STATISTICS SERVICE

TOMATO PROCESSORS EXPECT TO CONTRACT 11.0 MILLION TONS IN 2004

As of January 15, 2004, California's tomato processors indicated they intend to contract 11.0 million tons, approximately 20 percent more processing tomatoes than the final 2003 harvested contracted production.

Processors estimate the contracted production for 2004 will come from 291,000 acres producing an average of 37.80 tons per acre. The contracted acreage forecast is 5,000 acres more than was planted under contract in 2003. The anticipated yield for 2004 would be the third highest on record.

This early processing tomato contract intentions estimate was funded by the California League of Food Processors in cooperation with the California Department of Food and Agriculture. The USDA processing intentions estimate for all states will be issued on April 2.

Intended and Final Harvested Contracted Production

Year	January 31	Final	Difference
	Thousand Tons		
1995	11,200	10,473	-727
1996	11,400	10,540	-860
1997	9,600	9,242	-358
1998	10,000	8,846	-1,154
1999	11,500	11,990	+490
2000	10,100	10,131	+31
2001	8,900	8,564	-336
2002	10,500	10,806	+306
2003	10,900	9,141	-1,759
2004	11,000	---	---
