Above Average Temperatures for Central Idaho

There were 2.9 days suitable for fieldwork in Idaho, down from 4.2 days reported the previous week. Idaho experienced average to above average temperatures for the week. Producers continued to harvest corn, and the sugarbeet harvest was nearly completed.

Wet Week in Oregon

There were 5.5 days suitable for fieldwork in Oregon, up from 5.2 days reported the previous week. Temperatures were mild, with rain reported throughout the State. In Columbia, Multnomah, and Washington Counties, temperatures were mild, and conditions were wet. Clatsop and Tillamook Counties reported rain made field work difficult. Field germination of forage was slow. Field applications were made in accordance with needs. Umatilla County reported winter wheat stands were doing well, with the stand population in favorable conditions. Malheur County reported the completion of sugarbeet harvest with scattered showers. Some of the corn fields were yet to be harvested. Winter wheat continued to germinate in fair temperatures.

Wet Weather in Washington

There were 3.6 days suitable for fieldwork in Washington, down from 4.1 days reported the previous week. Western Washington saw weekend rainstorms, which left fields a muddy mess. Producers were not able to do much in the fields. Central Washington also experienced showers. In Yakima County, there has been little crop growth, with the temperatures staying above freezing. Cattle grazed, but with supplemental hay. Fall seeded crops looked good. Northeast Washington fall seeded crops were coming in well. Not much other field work was getting done. East Central and Southeast Washington completed fall planting and needed more moisture.

Soil Moisture Condition — Idaho, Oregon, and Washington: Week Ending 11/12/23

Item and State	Very short	Short	Adequate	Surplus
	(percent)	(percent)	(percent)	(percent)
