USDA requests producer input to support transparent reporting of 2026 crops, inventories, and values

(Washington, D.C., May 13, 2026) – Over the next several weeks, USDA's National Agricultural Statistics Service (NASS) will conduct the [June Agricultural Survey](#) by contacting over 90,000 producers across the nation to determine crop acreage and stock levels as of June 1, 2026.

"The June Agricultural Survey is one of the most significant and recognized surveys NASS conducts," said Joseph L. Parsons, NASS administrator. "When producers take part, they help ensure that the nation's agricultural reporting remains accurate, transparent, and free from speculation. Their responses directly support decisions made by farmers, ranchers, researchers, private industry, and policymakers who depend on trustworthy data." Producers can respond to the June Agricultural Survey online at agcounts.usda.gov, by phone, or mail. They will be asked to provide information on planted and harvested acreage, including acreage for biotech crops and grain stocks.

"We recognize that this is a busy time for farmers, but the information they provide helps U.S. agriculture remain viable and capable. I urge them to respond to these surveys and thank them for their participation," said Parsons.

NASS will publish the data in a series of USDA reports, including the annual Acreage and quarterly Grain Stocks reports on June 30, 2026. These data also contribute to NASS's monthly and annual Crop Production reports, the annual Small Grains Summary, annual Farms and Land in Farms and Land Values reports, various livestock reports, including Cattle, Sheep and Goats, and Hogs and Pigs, and USDA's monthly World Agricultural Supply and Demand Estimates.

The Acreage, Grain Stocks, and all other NASS reports are available online at nass.usda.gov.

Mark your calendar for June 30 at 1:30 p.m. EDT to join #NASS Agricultural Statistics Board Chair Lance Honig for a live #StatChat to discuss the reports [@usda_nass](#).
