Hawaii Region 20, HUC 200100 through 200900.....	183

APPENDIX

Methodology, Hydrologic Unit Code Changes, and Terms and Definitions.....	A-1
---	-----

Introduction

PURPOSE AND SCOPE

The 2022 Census of Agriculture Watershed publication provides data that supplement the 2022 Census of Agriculture, Volume 1. This report is the fourth time that NASS has summarized and published Census of Agriculture data by watersheds. As a service to agricultural and environmental data users, the 2022 data for selected individual land characteristics are published at the 6-digit Hydrologic Unit Code (HUC) level. For comparison, data from the 2017 Census of Agriculture are also published in this report at the 6-digit HUC level if comparable data were available. According to the United States Geological Survey (USGS), the U.S. is divided into 20 regions (2-digit Hydrologic Unit Code level). Eighteen of the regions occupy the land area of the conterminous United States, Alaska constitutes region 19, and the Hawaiian Islands are region 20. These regions are subdivided into over 200 subregions (4-digit Hydrologic Unit Code level) based on water flow patterns from the major rivers within the region. The subregions are further divided into basins (6-digit Hydrologic Unit Code level). For the purposes of this report, the basins will be referred to as watersheds.

LEGAL AUTHORITY

The 2022 Census of Agriculture is required by law under the “Census of Agriculture Act of 1997,” Public Law 105-113 (Title 7, United States Code, Section 2204g). The law directs the Secretary of Agriculture to conduct a census of agriculture in every fifth year.

FARM DEFINITION

The census definition of a farm is any place from which \$1,000 or more of agricultural products were produced and sold, or normally would have been sold, during the census year. The definition has changed nine times since it was established in 1850. The current definition was first used for the 1974 Census of Agriculture and has been used in each subsequent agriculture census. This definition is consistent with the definition used for current USDA surveys.

DATA COMPARABILITY

Most data are comparable between the 2022 and 2017 censuses. A few changes were made to the 2022 census that effect comparability for some data items. HUC6 watersheds with significant changes between the 2022 and 2017 censuses are designated with “(see text)” in the table and specific details regarding the changes are defined in the appendix. Some watershed boundaries were changed due to enhanced technology that more precisely defined the boundaries. See 2022 Census of Agriculture, Volume 1, Geographic Area Series, Part 51, Appendix B https://www.nass.usda.gov/Publications/AgCensus/2022/Full_Report/Volume_1,_Chapter_1_US/usappxb.pdf for a detailed discussion of these changes.

REFERENCE PERIOD

Reference periods for the 2022 Census of Agriculture were similar to those used in the 2017 Census of Agriculture. Livestock and chicken inventories were measured as of December 31 of the census year.

WATER RESOURCES MAPS

The maps used throughout this report were provided by USGS. The data for each region are preceded by two maps, one of which shows the region in relation to the U.S., and the other which shows the region broken into each of its watersheds (6-digit HUC).

TABLES AND APPENDIX

Table 1. This table provides selected 2022 and 2017 data for the same data items for each region. For comparison purposes, each region’s data table displays the U.S. level data totals, followed by the region totals, and then the individual watershed totals.

Appendix. Provides information about the statistical methodology used to assign each farm operation to a specific watershed. In addition, changes to HUC6 definitions and boundaries since 2017 are discussed. It also includes definitions of specific terms and phrases used in this publication.

RESPONDENT CONFIDENTIALITY

In keeping with the provisions of Title 7 of the United States Code, no data are published that would disclose information about the operations of an individual farm or ranch. All tabulated data are subject to an extensive disclosure review prior to publication. Any tabulated item that identifies data reported by a respondent or allows a respondent's data to be accurately estimated or derived, was suppressed, and coded with a 'D'. However, the number of farms reporting an item is not considered confidential information and is provided even though other information is withheld.

SPECIAL STUDIES, SUBJECT SERIES REPORTS, AND CUSTOM TABULATIONS

Reports such as American Indians Reservations, 2023 Irrigation and Water Management Survey, and the 2023 Census of Aquaculture are part of the census program and provide supplemental information to the 2022 Census of Agriculture in the respective subject area. Results are published on the Internet.

Custom-designed tabulations may be developed when data are not published elsewhere. These tabulations are developed to individual user specifications on a cost-reimbursable basis and shared with the public. Quick Stats, NASS's online database that allows data users to build

customized queries, should be investigated before requesting a custom tabulation.

All special tabulations are subject to a thorough disclosure review prior to release to prevent the disclosure of any individual respondent data. Instructions to request a special tabulation can be found on the NASS website [USDA - National Agricultural Statistics Service - Data and Statistics - Special Tabulations](https://www.nass.usda.gov/Data_and_Statistics/Special_Tabulations), including information about timing, fees, and the submission form. Questions can be directed to SM.NASS.Data.Lab@usda.gov.

ABBREVIATIONS AND SYMBOLS

The following abbreviations and symbols are used throughout the tables:

- Represents zero.
- (D) Withheld to avoid disclosing data for individual farms.
- (NA) Not available.
- (X) Not applicable.
- (Z) Less than half the unit shown.

Table 1. Summary by Hydrologic Unit Code: 2022 and 2017 (continued)

[For meaning of abbreviations and symbols, see introductory text.]

Item	H101301		H101302		H101303	
	2022	2017	2022	2017	2022	2017
FARMS AND LAND IN FARMS						
Farmsnumber	4,358	4,951	3,310	3,420	1,556	1,579
Land in farmsacres	8,264,112	8,378,722	6,193,004	5,696,627	6,614,889	6,176,539
LAND USE AND PRACTICES						
Total croplandfarms	3,647	4,153	2,855	2,893	1,250	1,215
Harvested croplandacres	4,408,081	4,592,337	3,236,083	3,108,952	1,534,448	1,478,162
Other pasture and grazing land that could have been used for crops without additional improvementfarms	2,950	3,422	2,369	2,285	1,113	969
Cropland idle or used for cover crops or soil-improvement but not harvested and not pastured or grazedacres	3,738,791	3,731,550	2,737,975	2,386,460	1,168,159	940,566
Cropland on which all crops failed or were abandonedfarms	326	390	274	263	97	147
Cropland in summer fallowacres	130,400	160,950	170,950	128,377	124,102	99,964
Woodland pasturedfarms	1,481	1,468	974	1,008	356	332
Woodland not pasturedacres	378,444	357,270	220,369	263,630	152,125	119,222
Permanent pasture and rangeland, other than cropland and woodland pasturedfarms	326	569	264	594	126	421
Land in farmsteads, homes, buildings, livestock facilities, ponds, roads, wasteland, etc.acres	112,702	270,036	85,726	269,291	66,092	287,619
Irrigated landfarms	237	295	125	232	62	110
Harvested croplandacres	47,744	72,531	21,063	61,194	23,970	30,791
Pastureland and other landfarms	279	306	131	156	64	67
Cropland on which no-till practices were usedacres	27,057	22,227	14,615	10,439	4,372	3,573
Cropland on which conservation or reduced tillage, excluding no till, practices were used (see text)farms	84	97	57	58	22	15
Commercial fertilizer, lime, and soil conditioners usedacres treated	15,342	12,770	12,236	6,811	3,582	1,610
Manure usedfarms	216	226	81	109	42	53
Organic fertilizer usedacres treated	11,715	9,457	2,379	3,628	790	1,963
Acres treated to control - Insectsfarms	2,638	3,066	2,183	2,340	1,226	1,287
Weeds, grass, or brushacres	3,578,771	3,500,904	2,816,089	2,410,771	4,997,767	4,629,225
Nematodesfarms	2,348	2,687	1,804	1,908	780	896
Diseases in crops and orchardsacres	250,203	263,254	126,217	166,517	78,302	65,579
Chemicals used to control growth, thin fruit, ripen, or defoliateacres on which used	202	175	79	81	20	51
Corn, allfarms	78,521	75,714	9,598	10,041	3,620	8,092
Soybeans, for beansacres	202	175	79	79	20	45
Small grains (wheat, oats, barley, rye)farms	76,497	75,197	9,580	(D)	3,620	7,137
Cotton, allacres	11	7	3	-	-	13
Ricefarms	2,024	517	18	(D)	-	955
Land in vegetablesacres	1,590	1,642	984	1,376,879	576,638	387
Land in orchardsfarms	2,555,270	2,414,082	1,548,178	1,376,879	576,638	560,699
Nursery, greenhouse, floriculture, and sodacres	561	648	510	494	146	117
All other crops (other than those listed above)acres	516,644	623,784	555,956	586,655	104,251	101,198
FERTILIZERS AND CHEMICALS						
Commercial fertilizer, lime, and soil conditioners usedfarms	1,947	2,275	1,514	1,426	505	471
Manure usedacres treated	2,377,902	2,452,805	1,875,402	1,768,723	633,835	506,262
Organic fertilizer usedfarms	628	824	555	575	169	174
Acres treated to control - Insectsacres treated	63,205	94,441	85,269	33,356	17,770	13,876
Weeds, grass, or brushfarms	29	24	12	11	11	17
Nematodesacres treated	11,803	4,433	2,749	366	27,368	(D)
Diseases in crops and orchardsfarms	479	530	415	317	144	151
Chemicals used to control growth, thin fruit, ripen, or defoliateacres on which used	410,074	503,455	350,508	299,591	151,051	152,704
Corn, allacres	2,129	2,249	1,620	1,519	551	509
Soybeans, for beansacres	2,953,090	3,497,494	1,908,574	2,129,233	649,401	796,318
Small grains (wheat, oats, barley, rye)farms	81	53	35	6	15	1
Cotton, allacres	54,836	37,712	32,946	802	18,324	(D)
Ricefarms	288	317	219	183	70	41
Land in vegetablesacres	232,280	242,927	299,405	237,766	99,437	88,882
Land in orchardsfarms	84	60	54	68	31	10
Nursery, greenhouse, floriculture, and sodacres on which used	38,986	29,721	26,457	57,727	23,195	11,129
SELECTED CROPS						
Corn, allfarms	1,297	1,315	666	558	243	207
Soybeans, for beansacres	852,408	705,689	267,442	247,133	144,611	129,894

Table 1. Summary by Hydrologic Unit Code: 2022 and 2017 (continued)

[For meaning of abbreviations and symbols, see introductory text.]

Item	H180102		H180200		H180201	
	2022	2017	2022	2017	2022	2017
FARMS AND LAND IN FARMS						
Farmsnumber	1,651	2,019	629	760	12,401	14,454
Land in farmsacres	1,216,990	1,260,192	790,413	909,381	3,956,840	4,196,688
LAND USE AND PRACTICES						
Total croplandfarms	1,026	1,207	430	496	8,650	10,019
Harvested croplandacres	333,751	305,822	165,638	161,700	1,685,465	1,794,129
Other pasture and grazing land that could have been used for crops without additional improvementfarms	792	1,020	339	429	7,468	9,154
Cropland idle or used for cover crops or soil-improvement but not harvested and not pastured or grazedacres	234,108	222,976	111,711	122,278	1,242,597	1,491,558
Cropland on which all crops failed or were abandonedfarms	130	148	62	57	508	579
Cropland in summer fallowacres	28,496	31,241	25,455	16,675	67,056	63,894
Total woodlandfarms	222	226	94	90	1,448	1,485
Woodland pasturedacres	39,737	30,939	21,010	9,082	149,953	113,325
Woodland not pasturedfarms	201	79	50	57	674	446
Permanent pasture and rangeland, other than cropland and woodland pasturedacres	16,691	8,883	2,845	5,099	65,767	28,973
Land in farmsteads, homes, buildings, livestock facilities, ponds, roads, wasteland, etc.farms	142	123	53	62	932	769
Irrigated landacres	14,719	11,783	4,617	8,566	160,092	96,379
Harvested croplandfarms	409	483	161	205	1,540	1,738
Pastureland and other landacres	152,675	197,476	78,174	84,576	285,743	401,456
Cropland on which no-till practices were usedfarms	241	270	88	106	842	900
Cropland on which conservation or reduced tillage, excluding no till, practices were used (see text)acres	107,094	139,580	29,081	26,068	205,369	242,375
Fertilizers and chemicals usedfarms	239	296	97	118	848	1,008
Commercial fertilizer, lime, and soil conditioners usedacres	45,581	57,896	49,093	58,508	80,374	159,081
Manure usedfarms	957	1,269	409	464	4,295	5,041
Organic fertilizer usedacres	638,460	669,744	496,595	605,287	1,758,374	1,765,737
Acres treated to control - Insectsfarms	907	1,166	392	456	6,633	7,862
Weeds, grass, or brushacres	92,104	87,150	50,006	57,818	227,258	235,366
Nematodesfarms	932	1,336	386	493	8,485	10,639
Diseases in crops and orchardsacres	253,171	297,289	131,244	163,285	1,288,964	1,495,850
Chemicals used to control growth, thin fruit, ripen, or defoliatefarms	715	916	315	394	7,129	8,743
Acres on which usedacres	198,468	191,812	98,266	110,233	1,164,156	1,369,740
Commercial fertilizer, lime, and soil conditioners usedfarms	378	742	177	190	2,060	2,453
Manure usedacres	54,703	105,477	32,978	53,052	124,808	126,110
Organic fertilizer usedfarms	167	121	57	53	1,101	837
Acres treated to control - Insectsacres	9,818	15,576	1,916	2,605	56,247	54,714
Weeds, grass, or brushfarms	166	102	38	27	640	528
Nematodesacres	22,810	17,077	4,847	5,867	146,801	129,739
Diseases in crops and orchardsfarms						
Chemicals used to control growth, thin fruit, ripen, or defoliateacres						
FERTILIZERS AND CHEMICALS						
Commercial fertilizer, lime, and soil conditioners usedfarms	432	538	195	255	4,671	6,011
Manure usedacres treated	167,162	134,222	64,978	69,175	1,193,043	1,296,912

Appendix

Methodology, Hydrologic Unit Code Changes, and Terms and Definitions

HYDROLOGIC UNIT CODE ASSIGNMENT METHODOLOGY

The Watershed tabulations of 2022 Census of Agriculture data are based on operation location. Census respondents were asked to declare their principal county of operation as the county with the greatest share of their total value of production. Additionally, the respondent's mail ZIP Code was known; however, this ZIP Code did not necessarily correspond to the actual location of the farm or ranch. Watershed assignments were based on map boundary files produced by the National Agricultural Statistics Service (NASS), as well as other files produced outside of NASS. The National Watershed Boundary Dataset (WBD) was from the U.S. Geological Survey. County boundary files were provided by the U.S. Census Bureau. ZIP Code boundary files for 2022 were obtained from Environmental Systems Research Institute, Inc.'s (ESRI) data and maps. In addition, digitized agricultural/non-agricultural land boundaries were produced by NASS.

There were 58.4 percent of records deterministically assigned to a 6-digit HUC because geocoding software was available that enabled NASS to geocode those operations' locations to the appropriate 6-digit HUC. (I.e., NASS was able to calculate geographic coordinates for those operations based on address, and spatially determine in which 6-digit HUC each operation's coordinates were located.) Another 1.1 percent of records were deterministically assigned to a 6-digit HUC because the principal county reported fell entirely within a single 6-digit HUC. Another 19.4 percent of all records were assigned deterministically to a 6-digit HUC because the ZIP Code fell entirely within a single 6-digit HUC that also is located within its given county. An additional 2.9 percent of all records were deterministically assigned to a 6-digit HUC due to a mixture of reported principal county and ZIP codes that fell entirely within a single 6-digit HUC. For these 2.9 percent of records, at least one element of the 2-digit HUC, 4-digit HUC, and 6-digit HUC were deterministically assigned using the reported principal county, and at least one element was deterministically assigned using the ZIP code. The remaining 18.2 percent of census farm and ranch records were assigned probabilistically following a statistical model. These

records involved farm operations where either the county or the ZIP Code intersected multiple 6-digit HUCs. For these cases, two models for probabilistically assigning a 6-digit HUC were developed.

The first model used the principal county in carrying out the 6-digit HUC assignment. The probabilities of assignment to each 6-digit HUC within the principal county were equal to the proportion of the county's agricultural land contained in the 6-digit HUC, as calculated by NASS. The second model used the mail ZIP code in carrying out the 6-digit HUC assignment. Probabilities of assignment to each 6-digit HUC within the ZIP code were equal to the proportion of that ZIP Code's agricultural land contained in the 6-digit HUC, as calculated by NASS. Only HUC watersheds that also are within the principal county's boundaries were considered for ZIP assignment. The algorithm then compared the results of the county and ZIP assignment methodologies and selected whichever methodology was closer to 100 percent.

This dual-methodology assignment algorithm was repeated for each level of the 2, 4, and 6-digit HUC assignment. Note that a mixture of methodologies could be used for different levels of assignment. For example, the county methodology could be used at the HUC2 and 4 levels, while the ZIP methodology could be used for the HUC6 level. At each subsequent level of assignment, only HUC watersheds falling within the selected prior watershed were considered. For example, if a given county straddles both HUC4 level watersheds 0313 and 0314, and the probabilistic assignment assigns HUC4 watershed 0313. When considering in which HUC6 level this operation is located, the algorithm will only consider HUC6 watersheds within HUC4 0313, and not 0314.

Note that in 2017 a majority (64.5 percent) of records were deterministically assigned to a 6-digit HUC because the records appeared in both the 2012 and 2017 Censuses and the HUC definitions did not change during the 5 years in between the Censuses. This methodology could not be used for the 2022 Census of Agriculture because too many of the HUCs changed definition between Censuses due to a refinement in precision of their borders.

Probabilistically assigned farms and ranches were reviewed by NASS Regional Field Offices to verify their assignments and, in some cases, corrections were made. The farms and ranches that were reviewed were typically large operations (with respect to their total value of production) or operations with a rare commodity. All published farm counts and totals were fully adjusted for nonresponse, misclassification, and coverage.

CHANGES TO HYDROLOGIC UNIT CODE DEFINITIONS AND BOUNDARIES

Between the time of the 2017 Census of Agriculture and the 2022 Census of Agriculture, some of the boundaries of the Hydrologic Unit Code (HUC) regions changed. In a number of cases, HUC regions were renamed or new HUC regions were created. The U.S. Geological Survey defines the HUC regions, and thus is the federal agency responsible for modifications to them. HUC regions along the border with Canada and Mexico have been updated to include harmonized hydrologic units and hydrography that extends across the U. S. border. Most documented changes to HUC regions are in the Great Lakes Region 04. As data users examine the published statistics in the accompanying tables, it is helpful to reference the specific changes in HUC definitions and boundaries to assist in interpreting increases or decreases between 2017 and 2022.

The following documentation identifies major changes to watershed boundaries and/or codes for specific states. The wording, *HUC region "X" was reassigned to HUC region "Y"*, indicates: 1) part of a watershed was assigned to an adjacent watershed – this applies to the majority of the documented changes, 2) a watershed was subdivided into smaller watershed areas, or 3) a watershed where only the HUC code changed.

Alaska: A very small part of 2022 6-digit HUC region 190505 was added – it was not included in the 2017 6-digit HUCs.

Georgia: A small part of 2017 4-digit HUC region 0307 was reassigned to 2022 4-digit HUC region 0306. A small part of 2017 6-digit HUC region 030701 was reassigned to 2022 6-digit HUC region 030602.

Hawaii: The northwestern Hawaiian Islands of 2022 6-digit HUC region 200900 were added – they were not included in the 2017 6-digit HUCs.

Indiana: A small part of 2017 2-digit HUC region 07 was reassigned to 2022 2-digit HUC region 04. A small part of 2017 4-digit HUC region 0712 was reassigned to 2022 4-digit HUC region 0404. A small part of 2017 6-digit HUC region 071200 was reassigned to 2022 6-digit HUC region

040400.

Maine: Small parts of 2017 2-digit HUC region 01 were reassigned to 2022 2-digit HUC region 04. Small parts of 2017 4-digit HUC region 0102 were reassigned to 2022 4-digit HUC region 0431. Small parts of 2017 6-digit HUC region 010200 were reassigned to 2022 6-digit HUC region 043100. Small parts of 2017 4-digit HUC region 0103 were reassigned to 2022 4-digit HUC region 0431. Small parts of 2017 6-digit HUC region 010300 were reassigned to 2022 6-digit HUC region 043100. Small parts of 2017 6-digit HUC region 0104 were reassigned to 2022 6-digit HUC region 0431. Small parts of 2017 6-digit HUC region 010400 were reassigned to 2022 6-digit HUC region 043100.

Michigan: The northern part of 2017 4-digit HUC region 0407 was reassigned to new 2022 4-digit HUC region 0420. The northern part of 2017 6-digit HUC region 040700 was reassigned to new 2022 6-digit HUC region 042000. The Lake Huron islands of 2017 4-digit HUC region 0408 were reassigned to new 2022 4-digit HUC region 0424. The Lake Huron islands of 2017 6-digit HUC region 040803 were reassigned to new 2022 6-digit HUC region 042400. The southern part of 2017 4-digit HUC region 0409 was reassigned to 2022 4-digit HUC region 0410. The southern part of 2017 6-digit HUC region 040900 was reassigned to 2022 6-digit HUC region 041000. The Lake Superior islands of 2017 4-digit HUC region 0402 were reassigned to new 2022 4-digit HUC region 0418. The Lake Superior islands of 2017 6-digit HUC region 040203 were reassigned to new 2022 6-digit HUC region 041800.

Michigan and Wisconsin: The Lake Michigan islands of 2017 4-digit HUC region 0406 were reassigned to new 2022 4-digit HUC region 0419. The Lake Michigan islands of 2017 6-digit HUC region 040602 were reassigned to new 2022 6-digit HUC region 041900. The northern part of 2017 4-digit HUC region 0406 was reassigned to 2022 4-digit HUC region 0403. The northern part of 2017 6-digit HUC region 040601 was reassigned to 2022 6-digit HUC region 040301.

Minnesota: A very small part of 2017 4-digit HUC region 0401 was reassigned to new 2022 4-digit HUC region 0418. A very small part of 2017 6-digit HUC region 040102 was reassigned to new 2022 6-digit HUC region 041800.

Missouri: The northeastern part of 2017 4-digit HUC region 0802 was reassigned to 2022 4-digit HUC region 0801. The northeastern part of 2017 6-digit HUC region 080202 was reassigned to new 2022 6-digit HUC region 080103.

Nebraska and South Dakota: Part of 2017 4-digit HUC region 1015 was reassigned to 2022 4-digit HUC region 1017. Part of 2017 6-digit HUC region 101500 was reassigned to 2022 6-digit HUC region 101701.

New York: The northern part of 2017 4-digit HUC region 0412 was reassigned to new 2022 4-digit HUC region 0427. The northern part of 2017 6-digit HUC region 041201 was reassigned to new 2022 6-digit HUC region 042701. Part of 2017 4-digit HUC region 0415 was reassigned to new 2022 4-digit HUC region 0429. Part of 2017 6-digit HUC region 041503 was reassigned to new 2022 6-digit HUC region 042900. Part of 2017 4-digit HUC region 0415 was reassigned to 2022 4-digit HUC region 0414. The mainland 2017 6-digit HUC region 041501 was reassigned to new mainland 2022 6-digit HUC region 041403. Some Lake Ontario islands of 2017 4-digit HUC region 0415 were reassigned to 2022 4-digit HUC regions 0414 and new 0428. The Lake Ontario islands of 2017 6-digit HUC region 041502 were reassigned to new 2022 6-digit HUC regions 041403 and 042800. The northeastern part of 2017 6-digit HUC region 041503 was reassigned to the western part of new 2022 6-digit HUC region 043002.

Eastern New York and western Vermont: Part of the 2017 4-digit HUC region 0415 was reassigned to new 2022 4-digit HUC region 0430. The 2017 6-digit HUC region 041504 was reassigned to new 2022 6-digit HUC region 043001.

Ohio: The Lake Erie islands of 2017 4-digit HUC region 0412 was reassigned to new 2022 4-digit HUC region 0426. The Lake Erie islands of 2017 6-digit HUC region 041202 were reassigned to new 2022 6-digit HUC region 042600.

Rhode Island: The southwestern part of 2017 4-digit HUC region 0109 was reassigned to part of 2022 4-digit HUC region 0110. The southwestern part of 2017 6-digit HUC region 010900 was reassigned to part of 2022 6-digit HUC region 011000.

Vermont: The 2017 6-digit HUC region 041505 was reassigned to new eastern part of 2022 6-digit HUC region 043002.

Wisconsin: Parts of the 2017 4-digit HUC region 0401 were reassigned to new 2022 4-digit HUC region 0418. Parts of the 2017 6-digit HUC region 040103 were reassigned to new 2022 6-digit HUC region 041800. The northwestern Lake Michigan islands of 2017 4-digit HUC region 0403 were reassigned to new 2022 4-digit HUC region 0419. The northwestern Lake Michigan islands of 2017 6-digit HUC region 040301 were reassigned to new

2022 6-digit HUC region 041900.

In general, many other HUC boundaries changed across the 50 States. Generally, the boundary changes were minimal, so that comparisons of 2022 tabulations back to 2017 tabulations would be only very minimally affected, if at all. In this publication, maps are provided displaying the 6-digit HUC boundaries for each HUC2 region for 2022. The data user has the capability to compare these maps back to the 2017 versions of these maps, which may be accessed by referring back to our 2017 Watersheds publication:

<https://www.nass.usda.gov/Publications/AgCensus/2017/OnlineResources/Watersheds/wtrsheds.pdf>.

TERMS AND DEFINITIONS

The following definitions and explanations provide a detailed description of specific terms and phrases used in this publication. Many of the definitions and explanations are the same as those used in earlier censuses. For more details relating to the census of agriculture program, go to the NASS website at <https://www.nass.usda.gov/AgCensus/index.php>.

Acres. Crops were reported in whole acres, except for the following crops that were reported in tenths of acres: tobacco, hops, nursery and greenhouse crops in the open, vegetables including potatoes and sweet potatoes, fruit and nut crops including land in orchards, and berries. Totals for crops reported in tenths of acres were rounded to whole acres at the aggregate level during the tabulation process. Nursery and greenhouse crops grown under glass or other protection were reported in square feet but were converted to acres for this report.

If two or more crops were harvested from the same land during the year (double cropping), the acres were counted for each crop. Therefore, the total acres of all crops harvested could exceed the acres of cropland harvested. No double cropping is allowed for hay or fruit and nut crops. When more than one cutting of hay was taken from the same acres, the acres were counted only once. If there were multiple cuttings of one type of hay production, e.g., two cuttings of alfalfa for dry hay, acreage was reported once but the quantity harvested includes all cuttings. Acreage cut and tons harvested for both dry hay and haylage, silage, or greenchop were reported for each crop. For interplanted crops or “skip-row” crops, acres were reported according to the portion of the field occupied, whether by a crop or whether it was idle land. If a crop was interplanted in an orchard or vineyard and harvested, then the entire orchard or vineyard acreage was reported under the appropriate fruit crop and the interplanted estimated crop acreage was

reported under the appropriate crop.

If a crop was planted but not harvested, the acres were not reported as harvested. These acres were reported in the Land Use section on the report form under the appropriate items – cropland on which all crops failed or were abandoned, cropland in summer fallow, cropland idle or used for cover crops or soil-improvement but not harvested and not pastured or grazed, or other pasture and grazing land that could have been used for crops without additional improvements. This does not include fruit and nut orchards, vineyards, berries, acres in production for cultivated Christmas trees, and acres in production for short rotation woody crops that were not harvested. Acreage in these commodities were included in cropland harvested regardless of whether the crop was harvested. Abandoned orchards were reported as cropland idle, not as harvested cropland, and the individual abandoned orchard crop acres were not reported.

Crops that were grazed by livestock were reported as “Other pasture and grazing land that could have been used for crops without additional improvements.” Crop residue left in fields after the 2022 harvest and later grazed by livestock were reported as cropland harvested and not as other pasture or grazing land that could have been used for crops.

Acres treated with chemicals. For each type of chemical used, the acres treated were reported only once even if the acres were treated more than once. If multi-purpose chemicals were used, the acres treated for each purpose were reported.

All other crops. Data include all crops other than those listed separately in the tables.

Cattle and calves inventory. Data are for farms with any cattle and calves.

Chemicals used to control growth, thin fruit, ripen, or defoliate. This category includes the number of farms and acreage treated with chemicals that altered the expected growth of flowering or reproduction rate of plants (growth regulators), thinned the number of fruit to increase fruit size, or caused leaves or other foliate to drop from a plant, usually to facilitate harvest (defoliant).

Chickens, all inventory. Data are for farms with chickens of any type, whether broilers or layers. This includes bantams and roosters.

Commercial fertilizer, lime, and soil conditioners. Soil enriching agricultural input which contains one or more nutrients such as nitrogen, phosphate, potash, or sulfur.

Includes farms with acres treated at least once with commercial fertilizer, lime, or soil conditioners.

Cropland, harvested. See Harvested cropland.

Cropland idle or used for cover crops or soil improvement but not harvested and not pastured or grazed. Cropland idle includes any other acreage which could have been used for crops without any additional improvement and which was not reported as cropland harvested, cropland on which all crops failed, cropland in summer fallow, or other pasture or grazing land that could have been used for crops without additional improvements. This category includes:

1. Land used for cover crops or soil improvement but not harvested or grazed.
2. Land in Federal or State conservation programs that was not hayed or grazed in 2022.
3. Land occupied with growing crops for harvest in 2023 or later years but not harvested or summer fallowed in 2022 (except fruit or nuts in an orchard, grove, or vineyard or berries being maintained for production). Examples are acreage planted in winter wheat, strawberries, etc., for harvest in 2023 and no crop was harvested from these acres in 2022.
4. Land in “skipped” rows between rows of crops or field strips.

Cropland in summer fallow. This includes cropland cultivated or treated with herbicides to control weeds and conserve moisture and not seeded or harvested in 2022. It includes cropland summer fallowed in 2022 and planted to a crop (i.e., winter wheat, etc.) for harvest in 2023.

Cropland, irrigated. See Irrigated land.

Cropland on which all crops failed or were abandoned. This category includes the number of farms and the acreage where crops were planted, but not harvested, for reasons such as adverse weather conditions damaged the crops.

Cropland on which no-till practices were used. This category includes land on which no-till or minimum till practices were used for weed control and to help reduce weed seed germination by not disturbing the soil.

Cropland on which reduced tillage, excluding no-till, practices were used. This category includes the number of farms and acreage where a tillage system was used to create a suitable soil environment for growing a crop that

conserves soil, water, and energy resources mainly through the reduction in the intensity of tillage and retention of plant residues. At least 30 percent of the soil surface must be covered with residue after planting to meet the definition of conservation tillage.

Cropland, total. See Total cropland.

Cropland used only for pasture or grazing. See Other pasture or grazing land that could have been used for crops without additional improvements.

Farms. The term “farms” represents the number of farms reporting the item. For example, if there are 3,710 farms in an HUC and 842 of them had 28,594 cattle and calves, the data for those farms reporting cattle and calves would appear as:

Cattle and calves farms	842
number	28,594

Floriculture crops. See Nursery, greenhouse, floriculture, and sod.

Goats, all inventory. Data are for farms with any goats and kids, whether for meat, milk, or fiber.

Harvested cropland. This category includes land from which crops were harvested and hay was cut, land used to grow short rotation woody crops and Christmas trees, and land in orchards, groves, vineyards, berries, nurseries, and greenhouses. Land from which two or more crops were harvested was counted only once. Land in tapped maple trees was included in woodland not pastured.

Harvested cropland irrigated. This category includes harvested cropland which was irrigated by any artificial or controlled means. See Irrigated land.

Hogs and pigs inventory. Data are for farms with any hogs or pigs.

Horses and ponies. See Total horses and ponies inventory.

Hydrologic Unit Code (HUC). Any subdivision of land in the U.S. based on boundaries determined by the U.S. Geological Survey (USGS). These subdivisions are based on water flow patterns to the major rivers and their tributaries.

Irrigated land. This category includes all land watered by any artificial or controlled means, such as sprinklers, flooding, furrows or ditches, sub-irrigation, and spreader dikes. Included are supplemental, partial, and preplant

irrigation. Each acre was counted only once regardless of the number of times it was irrigated or harvested. If an operation reported less than one acre irrigated or harvested, the irrigated land for the operation was rounded to one acre. Livestock lagoon waste water distributed by sprinkler or flood systems was also included.

Land in farms. The acreage designated as “land in farms” consists primarily of agricultural land used for crops, pasture, or grazing. It also includes woodland and wasteland not actually under cultivation or used for pasture or grazing, provided it was part of the farm operator’s total operation. Large acreages of woodland or wasteland held for nonagricultural purposes were deleted from individual reports during the edit process. Land in farms includes conservation program acres such as those enrolled in Conservation Reserve Program (CRP), Wetlands Reserve Program (WRP), Farmable Wetlands Program (FWP), and the Conservation Reserve Enhancement Program (CREP).

Land in farms is an operating unit concept and includes land owned and operated as well as land rented from others. Land used rent free was reported as land rented from others. All grazing land, except land used under government permits on a per-head basis, was included as “land in farms” provided it was part of a farm or ranch. Land under the exclusive use of a grazing association was reported by the grazing association and included as land in farms. All land in American Indian reservations used for growing crops, grazing livestock, or the potential of grazing livestock was included as land in farms. Land in reservations not reported by reservation, individual American Indians or non-Native Americans was reported in the name of the cooperative group that used the land. In a few instances, an entire American Indian reservation was reported as one farm.

Land in farmsteads, homes, buildings, livestock facilities, ponds, roads, wasteland, etc. This category includes the number of farms and acres consisting of the farmstead buildings (home, barns, bins, machine sheds, etc.) and land not used for agricultural production (roads, ponds, streams and rivers, and other wasteland).

Land in orchards. This category includes land in bearing age and nonbearing age fruit trees, citrus or other groves, vineyards, and nut trees of all ages, including land on which all fruit crops failed. Respondents also reported bearing age acres and nonbearing age acres by individual fruit and nut crops.

Land in vegetables. Data are for the total land used for vegetable and melon crops. The acres were reported only once, even though two or more harvests of a vegetable or more than one vegetable were harvested from the same

acres. Respondents also reported harvested acres, acres harvested for fresh market, and acres harvested for processing by individual vegetable crops.

Manure used. This category includes the number of farms and acres of cropland and pastureland on which animal manure was applied.

Nursery, greenhouse, floriculture, and sod. Data are for total square feet under protection and acres in the open. Individual crop data were collected for area under glass or other protection, area in the open, and sales of aquatic plants, floriculture and bedding crops, nursery crops, sod, propagative materials, food crops grown under protection, and mushroom crops.

Organic fertilizer used. These are the acres of cropland or pastureland on which approved organic fertilizers were applied.

Other pasture and grazing land that could have been used for crops without additional improvements. This category includes land used only for pasture or grazing that could have been used for crops without additional improvement. Also included are acres of crops grazed by livestock, but not harvested prior to grazing. However, cropland that was pastured before or after crops were harvested in 2022 was included as harvested cropland rather than cropland for pasture or grazing.

Pastureland and other land irrigated. This category includes all types of land, other than Harvested cropland, which was irrigated by any artificial or controlled means. See Irrigated land.

Permanent pasture and rangeland, other than cropland and woodland pastured. This land use category encompasses grazable land that does not qualify as woodland pasture or cropland pasture. It may be irrigated or dry land. In some areas, it can be a high quality pasture that could not be cropped without improvements. In other areas, it is barely able to be grazed and is only marginally better than wasteland.

Sheep and lambs inventory. Data are for sheep and lambs

of all ages owned regardless of location.

Total cropland. This category includes cropland harvested, other pasture and grazing land that could have been used for crops without additional improvements, cropland on which all crops failed or were abandoned, cropland in summer fallow, and cropland idle or used for cover crops or soil improvement but not harvested and not pastured or grazed.

Total horses and ponies inventory. Data are for farms with horses and ponies inventory, regardless of ownership.

Watershed. A watershed is the area of land where all the rainfall that drains off of it goes to a common waterway, such as a stream, lake, estuary, wetland, aquifer, or even the ocean. Watersheds come in all shapes and sizes, and often cross county, State, and national boundaries. According to the U.S. Geological Survey (USGS), the U.S. is divided into 20 regions (2-digit Hydrologic Unit Code level). These regions are subdivided into over 200 subregions (4-digit Hydrologic Unit Code level) based on water flow patterns from the major rivers within the region. The subregions are further divided into basins (6-digit Hydrologic Unit Code level). For the purposes of this report, “basins” are referred to as watersheds.

Woodland pastured. This category includes all woodland used for pasture or grazing during the census year. Woodland or forest land pastured under a per-head grazing permit was not counted as land in farms and, therefore, was not included in woodland pastured.

Woodland, total. This category includes natural or planted woodlots or timber tracts, cutover and deforested land with young growth which has or will have value for wood products and woodland pastured. Land covered by sagebrush or mesquite was reported as Permanent pasture and rangeland or Other land. Land planted for Christmas tree production and short rotation woody crops was reported in Cropland harvested, and land in tapped maple trees was reported as Woodland not pastured.
