¹ Does not include woody ornamentals, trees, shrubs, and sod.

² Value of all crops grown with sales of \$10,000 or more, combines the wholesale value of sales as reported by operations with \$100,000 or more and an estimated value for operations with sales between \$10,000 and \$99,000. This is derived by multiplying the number of producers in each range of sales by the mid-point of the sales range.

¹ Honey producing colonies are the maximum number of colonies from which honey was taken during the year. It is possible to take honey from colonies which did not survive the entire year.

³ Value of production is equal to production multiplied by average price per pound.

⁴ Stocks held by producers.

² Average price per pound based on expanded sales.

Aquaculture

Florida aquaculture producers reported sales in 2012 of \$69 million based upon a survey conducted for the Florida Department of Agriculture and Consumer Services, Division of Aquaculture. This survey was administered by the Florida Agricultural Statistics Service.

Reported sales in 2012 were above those of \$66 million reported in 2005, the last time this survey was conducted. There were 686 operations that reported being in business during 2012; of those, 404 operations reported appreciable sales. The operations without sales reflect either new operations which have not yet sold a product or operations in business that did not market any product in 2012.

Florida aquaculturists produced animals or plants for ornamental, food or miscellaneous markets. Ornamental sales totaled \$35.5 million and consisted of freshwater or marine animals and plants that included freshwater fish, crayfish or marine fish, corals, live rock, snails, and shrimp sold to the aquarium or water garden markets. Sales of aquaculture products for human consumption totaled \$24.1 million and included freshwater or marine fish, clams, oysters, shrimp, prawns, alligators, and turtles.

AGRICULTURAL STATISTICS & OTHER INFORMATION

Internet

NASS national & State reports and data are available on the world wide web, the Internet.

National Homepage

<http://www.nass.usda.gov>

The national homepage has links to all agency products and services such as publications, graphics, historic data, State information, statistical research, Census of Agriculture, a search engine and a Published Estimates Data Base to query and download State or county historic data. There are also links to our Customer Service unit, a Kids Page, and all other federal statistics outside the National Agricultural Statistics Service.

For a monthly summary of USDA estimates, forecasts and projections of commodities, prices, trade issues, and world crop developments, see:

<http://www.nass.usda.gov/Publications>

Florida Homepage

<http://www.nass.usda.gov/fl>

The Florida web site offers much of the same information as the national homepage but in a format designed for Florida customers. The reports contain the same statistics but offer more details about agriculture in Florida. Links are also available to other sites such as the Florida Department of Agriculture, University of Florida and other NASS field offices.

Printer Reports & Computer Format

All NASS reports are still printed on paper. Census reports are only available while supplies last; contact the Florida office for a copy. NASS also offers a wide variety of data on CD-ROM with national, State, and county statistics. Most of these products are in MS Excel spreadsheet format or comma separated (CSV) files.

A listing of all paper reports and computer products can be found in the Products & Services catalog issued every December. To order a free Products & Services catalog or purchase paper reports or CD-ROMs, call:

E-Mail Subscriptions

Free e-mail subscriptions are available via automated mailing lists for National and State reports. You can subscribe to individual reports and they will be sent directly to your e-mail address soon after the official release time.

National, State and News Reports via E-mail

National reports contain statistics from all states and are the most timely source of data.

State reports are distributed after national reports but they usually contain more local information. For more information, see:
