The USDA-NASS Pacific Regional Office surveyed California's tomato processors for their final acreage and tonnage for the 2025 season. The reported data is summarized by county and listed with final 2024 acres, yield and production for comparison.

In 2025, there were 210,000 acres of processing tomatoes planted in California, a decrease of 18,000 acres compared to 2024. An estimated 200,000 acres were harvested in 2025, down 22,000 acres from the previous year. Total 2025 production was 11.6 million tons, 5% higher than the 2024 final production of 11.1 million tons.

Fresno County continued to be the top California county with 3.14 million tons produced. The remaining top five counties include Yolo, Merced, Kings and Colusa, accounting for 69% of the total 2025 processing tomato tonnage for California.
