## Introduction

This publication is based on the annual Crop Reports compiled by the California County Agricultural Commissioners. These reports provided detailed annual data available on agricultural production by county.

In order to curb costs and increase efficiency, there will no longer be two separate books. Rather, one publication will serve as a one stop resource for reported County Agricultural crop data. The detailed Data will follow the Summary, and County Agricultural Commissioners' addresses will still be found at the end of the publication.

Reports were received from 54 of 58 counties for 2012. Three County Agricultural Commissioners' Reports, Plumas-Sierra, Modoc and Trinity, were not available at publication, therefore the most recent data from the last available reports were used. 2011 data was used for Plumas-Sierra, 2008 data for Modoc County, and 2007 data for Trinity County. Copies of individual County Agricultural Commissioners' Reports may be requested or obtained directly from each County Agricultural Commissioner's office. Many of the counties publish the report on their websites.

Basic data collected by the Agricultural Commissioners and their staff members are compiled from many sources. Sources vary from county to county. Examples of data sources include grower surveys, regulatory and inspection data, shipment data, industry assessments, etc.

The amount of detail varies by county. For instance, one county may list all grapes; another may show grapes by raisin, table, and wine; and another may list a further breakdown, such as canned, crushed, dried, fresh, and juice. The data were coded at the detail level.

The sum of other counties included only those counties that provide the California Department of Food and Agriculture a listing of commodities that cannot be published at the county level due to disclosure of confidential information. However, data can be published when combined with other counties. Please be aware that the count is shown as one in those cases.

Credit is due the County Agricultural Commissioners and their staff members for preparing the annual county Crop Reports upon which this compilation is based.

## Summary of County Agricultural Data

California's counties reported an increase of 7.3 percent in the value of agricultural production for 2012. Six counties reported agricultural production exceeding \$3.0 billion each. Fourteen counties reported a value of production in excess of \$1.0 billion. Fresno continued as the leading county with an agricultural production value of \$6.59 billion, a decrease of 3.3 percent from the 2011 value. Kern County was second in value of production with \$6.21 billion, an 11 percent increase from 2011. Tulare County fell to third in value, even with an increase of 10.3 percent in production to \$6.21 billion. Monterey remained fourth in value with \$3.14 billion, a 7.4 percent increase from 2011.

## Gross Value in Agricultural Commissioners' Reports

The gross value of production published in this report includes all farm production, whether sold into usual marketing channels or used on the farm where it is produced. Values placed on pasture and range feed are included and fresh fruit and vegetable crop values are based on the Free-On-Board (F.O.B.) packed price. Values are recorded for all products grown during the calendar year, regardless of when they are marketed. The *California County Agricultural Commissioners' Reports* publication also provides statistics on a broader range of commodities than estimates prepared by other agencies.

Because of these concepts, the State total for gross dollar values summarized in this report differs from the cash receipts to farmers estimated by USDA's National Agricultural Statistics Service, Pacific Region-California. The larger total value reported by Agricultural Commissioners results from the different definitions used in estimating total value of production rather than cash receipts to producers.

Some counties include timber as a part of their crop report, following the pattern set by the California County Agricultural Commissioners and Sealers Association (CACASA). Since it is not comparable to earlier county summaries, timber has not been made a part of the main tables of this summary. The total 2012 value of production reported by the counties, including timber, is \$55.7 billion, up 7.3 percent from last year. At \$62.6 million, Humboldt County leads the State with 23.4 percent of the State's total timber value.
