1992-93 CALIFORNIA NAVEL ORANGE FORECAST

The initial 1992-93 Navel orange forecast is 76.0 million (37.5 pound) cartons, up 8 percent from the 70.2 million cartons in the 1991-92 season. Of this 76.0 million total, 66.0 million cartons are estimated to be in the Central Valley.

SURVEY HISTORY

A Navel Orange Objective Measurement (O.M.) Survey, funded by the Navel Orange Administrative Committee (NOAC), has been conducted in the Central Valley since the 1984-85 crop year. The data from the first two years were used for research purposes in developing crop estimating models. The size data used in the estimating models were obtained from the NOAC's monthly tagged fruit and growth survey.

SURVEY SAMPLE

A sample of 398 Navel orange groves was randomly selected proportional to county and variety bearing acreage. Once a grove is randomly chosen and permission is granted, two trees are randomly selected. Trunk and branch measurements along with fruit counts are then made on each tree. Size data is collected by the NOAC with their regular monthly tagged fruit and growth survey.

TABLE 1: CALIFORNIA NAVEL ORANGES,
AVERAGE ORANGE SET PER TREE, BY COUNTY

Year	Madera	Fresno	Tulare	Kern	Central Valley
1986-87	347	637	541	504	544
1987-88	272	236	402	354	361
1988-89	403	518	585	594	570
1989-90	491	606	501	614	541
1990-91 a/	655	476	505	479	498
1991-92	N/A	N/A	N/A	N/A	N/A
1992-93	402	501	569	654	572

a/ Freeze year. Data not used in forecasting 1992-93 crop.

a/ Nevel Orange Administrative Committee. Acreage data is number of acres of bearing age (over 4 years old). Some fruit could have been picked from trees younger than 4 years old, but not enough to consider the tree full bearing.

b/ California Agricultural Statistics Service.

c/ Nevel Orange Administrative Committee's Tagged Fruit Growth Survey.

d/ Freeze year. Data not used in forecasting 1992-93 crop.

e/ No Objective Measurement Survey conducted for 1991-92 season due to lack of funding.

f/ California Agricultural Statistics Service preliminary forecast.

g/ Nevel Orange Administrative Committee five-year growth average.
