Hawaii Aquaculture

FREQUENCY: Annual

RELEASE: October 18, 2002

HAWAII AQUACULTURE HARVESTS REMAIN UNCHANGED

The value of Hawaii grown aquaculture totaled \$22.2 million in 2001, unchanged from 2000. Algae and finfish experienced an increase in value from the previous year. In 2001, the value of algae, \$9.7 million, accounted for 44 percent of the harvest, followed by shellfish, \$7.5 million, with 33 percent. The 'other' category, which includes ornamentals, seed stock, brood stock, and others was valued at \$2.6 million, 12 percent of the total. Finfish rose 4 percent to \$2.4 million and comprised the remaining 11 percent. Hawaii county countined to lead the State in aquaculture sales with \$16.2 million, or 73 percent of the total. Kauai county also experienced an increase in sales from the previous year. The ranking of other counties in order of value were Honolulu, Kauai, and Maui. Some producers noted the September 11th crisis slowed sales of local and exported products.
