CALIFORNIA AGRICULTURE OVERVIEW

CALIFORNIA'S INCOME FROM FARM MARKETING UP SLIGHTLY

California's ranchers and farmers sold and estimated \$20.1 billion in agricultural products in 1994, up 1% from 1993. Increases in milk and cream, strawberries, rice, processing tomatoes, and hay were nearly offset by decreases in lettuce, grapes, cattle and calves, and almonds. Fruit and nut cash receipts, comprising 27% of the total farm marketings, decreased 5% to nearly \$5.4 billion. Livestock and poultry sales, at \$5.4 billion, increased nearly 2% from 1993. Vegetable crops declined 3% to \$4.3 billion. Field crops posted a 17% increase to \$3.0 billion. Nursery and greenhouse products increased 2% to \$2.0 billion.

1994 WAS ANOTHER DRY YEAR IN CALIFORNIA

The Golden State experienced another dry year (July 1993-June 1994) with precipitation well below normal. Fortunately, the previous year was wet and many reservoirs held sufficient water to give farmers the water needed for irrigation. For the fruit and nut crops, the weather was ideal during the critical pollination period and several crops experienced record production. The weather during the summer months, although hot, was not excessive. The crops having record production in 1994 were: almonds, apples, cherries, nectarines, other pears, strawberries, rice, processing tomatoes, and sweet corn. The amount of milk and cream produced also reached a record high in 1994 and California surpassed Wisconsin as the number one dairy state.

ACREAGE HARVESTED (Millions)

PRODUCTION (Million Short Tons)

CALIFORNIA FIRSTS

Some 250 crops are recognized in California, including seeds, flowers and ornamentals.

This report contains information about 64 major crops grown on a large commercial scale in California:

12 Field Crops
 25 Fruits and Nuts
 25 Vegetables
 Nursery Products and Cut Flowers

In addition, data are shown for 10 livestock, poultry, and other products.

California leads the Nation in the crops shown in the table below. A large number are specialty crops in which the Golden State accounts for most of the U.S. production.

CROP AND LIVESTOCK COMMODITIES IN WHICH CALIFORNIA LEADS THE NATION		
Alfalfa Hay	Dates	Parsley
Alfalfa Seed	Dry Baby Lima Beans	Peaches
Almonds	Dry Large Lima Beans	Pears, Bartlett
Apricots	Eggs	Persian Melons
Artichokes	Figs	Persimmons
Asparagus	Garbanzo Beans	Pigeons & Squabs
Avocados	Garlic	Pistachios
Bedding Plants	Goat's Milk	Plums
Bell Peppers	Green Lima Beans	Pomegranates
Bermuda Grass Seed	Green Onions	Prunes
Blackeye Beans	Greenhouse Vegetables	Rabbits
Broccoli	Herbs	Raisins
Brussels Sprouts	Honey	Safflower
Bulbs	Honeydew Melons	Sod
Cantaloupes	Indoor Plants	Spinach
Carrots	Dry Kidney Beans	Strawberries
Casaba Melons	Kiwifruit	Sudan Grass
Cauliflower	Ladino Clover Seed	Sweet Rice
Celery	Lemons	Table Grapes
Chicary	Romaine Lettuce	Processing Tomatoes
Chinchillas	Leaf Lettuce	Vegetable & Flower Seed
Chinese Cabbage	Head Lettuce	Walnuts
Chinese Peas	Nectarines	Wild Rice
Crenshaw Melons	Olives	Wine Grapes
Currants	Onions	
Cut Flowers	Oriental Vegetables	

CALIFORNIA FARM INCOME INDICATORS, 1990-94

Number Of Farms	85,000	83,000	80,000	76,000	76,000

^{1/} Value added to gross income. Value added to net farm income equals difference in net farm income and returns to operators. ^{2/} Includes landlord capital consumption. ^{3/} Statistics in and above the Net Farm Income line represent the farm sector, defined as including farm operators' dwellings located on farms. Statistics below the Net Farm Income line represent only the farm businesses to the exclusion of the operators' dwellings. ^{4/} Returns to operators is equivalent to net farm income excluding the income and expenses associated with farm operators' dwellings. ^{5/} Excludes landlord capital consumption.

CASH RECEIPTS DEFINED

Cash receipt data as prepared by the Economic Research Service (ERS) reflect income derived from the sale of agricultural commodities during a calendar year for only that portion of the commodity that is sold. Whereas, value of production data for crops and livestock products as prepared by the National Agricultural Statistics Service (NASS) reflect the total value of the commodity produced based on a marketing year average price. For certain commodities such as some fruits and vegetables which are normally sold in the same calendar year in which they were produced, cash receipt data and value of production data will be in close agreement. However, for most field crops, the marketing year will span portions of two calendar years, making the two data series non comparable. Data users should be aware of the differences between the ERS and NASS data series in their use of the data.

CALIFORNIA CASH INCOME BY COMMODITIES AND COMMODITY GROUPS, 1992-94

Source of Income	1992	1993	1994
	\$1,000		
FIELD CROPS

^{1/} Based on quantity produced for crops and on quantity marketed for livestock and poultry products.

^{2/} Based on value of quantity harvested for crops, value of quantity marketed for livestock and value of quantity produced for poultry products.

^{3/} Based on values published in the Annual County Agricultural Commissioners' Reports.

^{4/} Share of U.S. production based on 1987 Census of Agriculture.

^{5/} The 1994 price and value are based on the 1993 U.S. average price.

^{6/} Extracted from Agricultural Commissioners' Annual Crop Reports.

^{7/} Includes trees, shrubs, vines, bulbs, turf, etc., not included in flowers and foliage category.

^{8/} Includes cut flowers, potted plants, foliage plants, bedding plants and indoor decoratives.

CALIFORNIA'S LEADING FARM PRODUCTS

- California's "Top Twenty" crop and livestock commodities account for 75% of the State's gross farm income.
 - This is illustrated by the fact that only one product exceeds 10%, and the five leading commodities account for only two-fifths, of the State's total gross farm income.
- California's Diversity**
- California agriculture is considered one of the most diversified in the world, with no one crop dominating the State's farm economy.
 - California continues to lead the nation with many commodities, primarily fruit and nut crops and vegetables. Fruit, nut and vegetable crops produced in California account for over half of the nation's production.

CALIFORNIA'S TOP TWENTY

CALIFORNIA 1994 FARM FACTS

- About 11% of the national gross cash receipts for farming are produced in California on 79,000 farms.
- This constitutes 3.8% of the Nation's total farms (based on the Census of Agriculture definition of farms as places with annual sales of agricultural products of \$1,000 or more).

CALIFORNIA NUMBER OF FARMS, LAND IN FARMS, AND SIZE OF FARM, 1950-94

CALIFORNIA NUMBER OF FARMS, LAND IN FARMS, AND SIZE OF FARM -- 1950-1994

Year	Number of Farms	Land in Farms	Average Size of Farm
		1,000 Acres	Acres
1950 <i>a/</i>	144,000	37,500	260
1955	124,000	39,000	316

1993	79,000	30,000	380
1994	79,000	29,900	378

a/ Old definition of farm: Places of 10 or more acres that had annual sales of agricultural products of \$50 or more and places of less than 10 acres that had annual sales of \$250 or more.

b/ New definition of farm: Places with annual sales of agricultural products of \$1,000 or more.

PROFILE OF CALIFORNIA'S AGRICULTURE

SOURCE: 1992 Census of Agriculture

CALIFORNIA FIELD CROPS

SUMMARY OF FIELD CROPS

California's 1994 field crop production was worth \$3.36 billion at the farm-gate level. This value was 8% above the previous year and the highest since 1981.

Hay, Upland cotton, dry beans, wheat, barley and oats recorded significantly higher farm returns. Rice, grain corn and potatoes were the only field crops which returned less dollars.

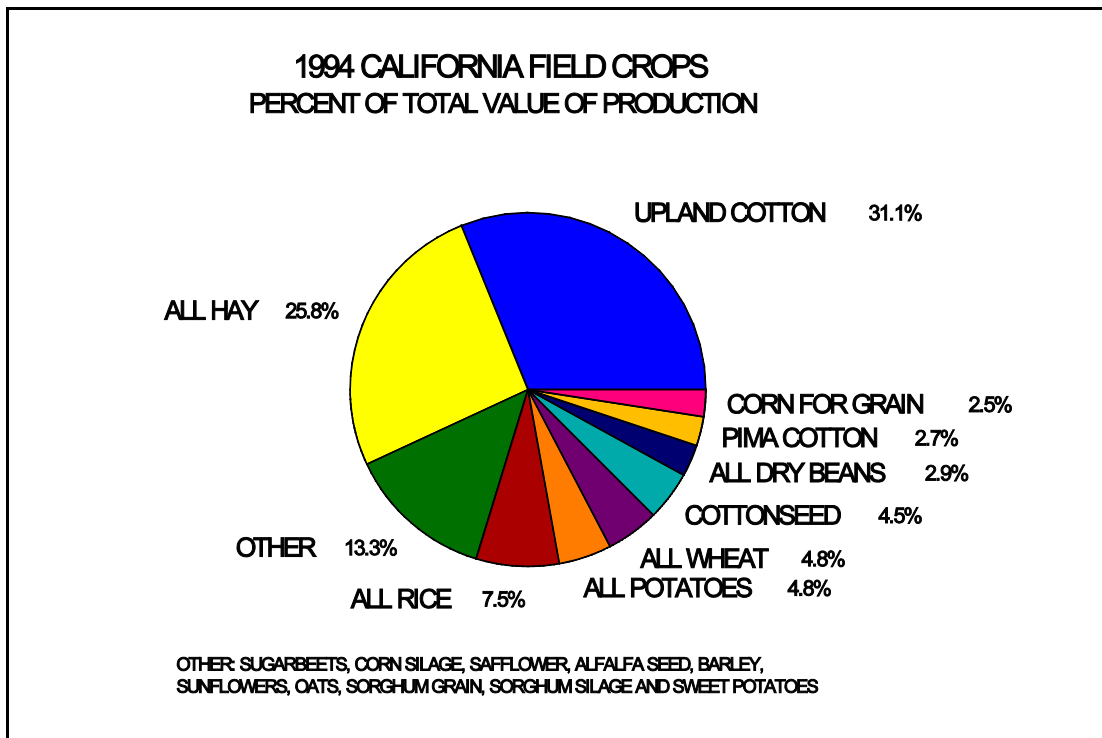

The average value per harvested acre in 1994 rose to \$685 compared to the \$665 per acre value in 1993.

Production of the major field crops totaled 25.8 million tons, up 7% from the 24.1 million tons produced in 1993. Virtually all of the major field crops had increases in acreage from 1993. Sweet potato acreage was down 1%, while corn for grain acreage was unchanged.

Upland cotton was again the state's highest valued field crop with a total value of \$1.05 billion. Nationally, California ranked second in Upland cotton production with 2.72 million bales produced, at an average price of 80.2 cents per pound.

All hay was California's second leading field crop, with a total value of \$868 million. At the U.S. level, the state ranked second in the production of all hay with a total of 8.21 million tons.

a/ Production is on a clean basis

b/ Estimate discontinued.

c/ Excludes beans grown for garden seed.

d/ Not estimated.

e/ Cotton: 480 lbs. net-weight per bale.

f/ No estimate for 1985-86.

g/ Estimated marketings of alfalfa and other hay used as weights to calculate all hay price for 1989-94.

h/ Excludes sweet and wild rice.

i/ Not available.

j/ Includes some acreage carried over and harvested the following spring.

1/ The total covered growing area of 146,400,000 square feet consisted of the following: 19,600,000 square feet of shade and temporary cover; 19,800,000 square feet of glass; 51,000,000 square feet of fiberglass and other rigid greenhouses; and 56,000,000 square feet of film plastic (single/multi) greenhouses. In addition, plants were produced on 9,500 acres of open ground.

2/ For potted plants, price represents a weighted average for plants sold in pots less than 5 inches and in pots 5 inches or more.

3/ Total includes Gladioli, which are not published to avoid disclosure of individual operations.

4/ Total includes Geraniums in flats and potted Chrysanthemums, which are not published to avoid disclosure of individual operations.

5/ Based on equivalent wholesale value of all sales for all crops, except potted foliage plants which are based on net value of sales.

FRUIT AND NUT CROPS

SUMMARY OF FRUIT AND NUT CROPS

California produced 13.7 million tons of fruit and nut crops in 1994, 1% more than 1993. California grew 42% of U.S. fruit and nut production in 1994. The total value of fruit and nut production was \$5.58 billion in 1994, down 1% from 1993. This was 56% of the U.S. total value. California accounts for virtually all of the U.S. production of dates, figs, kiwifruit, nectarines, olives, almonds, pistachios, and English walnuts.

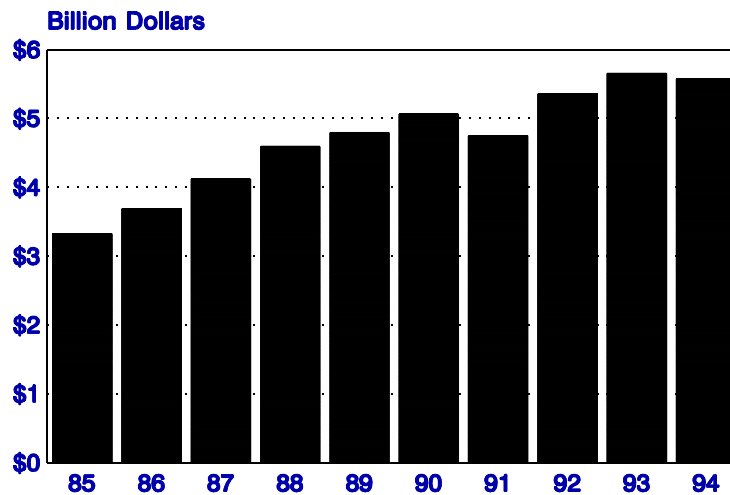

California dominates U.S. production of apricots, avocados, grapes, lemons, plums, prunes, and strawberries. Several crops had major changes in production from 1993 to 1994. They include the following changes: sweet cherries, up 174%; apricots, up 69%; prunes, up 60%; almonds, up 47%; avocados, down 51%; pecans, down 50%; and olives, down 31%. Precipitation during the

winter was well below normal, but the weather during pollination was good and good fruit set was realized. Several crops had record production including nectarines, other pears, cherries, almonds, and strawberries.

ALL CALIFORNIA FRUIT AND NUTS

Value of Utilized Production

NOTES FOR USERS

Total production is the quantity actually harvested plus quantities which would have been acceptable for fresh market or processing but were not harvested. It also includes fruit that was harvested but not sold due to marketing conditions.

Utilized production is the amount sold, plus the quantities used at home or held in storage. **Crop year production** for citrus and avocados are from the bloom of the first year shown. For example, 1993-94 would represent the 1994 production from the 1993 bloom.

Utilization refers to first, but not necessarily final, utilization. For example, frozen fruit used for preserves is included as frozen. **Canned** includes all canned products -- jam, jelly, baby food, nectar, juice, puree, and all fruit packs combined

The non-citrus fruits and nuts average grower return data series is based on the equivalent return at the first delivery point. The first delivery point price is defined as the price received by growers for fruit delivered at the local market, receiving house, receiving station, or any other first delivery point. Drying costs are excluded from grower return on all fruit crops except grapes.

The difference between **first delivery point** and **Packinghouse door** prices is transportation costs. Prices are season averages computed on the basis of all methods of sale. Returns at the processing plant door for "processing" utilization and returns at the packinghouse door for "fresh market" utilization are weighted together to obtain the season average. **Crop value** estimates cover the marketing season or crop year and should not be confused with **cash receipts** from these crops which are calculated on a single calendar year. The season average price is applied to utilized production to compute **value of production**.

Price and value, published as "**grower return per carton**" for citrus fruits are based on equivalent packinghouse door returns for the entire data series. The processing price for berries is based on equivalent returns at the processing plant door. The fresh market price is on a packed and loaded basis, F.O.B. shipping point.

	1994	6,600	---	---	600,000	---	---	71,100

^{1/} Equivalent return at first delivery point.

^{2/} Return at processing plant door or packinghouse door.

^{3/} Revised beginning in 1988 to include non-bearing years, dwarf and non-dwarf were combined.

^{4/} Acres of raisin type grapes enrolled in the California Raisin Industry Diversion (RID) program were; in 1985, 30,000; in 1986, 50,000; in 1987, 15,000; in 1988, 25,000; in 1991, 20,000; in 1992, 12,500; in 1993, 20,000. These acres were deducted from bearing acres before calculating yield.

^{5/} Raisin type production is the fresh equivalent of dried and not dried.

^{6/} Total value based on processing plant door or packinghouse door price not grower return.

^{7/} Reported as miscellaneous after 1989.

^{8/} 1994 acreage by county, variety, and year of planting available upon request.

^{9/} These crops are almond hulls, black walnuts, jojobas (until 1991), limes, persimmons, pomegranates (starting in 1990), and in 1991, bushberries. Acres exclude almond hulls.

DRYING RATIO -- TONS OF GREEN FRUIT REQUIRED TO PRODUCE ONE DRIED TON

Year	Apples	Apricots	Figs	Raisins	Freestone Peaches	Pears	Prunes

- 1/ Dried fruit included in total processed to avoid disclosure of individual operations.
2/ Processed fruit included in fresh market total to avoid disclosure of individual operations.
3/ Total processed includes canned, crushed, frozen, and brined.
4/ For 1985, fresh prices include processing, but not dried. For 1986-94 prices for processing and fresh totals were not published to avoid disclosure of individual operations. Small quantities processed included in fresh to avoid disclosure of individual operations.
5/ Includes substandard raisins diverted to other uses.
6/ Processed and fresh fruit not published to avoid disclosure of individual operations but included in total utilized.
7/ Limited and undersized combined prior to 1988.
8/ Processed mostly canned, but includes other small quantities not published separately to avoid disclosure of individual operations.
9/ Pomegranates reported as miscellaneous after 1989 crop.

^{1/} Season average prices for all grapefruit are derived by weighting the season average prices for each area by their carton weights.

^{2/} Prior to 1993-94 net weight per carton was 32 pounds.

^{3/} Beginning 1984-85, value of production is based on packinghouse door (PHD) instead of free on board (F.O.B.).

1/ Price and value are based on the edible portion of the crop only. Included in production are inedible quantities of no value as follows: 1985 -- 14.3 million pounds, 1986 -- 9.8 million pounds, 1987 -- 12.0 million pounds, 1988 -- 18.5 million pounds, 1989 -- 18.5 million pounds, 1990 -- 17.0 million pounds, 1991 -- 15.9 million pounds, 1992 -- 16.2 million pounds, 1993 -- 10.3 million pounds, 1994 -- 14.6 million pounds.

2/ Data for 1994 acreage by county, variety, and year of planting available upon request.

3/ Pecan production data begins with the 1988 crop.

CALIFORNIA LIVESTOCK AND DAIRY

SUMMARY OF LIVESTOCK INVENTORY AND CASH RECEIPTS

The increase in California's milk and cream cash receipts offset declines in most other livestock. Livestock cash receipts totaled \$5.40 billion, 2% above 1993.

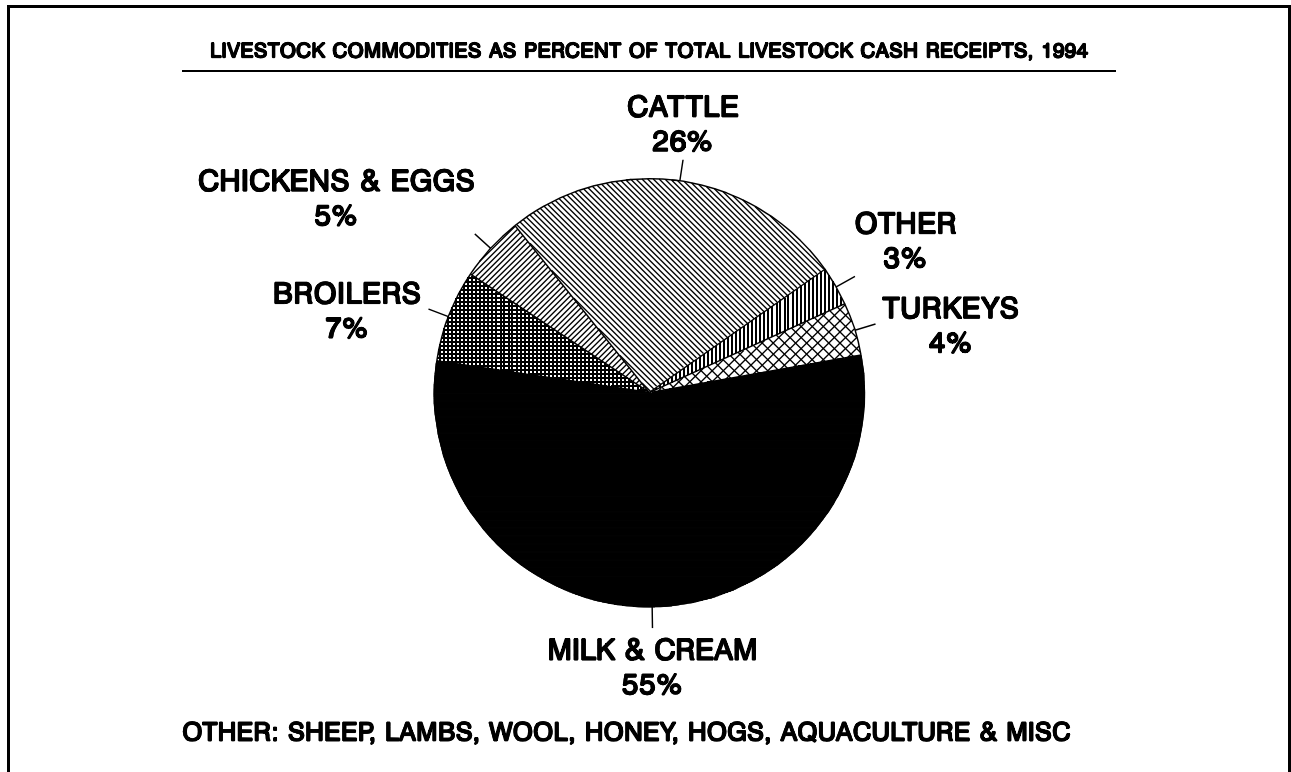

Red meat production, at 2.15 billion pounds, was 7% above last year's production. Beef production, at 2.00 billion pounds, was up 9% from a year ago. Lamb and mutton production of 51.3 million pounds was down 25%. Pork production of 96.8 million pounds was 5% below a year ago.

Poultry production, at 1.63 billion pounds, was down 1% from 1993. Broiler production of 1.13 billion pounds increased 3% from the previous year. Turkey production was 8% lower at 449.4 million pounds. The 52.9 million pounds of other chickens produced was 13% lower than a year ago.

Milk production, at 25.0 billion pounds, was 9% above a year ago. Egg production, at 6.60 billion eggs, was down 6%. Honey production of 24.0 million pounds declined by 47% from the 1993 production year. Wool production of 5.32 million pounds was 12% less than 1993.

2/ Live weight; excludes custom slaughter for use on farms where produced and interfarm sales within the State.

3/ Receipts from marketing and sale of farm slaughter.

CALIFORNIA VEGETABLES AND MELONS

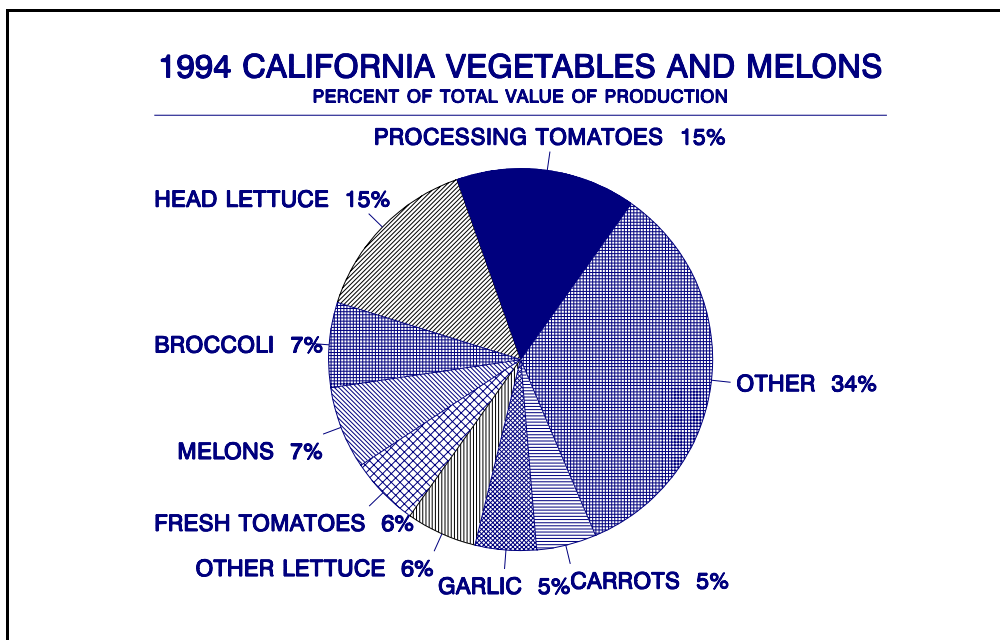

SUMMARY OF VEGETABLE AND MELON CROPS

California produced 19.9 million tons of vegetables and melons in 1994, 7% more than in 1993. The primary increase in tonnage came from processing tomatoes, which was 20% above 1993. Total value of vegetable production was \$4.29 billion, down slightly from 1993. Garlic had the greatest percentage increase in value, which was 55% above 1993. Processing tomatoes, broccoli, asparagus, artichokes, carrots, and sweet corn had increases in value, but did not offset the decreases for head lettuce, fresh market tomatoes, celery, cauliflower, and onions.

California was the leading fresh market state, accounting for 38.7% of the harvested acreage, 43.6% of the production, and 49% of the total value. California was also the leading processing state, with 22.1% of the acreage, 61.4% of the production, and 48.2% of the value.

The vegetable and melon estimates include commercial production, excluding garden production and vegetables grown for seed. Prices for processing crops and processed segments of dual utilization crops are based upon equivalent returns at the processing plant door. For fresh market sales, the price is on a packed and loaded basis, F.O.B. shipping point. Not all data are published for California to avoid disclosure of individual plants.

a/ The processed price is based on equivalent returns at the processing plant door. The fresh market price is on a packed and loaded basis, f.o.b. shipping point.

b/ Program initiated for 1992.

c/ Information unavailable due to disclosure.

d/ Onion production includes quantity harvested, but not marketed because of loss during storage (shrinkage): 1985 -- 497,000 cwt., 1986 -- 200,000 cwt., 1987 -- 320,000 cwt., 1988 -- 280,000 cwt., 1989 -- 200,000 cwt., 1990 -- 234,000 cwt., 1991 -- 174,000 cwt., 1992 -- 275,000 cwt., 1993 -- 248,000 cwt., 1994 -- 248,000 cwt. Storage loss amounts are excluded when computing total value.

e/ Miscellaneous vegetables and melons include: Green lima beans for processing, cabbage, fresh market cucumbers, green onions, oriental vegetables, green peas, chili peppers, spinach, squash, etc. The new crops added in 1992 are excluded from the 1992 and 1993 miscellaneous totals. Miscellaneous figures come from County Agricultural Commissioners.

CALIFORNIA TOMATOES FOR PROCESSING BY COUNTY, 1994

County	Contracted and Open Market			
	Planted Acres	Harvested Acres	Yield	Production 1/
	Acres		Tons/Acre	Tons
Contra Costa	4,300	4,100	37.49	153,700
San Benito	2,500	2,500	30.48	76,200
Santa Clara	1,500	1,500	33.93	50,900
Colusa	22,700	22,100	36.97	817,000
Sacramento	7,600	7,400	30.09	222,700
Solano	19,000	18,600	33.74	627,600
Sutter	20,400	20,000	33.47	669,300
Yolo	71,000	69,700	33.66	2,346,000
Fresno	101,600	99,600	35.84	3,570,000
Kings	12,000	11,500	30.40	349,600
Merced	10,300	10,100	33.88	342,200
San Joaquin	23,400	22,700	34.93	792,900
Stanislaus	12,000	11,700	34.43	402,800
Other Counties 2/	9,700	9,500	34.45	327,260
State Total	318,000	311,000	34.56	10,748,160

1/ On the basis of PAID FOR TONNAGE purchased from growers as reported by processors, dockage not included.

2/ To avoid disclosure of individual operations, OTHER COUNTIES include: Contra Costa, Monterey, Kern, Imperial, Santa Barbara, and Ventura.
