**. Or, on the left side of the Indiana Field Office Home page, select Subscribe to IN reports. This will give you only reports for Indiana. After entering your name and e-mail address, click on **Subscribe**. E-mail reports available through the Indiana Field Office include: All Reports, Agriculture Report, Crop-Weather, Crops and Livestock, Miscellaneous, Press Releases.



Once you "Subscribe", you will receive a confirmation message in your email.



GET THE APP:

The Indiana Annual Bulletin is available in an electronic reader format.

Download the **FREE** App!

Compatible with Android and Apple Products.
Get it at iTunes, Google Play, and Amazon.
