John T. Salazar, Commissioner

John Hickenlooper,
Governor

August 2011

Dear Friends,

I am pleased to introduce the 2011 Colorado Agricultural Statistics publication. As a lifelong farmer, I understand the importance of solid, comprehensive statistics to help make decisions that affect the development of your operation.

The Colorado Agricultural Statistics Services (CASS) provides the most thorough figures for Colorado agriculture. As you peruse these pages, please take special note of the contribution agriculture provides to the economy of our state.

As a \$20 billion industry, Colorado's ag industry provides a safe, abundant food supply while generating economic activity that is vital to this state's vitality. Tracking this important information is important, not only in showing the value of our industry, but to assist in making informed decisions that will shape the future of Colorado agriculture.

The Colorado Department of Agriculture is dedicated to promoting agriculture on the local, state, national, and global level and consider these statistics a valuable resource in that effort.

I would like to thank CASS and all of the farmers and ranchers who make this book possible.

Sincerely,

A handwritten signature in black ink that reads "John T. Salazar". The signature is written in a cursive style with a large, prominent "J" and "S".

John T. Salazar
Commissioner

The Colorado Agricultural Statistics publication is compiled by the Colorado Agricultural Statistics Service, which is an agency within the U.S. Department of Agriculture, in cooperation with the Colorado Department of Agriculture.

United States Department of Agriculture
National Agricultural Statistics Service

August 2011

Dear Friends of Agriculture:

Colorado truly has a lot to offer to the agricultural industry with its forward thinking producers and leaders managing the land that, through its rich soil and available water, can produce such a diverse variety of crops and provide the needed resources for its livestock and dairy industries.

Decisions made by producers and leaders in agriculture are only as good as the information available when making them. Therefore, I am pleased to present the 2011 Colorado Agricultural Statistics Bulletin made available through the Colorado Field Office of the USDA's National Agricultural Statistics Service in cooperation with the Colorado Department of Agriculture. Much of the information used for decision making in agriculture is included in this bulletin. In it you will find acreage, production, and economic data from 2010 and previous years for Colorado at the state and county level.

I want to thank the farmers and ranchers for taking time out of their busy schedules to provide the data needed to produce these statistics. I also want to thank the all the agribusiness, extension educators and the USDA's Farm Service Agency for contributing information for this bulletin and providing support for our programs.

This report would not be possible without the dedicated effort of field and telephone interviewers who collect this data. Also, thanks to the Colorado Field Office staff for the many hours involved in producing this bulletin. Thanks to Colorado Department of Agriculture 2010 photo contest winner, Gary Rich of Aurora, CO for the cover photography. And finally, a special thanks to the Colorado Department of Agriculture for covering the costs of printing this bulletin.

Sincerely,

A handwritten signature in black ink, appearing to read "William Meyer".

COLORADO

The Centennial State, admitted to the Union in 1876, is the eighth largest state in area and has the highest average elevation. The highest point is at Mount Elbert, 14,433 feet above sea level, one of the 53 "fourteeners" rising above 14,000 feet. The lowest elevation is 3,350 feet in extreme eastern Prowers County.

Approximate Land Area: 66.3 Million Acres *
 Approximate Cropland Area: 11.5 Million Acres *
 Approximate Irrigated Area: 2.6 Million Acres *
 Number of Farms and Ranches (2010): 36,100
 Average Size of Farm and Ranch (2010): 864 Acres

Farms by Type *

81.4% Individual

PRICES RECEIVED BY FARMERS

Prices received by farmers and ranchers provide a basis for calculating the income from the Agricultural Sector as part of the National Income Accounts. These data are also extensively used to analyze past and current marketing patterns and to make current and future marketing decisions. Prices received for major farm commodities are used in computing the Index of Prices Received by Farmers, an important indicator of the economic environment of the nation's agricultural producers.

Marketing year average prices, by commodity, Colorado, 2002-2010

Commodity	Price per unit ^{1/}									
	Unit	2002	2003	2004	2005	2006	2007	2008	2009	2010
Wheat, all	Bu.	3.63	3.32	3.25	3.43	4.54	6.01	6.62	4.57	5.60
