

# 1995 California Walnut Objective Measurement Survey Results

Released: September 1, 1995  
12:00 NOON PDT

CALIFORNIA AGRICULTURAL STATISTICS SERVICE

## WALNUT PRODUCTION FORECAST

The 1995 California walnut production forecast is 220,000 tons, down 5 percent from 1994's production of 232,000 tons. This is down 10 percent from the July forecast. The July forecast was based on subjective information provided by growers, while the September forecast is based on the Walnut Objective Measurement Survey. The Objective Measurement Survey was conducted July 24 through August 17, 1995.

The 1995 Objective Measurement Survey utilized a total of 647 blocks with two sample trees per block. The survey data indicated an average number of nuts per tree of 1,777, nearly unchanged from 1994's average of 1,773. The Hartley nut set was up 16 percent; the Franquette, down 16 percent; and the Serr, down 15 percent. The percent of sound kernels in-shell was 93.1 percent Statewide. The in-shell weight per nut was 20.8 grams, while the average in-shell suture measurement was 31.7 millimeters. The average length in-shell was 39.2 millimeters.

Estimated nut sets, sizing measurements, average number of trees per acre, and estimated bearing acreage were used in the regression formulas.

## SURVEY HISTORY

The Walnut Objective Measurement Survey began in 1958 to fulfill industry needs for an accurate walnut production forecast prior to harvest. The original sample was chosen proportionally to county and variety of bearing acreage. With each succeeding year, additions and deletions have been made in the sample to adjust for acreage removed, new bearing acreage and refusals.

## SAMPLING PROCEDURES

Once a block is randomly selected and permission is granted, two trees are randomly selected. An accessible branch is chosen which is five to 15 percent of the total cross-sectional area of the primary limbs and reachable with a twelve-foot ladder. Measurements are made on the trunk, each primary, and each split leading to and including the accessible branch. The sample tree and accessible branch are marked by a single tag.

On the accessible branch, every first of five nuts is picked for use in size and grade determinations. If available, at least ten nuts are harvested from the accessible branch for this purpose.

The following measurements are made on nuts selected for sizing:

1. Weight of nut including hull.
2. Width of shell at suture.
3. Width of shell 90 degrees to suture line (cross-suture).
4. Length of shell.
5. Kernel grade.
6. Weight of nut in-shell.

## ACREAGE

Estimated bearing acreage for 1995 is 170,000 acres. The acreage table 2 is a county summary of the data published in the 1994 California Walnut Acreage Survey release.

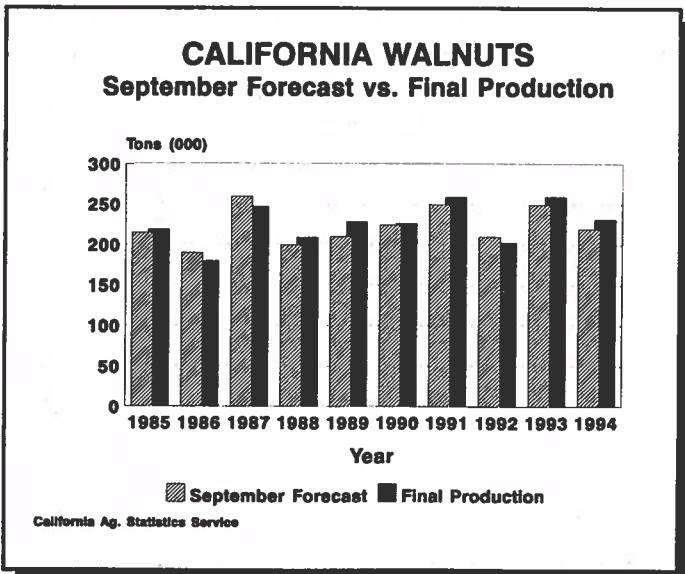

TABLE 1 -- California English Walnut Acreage, Production, Price And Value In-Shell

Year	Bearing Acres a/	Total Production	Per Bearing Acre	Price Per Ton	Total Value
-- Tons --					
1985	179,000	219,000	1.22	798.00	174,762,000
1986	180,000	180,000	1.00	1,080.00	194,400,000
1987	176,000	247,000	1.40	984.00	243,048,000
1988	177,000	209,000	1.18	922.00	192,698,000
1989	179,000	229,000	1.28	1,070.00	245,030,000
1990	181,000	227,000	1.25	1,040.00	236,080,000
1991	181,000	259,000	1.43	1,060.00	274,540,000
1992	178,000	203,000	1.14	1,410.00	286,230,000
1993	176,000	260,000	1.48	1,390.00	361,400,000
1994 b/	171,000	232,000	1.36	1,030.00	238,960,000
1995	170,000	220,000	1.29	7/96	7/96

a/ Eight years and older for the Blackmer, Carmelo, Concord, Franquette, Grove, Mayette, Placentia, Poe, and Pride of Ventura varieties, 6 years and older for the Amigo, Ashley, Chandler, Gustine, Howard, Lompoc, Midland, Payne, Pedro, Serr, Sunland, Tehama, Trinta, Vina, Westside, and 4946 varieties, 5 years and older for the Chico and Marchetti varieties, and 7 years and older for all other varieties.

b/ Price Per Ton and Total Value are July 1, 1995 preliminary figures.

TABLE 2 -- Walnut Acreage By County As Of 1994

County	Bearing	Non-Bearing	Total

1/ Coast includes: Alameda, Contra Costa, Lake, Monterey, Napa, San Benito, San Luis Obispo, Santa Clara, and Sonoma counties.

2/ Sacramento Valley includes: Butte, Colusa, El Dorado, Glenn, Placer, Sacramento, Shasta, Solano, Sutter, Tehama, Yolo, and Yuba counties.

3/ San Joaquin Valley includes: Fresno, Kern, Kings, Madera, Merced, San Joaquin, Stanislaus, and Tulare counties.

4/ District and State averages are derived by weighting county averages by county bearing acreage figures.
