

# Mink Methodology and Quality Measures

ISSN: 2167-1346

---

Released August 12, 2025, by the National Agricultural Statistics Service (NASS), Agricultural Statistics Board, United States Department of Agriculture (USDA).

**Scope and Purpose:** The Mink Survey is conducted annually, which includes all States with known mink operations. Data are collected on the number of pelts produced, females bred, the components of the totals by color class, and sales. Marketing data for the price per pelt and the value of mink production are collected from auction houses and incorporated as part of the publication.

Data collected on the number of pelts produced and females bred by color class are published for 7 States. After each Census of Agriculture, which is an exhaustive data collection effort for all known agricultural operations across the United States, the list of published States is evaluated and modified to include the largest mink producing States.

**Survey Timeline:** Mink data are collected for the previous year's production beginning in late April to mid-May. NASS opens the survey for web data collection the day the survey is mailed. Depending on the coding of records by the regions, additional data collection will occur via an in-person field visit or by phone. As a rule of thumb, field and phone data collection will begin one day prior to the first day of May. Analysis and summarization occur over approximately a six-week period ending mid-July. Estimates are released to the public mid-July on the date designated by the Agricultural Statistics Board (ASB) on its annual publications calendar.

**Sampling:** The target population for the Mink Survey is all mink operations which are defined as all agricultural establishments with one or more mink females bred on the land operated. This survey is a complete census of the records on the National Agricultural Statistics Service (NASS) List Frame with positively reported mink data from a past survey. The List Frame is a current and unduplicated list of agricultural operations, and all current mink operations are assumed to be on the list. If a new mink operation is found at any time, the operation is added to the List Frame. Since this is a census of mink operations, all sampling weights are equal to one. Each respondent operation accounts only for itself.

**Data Collection:** All federal data collections require approval by the Office of Management and Budget (OMB). NASS must document the public need for the data, apply sound statistical practice, prove the data does not already exist elsewhere, and ensure the public is not excessively burdened. The questionnaire must display an active OMB number that gives NASS the authority to conduct the survey, a response burden statement that gives an estimate of the time required to complete the form, a confidentiality statement that the respondent's information will only be used for statistical purposes in combination with other producers, and a statement saying that response to the survey is voluntary and not required by law.

All Regional Field Offices (RFO) use the same standardized questionnaire for data collection. For consistency across modes, the paper version is considered the master questionnaire and the Computer Assisted Self Interview (CASI), mobile Computer Assisted Telephone Interview (mCATI), and Computer Assisted Telephone Interview (CATI) instruments are built to model the paper questionnaire. The questionnaire content and format are evaluated annually through a specification process where requests for changes are evaluated and approved or disapproved. Input may vary from question wording or formatting to a program change involving the deletion or modification of current questions or addition of new ones. If there are significant changes to either the content or format proposed, a NASS survey methodologist will pre-test the changes for usability. Prior to the start of data collection, all data collection instruments are reviewed, and thoroughly tested.

Sampled operations receive a pre-survey letter explaining the purpose and importance of the survey and that they are being contacted for survey purposes only. Attached to the letter is a complete copy of the paper questionnaire and a survey code to complete the survey securely online. RFOs are responsible for their data collection strategy which must include

provisions for respondents to report securely online. If a response is not received by mail or online, respondents are contacted either by field or phone follow-up.

**Survey Edit:** As survey data are collected and captured, data are edited for consistency and reasonableness using automated systems. Relationships between data items (i.e., responses to individual questions) on the current survey are verified. Some data items in the current survey are compared to data items from earlier surveys to ensure certain relationships are logical. The edit will determine the status of each record to be either “dirty” or “clean”. Dirty records must be updated and reedited or certified by an analyst to be clean. Only clean records are eligible for analysis and summary.

**Analysis Tools:** Edited data are processed through an interactive analysis tool which displays data for all reports by item. The tool provides scatter plots, tables, charts, and special tabulations that allow the analyst to compare an individual record to similar records. Outliers and unusual data relationships become evident and staff review them to determine if they are correct. The tool allows comparison to an agricultural operation’s previously reported data to detect large changes in the operation. Data found to be in error are corrected, while accepted data are retained.

**Nonsampling Errors:** Nonsampling errors are present in any survey process. These errors include reporting, recording, and editing errors. Steps are taken to minimize these errors, such as comprehensive interviewer training, validation, and verification of processing systems, application of detailed computer edits, and evaluation of the data via the analysis tools.

**Estimators:** The Mink Survey is a complete enumeration of all known mink operations. Mink operations are selected from the list of all agricultural operations and new operations are added into the sample when discovered. No coverage adjustment is made.

Response to the Mink Survey is voluntary. Producers may refuse to participate in the survey, may not be located during the data collection period, or may submit incomplete reports. Any data items or sampling units that are missing due to nonresponse are manually imputed. Since manual imputation is conducted for all nonresponse units and items, point estimates are an accounting of all responses and manual imputations. The measurement of error due to sampling in the current survey period is irrelevant for a fully enumerated census. Moreover, standard errors and coefficients of variation (CVs) are zero for all current data items collected.

**Estimation:** When all samples are accounted for, all responses are fully edited, and the analysis material is reviewed, a summary is executed to evaluate and analyze State and National data. Since the survey instrument is identical for all States, the samples can be pooled, and National survey results computed. The summary results provide multiple point estimates and information used to evaluate the quality of the survey estimates, such as response rates.

A detailed review of the survey results is performed, and any irregularities revealed by the summary must be investigated and, if necessary, resolved. Next, the survey results are validated using the historical survey estimates, and State and National estimates are set for the current year. The data are viewed in tabular and graphical form. For the National estimates, NASS assembles a panel of statisticians to serve on the ASB. The ASB reviews the National results and establishes the National estimates. State totals sum to the National level. Previous year’s estimates are subject to revision when the current year’s estimates are set. Revisions are the result of late reports or corrected data.

## Quality Metrics for Mink

**Purpose and Definitions:** Under the guidance of the Statistical Policy Office of the Office of Management and Budget (OMB), the United States Department of Agriculture’s National Agricultural Statistics Service (NASS) provides data users with quality metrics for its published data series. The metrics tables below describe the performance data for all surveys contributing to the publication. The accuracy of data products may be evaluated through sampling and nonsampling error. There is no sampling error present for this survey since it is a census of the target population. Nonsampling error is evaluated by response rates and the weighted item response rates.

**Sample size** is the number of observations selected from the population to represent a characteristic of the population. Operations that did not have the item of interest or were out of business at the time of data collection have been excluded.

**Response rate** is the proportion of the above sample that completed the survey.

**Weighted item response rate** is a ratio of reported survey data expanded by the original sampling weight compared to final nonresponse adjusted summary totals.

**Mink Survey Sample Size and Response Rates:** To assist in evaluating the performance of the estimates in the mink report, the sample size and response rates are displayed. Response rates overall for 2024 and 2025 are displayed.

### Mink Survey Sample Size and Response Rates – United States: 2024-2025

	Sample size		Response rate	
	2024	2025	2024	2025
	(number)	(number)	(percent)	(percent)
United States .....	96	86	79.2	72.1

**Mink Survey Weighted Item Response Rates:** To assist in evaluating the performance of the estimates in the mink report, the weighted item response rate is displayed nationally by color class and for 7 States and all Other States and nationally for pelts produced (2023 and 2024) and females bred (2024 and 2025).

### Quality Metrics for Mink Pelts Produced and Females Bred by Color Class – United States: 2023-2025

Color class	Weighted item response rate			
	Pelts produced		Females bred to produce kits	
	2023	2024	2024	2025
	(percent)	(percent)	(percent)	(percent)
Black .....	87.8	84.8	88.2	86.0
Demi/Wild .....	98.7	16.2	84.9	72.8
Pastel .....	92.2	89.3	91.5	93.2
Sapphire .....	82.3	87.2	83.2	90.1
Blue Iris .....	100.0	99.8	100.0	99.7
Mahogany .....	42.3	53.9	49.0	40.9
Pearl .....	88.9	100.0	47.6	100.0
Lavender .....	100.0	100.0	100.0	100.0
Violet .....	95.4	99.0	95.9	99.2
White .....	81.6	56.5	82.2	70.3
Other .....	83.3	47.5	83.7	55.7
Total .....	83.1	76.8	83.5	79.9

**Quality Metrics for Mink Pelts Produced and Females Bred – Selected States and United States: 2023-2025**

State	Weighted item response rate			
	Pelts produced		Females bred to produce kits	
	2023	2024	2024	2025
	(percent)	(percent)	(percent)	(percent)
Idaho .....	33.0	47.0	27.0	46.3
Michigan .....	(D)	(D)	(D)	(D)
Minnesota .....	43.0	98.9	53.5	97.6
Oregon .....	91.3	100.0	91.8	100.0
Utah .....	93.0	75.4	92.6	78.4
Washington .....	(D)	(D)	(D)	(D)
Wisconsin .....	95.9	95.1	96.1	95.5
Other States <sup>1</sup> .....	56.2	19.7	55.3	29.3
United States .....	83.1	76.8	83.5	79.9

(D) Withheld to avoid disclosing data for individual operations.  
<sup>1</sup> Individual state estimates not available for states not shown but are included in Other States.

## Access to NASS Reports

For your convenience, you may access NASS reports and products the following ways:

- All reports are available electronically, at no cost, on the NASS web site: [www.nass.usda.gov](http://www.nass.usda.gov).
- The national specific reports are available via a free e-mail subscription. To set-up this free subscription, visit [www.nass.usda.gov](http://www.nass.usda.gov) and click on “National” in upper right corner above “search” box to create an account and select the reports you would like to receive.
- Cornell’s Mann Library website houses NASS’s and other agency’s archived reports at <https://usda.library.cornell.edu>. All email subscriptions containing reports will be sent from <https://usda.library.cornell.edu>. To receive the reports via e-mail, you will have to go to the website and subscribe to the reports. If you need instructions to set up an account or subscribe, they are located at: <https://usda.library.cornell.edu/help>. You should whitelist [notifications@usda-esmis.library.cornell.edu](mailto:notifications@usda-esmis.library.cornell.edu) in your email client to avoid the emails going into spam/junk folders.

For more information on NASS surveys and reports, call the NASS Agricultural Statistics Hotline at (800) 727-9540, 7:30 a.m. to 4:00 p.m. ET, or e-mail: [nass@usda.gov](mailto:nass@usda.gov).

If you have specific questions you would like an expert to respond to, please visit our “Ask A Specialist” website at [www.nass.usda.gov/Contact\\_Us/Ask\\_a\\_Specialist](http://www.nass.usda.gov/Contact_Us/Ask_a_Specialist).

In accordance with Federal civil rights law and U.S. Department of Agriculture (USDA) civil rights regulations and policies, the USDA, its Agencies, offices, and employees, and institutions participating in or administering USDA programs are prohibited from discriminating based on race, color, national origin, religion, sex, disability, age, marital status, family/parental status, income derived from a public assistance program, political beliefs, or reprisal or retaliation for prior civil rights activity, in any program or activity conducted or funded by USDA (not all bases apply to all programs). Remedies and complaint filing deadlines vary by program or incident.

Persons with disabilities who require alternative means of communication for program information (e.g., Braille, large print, audiotape, American Sign Language, etc.) should contact the responsible Agency or USDA's TARGET Center at (202) 720-2600 (voice and TTY) or contact USDA through the Federal Relay Service at (800) 877-8339. Additionally, program information may be made available in languages other than English.

To file a program discrimination complaint, complete the USDA Program Discrimination Complaint Form, AD-3027, found online at [How to File a Program Discrimination Complaint](#) and at any USDA office or write a letter addressed to USDA and provide in the letter all of the information requested in the form. To request a copy of the complaint form, call (866) 632-9992. Submit your completed form or letter to USDA by: (1) mail: U.S. Department of Agriculture, Office of the Assistant Secretary for Civil Rights, 1400 Independence Avenue, SW, Washington, D.C. 20250-9410; (2) fax: (202) 690-7442; or (3) email: [program.intake@usda.gov](mailto:program.intake@usda.gov).

USDA is an equal opportunity provider, employer, and lender.
