~ ~ ~ About the Cover ~ ~ ~

“Surveying the Field” was taken by thirteen year old Tyson Rowe from Auburn, Indiana. Tyson was watching his dad through a drain pipe when he captured the picture. He likes to take pictures of ordinary things in a unique way for 4-H. Tyson has been in 4-H for four years.

The photograph on the back cover was taken by ten year old Addison Hill from Greenfield, Indiana. Addison had been walking her pig every morning and night for a month to prepare for the fair. She happened to have her camera when she captured this picture of her pig, McKenna. Addison has been in 4-H for two years.

We extend a special thanks to the farmers, agri-businesses, extension officials and others who voluntarily provided basic data used to prepare the statistics presented in this publication and to the corps of enumerators who so faithfully collected much of our raw data.

We would also like to thank all of the 4-H photography members that submitted pictures for use in our publication. All of the photos were included on posters displayed at the 2013 Indiana State Fair.

Jay Akridge,
Glenn W. Sample Dean of Agriculture

This information is very important, but just as important are the people. We take this opportunity to thank the following for helping provide this valuable resource to the farmers of Indiana.

Greg Matli State Statistician

In this 2013-2014 annual issue of the “Indiana Agricultural Statistics” publication you will find information about Indiana’s entire agricultural industry. This is the 88th edition and is published by the cooperative efforts of Purdue University and USDA’s National Agricultural Statistics Service. This Publication is the first publication released under the new re-organization structure of NASS. I think you will be pleased to see that this publication is of the same quality that you are accustomed to seeing here in Indiana. Our goal at NASS is to make sure the public we serve is not affected by the changes we endured during this past year. I think this publication is proof of that commitment.

We are again pleased to feature the photography talents of 19 individual 4-H members within Indiana’s 2013-2014 Agricultural Statistics Annual Summary. These photographs, exhibited at the 2013 Indiana State Fair, provide a glimpse of Indiana’s agriculture from future farmers’ perspective. We are grateful to all of the 4-H members who submitted their photos for publication

This publication satisfies the growing need for accurate, reliable and unbiased information and data. The data is collected from Indiana Farmers, agricultural businesses, USDA Farm Service Agency County Staff, Purdue University County Extension Staff, NASDA Enumerators and others that make this Publication possible.

This data is used to provide facts to decision makers that determine the future of Indiana's agricultural industry. The goal for this publication remains unchanged. It is to provide the public with data to help them understand the current situation of Indiana’s farming community and future opportunities. While we strive to exceed this goal the Indiana Field Office of USDA's National Agricultural Statistics Service assures that all individual reports and business data are held in the strictest confidence. We take every action possible to protect your data.

Indiana agriculture continues to be a growing segment of the State’s economy, with Indiana ranked in the top ten nationally for farm receipts. Hoosier farmers should take pride in the fact that even with adverse weather conditions, rising production expenses and prices, Indiana agriculture continues to thrive. Indiana continues to rank near the top nationally in the production of corn, soybeans, popcorn, blueberries, peppermint, spearmint, processing tomatoes, fresh market melons, and vegetables for processing. Indiana livestock producers put our state’s rank at the top for hogs, chickens, eggs, and turkeys.

This Federal/University cooperative effort has existed since 1925 and continues to enhance the opportunity for agricultural research programs for State specific statistical projects in support of agricultural researchers and decision makers. Some of those projects include Agronomic Survey of Indiana Corn and Soybean Growers, Plant Disease and Fungicide Use Survey, and Timber Price Survey. Results of these special research efforts are published by the individual research programs. Results from these special surveys are not a part of this publication but please feel free to contact us for reference to those researchers for additional information.

Thank you for the opportunity to serve the agricultural community, with your help, in providing timely, accurate, and unbiased data. Please let us know your comments and suggestions.

Sincerely,

Greg Matli
State Statistician

¹ Places with annual sales of agricultural products of \$1,000 or more.

FARM INCOME

CASH RECEIPTS

Indiana farmers received \$12.1 billion in cash receipts from farm marketings in 2012, 3 percent above 2011. Cash receipts from crops were up 2 percent, and receipts for livestock were 5 percent above the previous year. Marketings of crops at \$8.57 billion, accounted for 71.1 percent of the total cash receipts in 2012 while livestock receipts, at \$3.48 billion, accounted for the remaining 28.9 percent. In the previous year crop receipts accounted for 71.9 percent and livestock 28.1 percent of total cash receipts.

Corn was the leading source of income for Indiana farmers in 2012 and amounted to \$4.75 billion. Soybeans were second at \$3.22 billion and meat animals were third with \$1.57 billion. Poultry and Eggs remained as the fourth leading contributor with \$1.16 billion and Dairy follows with \$709 million. These five commodity groups accounted for almost 95 percent of the 2012 cash receipts.

2012 Indiana Cash Receipts

¹ Includes fruits and nuts, and other miscellaneous crops.

¹ Value of Agricultural sector production is the gross value of the commodities and services produced within a year. Net value-added is the sector's contribution to the National economy and is the sum of the income from production earned by all factors-of-production, regardless of ownership. Net farm income is the farm operators' share of income from the sector's production activities. The concept presented is consistent with that employed by the Organization for Economic Cooperation and Development.

² A positive value of inventory change represents current-year production not sold by December 31. A negative value is an offset to production from prior years included in current-year sales.

Net Farm Income	3,127,392	2,317,025	2,291,834	3,816,381	3,290,744

¹ Value of Agricultural sector production is the gross value of the commodities and services produced within a year. Net value-added is the sector's contribution to the National economy and is the sum of the income from production earned by all factors-of-production, regardless of ownership. Net farm income is the farm operators' share of income from the sector's production activities. The concept presented is consistent with that employed by the Organization for Economic Cooperation and Development.

U.S. GOVERNMENT PAYMENTS BY PROGRAM, INDIANA, 2008-2012 ¹

Program	2008	2009	2010	2011	2012
Thousand Dollars					
Direct Payments ²	228,437	213,253	213,977	210,287	212,023
Average Crop Revenue Election (ACRE payment)	---	---	3,104	577	6
Counter-cyclical Program Payments	21	5	3	---	---
Loan Deficiency Payments	295	11	14	7	0
Milk Income Loss Payments ³	4	13,784	781	4	7,377
Tobacco Transition Payments ⁴	7,296	6,640	5,454	5,433	5,435
Conservation ⁵	64,411	61,739	69,953	77,439	79,211
Supplemental Funding ⁶	21,478	8,943	79,193	6,713	18,912
Miscellaneous ⁷	(56)	(38)	7	2	0
Total	321,887	304,337	372,486	300,460	322,962

¹ Amounts include only cash payments made directly to farmers.

² Direct Payments include direct payments from both sources: the Direct Counter cyclical Program and the Average Crop Revenue Election Program.

³ Program authorized by the Farm Security and Rural Investment Act of 2002.

⁴ Payment includes both the CCC payments to quota holders and producers and the third party payments to quota holders and producers who opted for the lump sum payment option.

⁵ Includes amount paid under Conservation Reserve, Agriculture Conservation, Emergency Conservation, and Great Plains Program.

⁶ Ad Hoc and emergency programs provided by the Agricultural Risk Protection Act of 2000, Agriculture, Rural Development, Food and Drug Administration, and Related Agencies Appropriations Act 2001 and Agricultural Economic Assistance Act 2001. Some of these programs include; Crop Disaster Program, Dairy Disaster Assistance Program, Livestock Emergency Assistance program, Quality Losses Program, and Tobacco Disaster Assistance Program

⁷ Miscellaneous Programs include; Forestry Incentive Annual, Dairy Indemnity, Interest Payments, Disaster Program Payments, Payment Limitation Refund, Noninsured Assistance, Disaster Reserve, and Environment Quality Incentives.

Soybean Meal	193.6	258.4	283.5	288.6	263.9	347.0
Vegetable Oils	203.0	282.4	233.8	296.2	298.0	294.8
Planting Seeds	5.8	7.1	7.5	7.4	8.2	7.5
Other Products ³	152.0	183.8	174.5	189.9	238.7	235.8
Total Agricultural Exports	3,090.6	4,120.4	3,629.5	4,101.0	4,717.5	4,780.3

¹ While a State's actual agricultural export value cannot be measured directly, ERS has developed methods that provide indirect estimates of exports using State export shares. Data is provided using a calendar year series of export estimates based on U.S. farm cash receipts.

² Methodology for dairy revised starting in 2007 to estimate shares based on state production of cheese, butter, dry whey, ice cream, and sherbet.

³ Includes live animals, other meats, animal parts, eggs, wine, beer, other beverages, coffee, cocoa, hops, nursery crops, inedible materials, and prepared foods.

Data Sources: USDA Economic Research Service; USDA Foreign Agricultural Service (Global Agricultural Trade System).

The above estimates of Growing Degree Days (GDD) Normals are derived from normal temperatures (1971-2000) at mid-month and the corresponding GDD. For example, a weekly average temperature of 60°F resulted in 84 GDD. The basic formula is: $1/2 (\max T - 50) + 1/2 (\min T - 50) = \text{GDD for one day}$. The maximum temperature is not allowed to exceed 86 degrees F. Negative units are not accumulated.

CROP HIGHLIGHTS

ACREAGE: Indiana's five major field crops totaled slightly over 12.1 million acres for harvest during 2013, up slightly from 2012. Corn acreage for harvest was down by 3 percent from a year ago, while soybean acreage for harvest was up 1 percent. Winter wheat harvested acreage was up 53 percent from a year ago, and all hay harvested acreage was up 14 percent from the 2012 level. Oat acreage for harvest doubled from 2012. Other crops showing harvested acreage changes were tomatoes for fresh market, up 29 percent while tomatoes for processing acreage was down 3 percent. Sweet corn acreage for harvest increased 10 percent, and watermelon harvested acreage increased 10 percent from 2012. In addition, cucumbers for processing increased 90 percent from 2012, and cantaloupes for fresh market decreased 5 percent.

YIELDS: Row crop planting started out sluggish in 2013 thanks to an unusually wet April and late-month snows that shut down the majority of field activity. With a state average of 6.45 inches of precipitation, the month proved to be the 7th wettest April on record in Indiana. By May 5, only 8% of corn had been planted vs. a five-year average of 41%, and soybeans had not even begun to be put in the ground. May panned out to be a warm and dry month, much to the delight of farmers. Spotty rainfalls in the first half of the month gave way to several weeks of good clear weather in late May so that by May 26, planting progress in corn and soybeans had surged ahead of the five year average to end at 86% and 60%, respectively. June thankfully did not put on a repeat performance of last year's temperature extremes and widespread drought: temperatures averaged only 71.1° F through the month, and rains were plentiful, with a surplus of 2.08 inches above normal for the month. Planting for both corn and soybeans had concluded by month's end, and wheat heading rapidly progressed during the month to conclude to on June 23. Generous rains allowed condition ratings for corn and soybeans to swell to 79 and 74 percent good to excellent by June 30, respectively. July was overall cool and dry, though a heat wave in the third week allowed abnormally dry conditions to resurface in a handful of east central Indiana counties. Corn and soybeans progressed on schedule through most of the month, with corn 82% silked and soybeans 72% blooming by July 28. The weather was perfect for winter wheat harvest, with percent harvested shooting from 32 percent on July 7 to 100 percent by July 28. August proved to be warm and exceedingly dry – at a state average deficit on 1.94 inches below normal, it ranks as the 3rd driest August on record. The dry spell came just as row crops had begun to fill, causing some worry among farmers with what had been to that point an exemplary crop. Crop condition ratings fell through the month and into September as a consequence, though still remained over 50% good to excellent for both corn and soybeans even at their lowest points. Thankfully, mid-September brought an end to the dryness, with significant storms in the third week bringing relief to much of the state's crops. The corn and soybean harvest kicked off about the same time, progressing slowly through a damp October and hurrying to an on-schedule

finish by November 17, just in time for the first major snows of the season on November 12 and November 26.

The average yield for corn in 2013 was 177 bushels per acre, 78 bushels above the 2012 yield. Soybeans yielded 51.0 bushels per acre, 7.0 bushels above 2012. The average yield for winter wheat, at 73 bushels per acre, was 6 bushels above the previous year's yield of 67 bushels per acre. The average oat yield of 71 bushels per acre was up 1 bushel from the previous year's yield of 70 bushels per acre. All hay yield of 2.80 tons per acre was up .44 ton from the 2012 yield of 2.36 tons per acre. Popcorn averaged 4,600 pounds per acre, up 1,600 pounds from the previous year's yield.

PRODUCTION: Corn produced during 2013 totaled 1.04 billion bushels, 72 percent above the 2012 level of 597.0 million bushels. Soybean production was 267.3 million bushels, 19 percent above the 225.3 million bushels produced a year earlier. Winter wheat production increased 66 percent from a year earlier, to 31.8 million bushels. Popcorn production totaled 372.6 million pounds, 46 percent above the 2012 level. Oat production of 710 thousand bushels was 103 percent above the 350 thousand bushels produced in 2012. All hay production, at 1.79 million tons, was up 35 percent from the previous year. Peppermint production of 425 thousand pounds decreased 17 percent while spearmint production of 263 thousand pounds increased 17 percent from 2012. Blueberry production totaled 3.2 million pounds, 113 percent increase from the previous year.

BIOTECHNOLOGY VARIETIES

The National Agricultural Statistics Service conducts the June Agricultural Survey in all States each year. Randomly selected farmers across Indiana are asked if they planted corn or soybean seeds that, through biotechnology, are resistant to herbicides, insects, or both. Conventionally bred herbicide resistant varieties were excluded. Insect resistant varieties include only those containing bacillus thuringiensis (Bt). Stacked gene varieties include those containing biotech traits for both herbicide and insect resistance.

LIVESTOCK PRODUCTION COSTS

LIVESTOCK HIGHLIGHTS

HOG AND PIG numbers (December 1, 2013), at 3.65 million, were down 4 percent from a year earlier. The average value per head increased from \$115.00 in 2012 to \$140.00 in 2013. This raised the total inventory value to \$525.0 million, 20 percent above a year ago. Indiana remained in fifth place in the nation for the number of hogs on hand December 1, 2013.

CATTLE inventory numbers, at 870,000, were up 7 percent from January 1, 2013 while value per head, at \$1,100 was \$70 above the previous year. Total cattle inventory value, at \$957.0 million, increased 15 percent from the \$834.3 million last year. Cows and heifers that have calved totaled 370,000 head, up 1 percent from a year earlier. Of this total, 192,000 were beef cows, up 1 percent; and 178,000 were milk cows, up 2 percent from the previous year.

Total **SHEEP** inventory, at 50,000 head for January 1, 2014, was down 9 from a year earlier. Breeding sheep totaled 43,000 head. Average value per head at \$234.00, was up \$6.00 from 2013. Total inventory value at \$11.7 million was 7 percent below the previous year.

Total **CHICKEN** inventory, excluding broilers, on December 1, 2013, at 35.6 million birds, was up 4 percent from last year. With this inventory, Indiana held on to third place in the nation for total chickens, excluding broilers, and moved to third position for layers (27.3 million). The total value of the chicken inventory was \$74.8 million, up 4 percent from 2012. The value per bird, at \$2.10 was unchanged from the previous year.

¹ NASS will no longer estimate numbers from survey data for Cattle County estimates. The new approach for setting livestock county numbers, termed "raking", utilizes county level livestock information from the Census of Agriculture, administrative data and current year state-level Agricultural Statistics Board (ASB) inventory and production estimates. To provide the data user with a consistent data series, NASS has established county numbers using the raking approach for commodities beginning with data from the 2007 Census. For cattle, this new methodology was implemented with the 2008 numbers. These new data items are available in both Quick Stats 1.0 and Quick Stats 2.0 databases. Previously established estimates for these years have been removed from all versions of Quick Stats. District level estimates will no longer be published for Cattle. This is consistent with the Census of Agriculture. For more information about this new methodology, go to http://www.nass.usda.gov/Data_and_Statistics/County_Data_Files/Livestock_County_Estimates/index.asp

² Published in Other Counties.

COUNTY HIGHLIGHTS

Planted acreage for hay is represented by three dashes because this category is not estimated, planted acreage and yield for popcorn are represented by three dashes because these categories are not surveyed; in all other places the three dashes represent zero for that county. An asterisk signifies that the county has data for this item, but it cannot be disclosed for confidentiality purposes. The 2012 Chicken data from Census includes only layers twenty weeks old and older.

Below is a list of comparable items at the state level.

2013 Census Population	6,570,902	2011 Cash Receipts	\$12,320,006,000

CUSTOMER SERVICE

REPORTS AND DATA FROM USDA'S NATIONAL AGRICULTURAL STATISTICS SERVICE (NASS)

Internet:

Reports and data from NASS as well as the Indiana Field Office are available on the internet.

For access, choose from the following:

NASS

<http://www.nass.usda.gov/>

Today's reports will be listed on the screen. To select from other reports, click on the **More** button next to "Today's Reports from NASS". You will then be redirected to another screen to make your selections.

Indiana Field Office

http://www.nass.usda.gov/Statistics_by_State/Indiana/

Publications pertaining to data specific to Indiana can be accessed from our Home page listed above. For a list of available reports, click on **Indiana Publications**, or choose from the drop down menu below "Indiana Publications", and then click on the yellow **go** button.

Data for other States can be accessed by choosing the desired State under the **Statistics by State** button on the bottom left side of the screen.

NASS Subject Specialists:

NASS maintains a listing of subject and commodity specialists for the various program areas. From the NASS Home page, click on **Publications**, then select **Contact a Specialist** in the **I Want To....** box on the right hand side of the screen.

NASS Customer Service:

NASS operates an information center, staffed 7:30 a.m. to 4:00 p.m. ET Monday-Friday, to assist you with accessing reports and data via the Internet, or obtaining printed copies.

Please call **1-800-727-9540**.

Quick Stats Tools:

Historical County, State, and U.S. information is available on the Internet **FREE OF CHARGE**. The database uses custom extracts based on commodity, year, State, and other selection criteria to produce an output file compatible for updating databases and/or spreadsheets. The database can be accessed from the NASS Home page shown above, or any State Field Office Home page. Just click on the **Quick Stats** button and follow the instructions. Searches for U.S. and State, State and County, and the Census of Agriculture data can be queried from here.

Search Commodity Data by Keyword (Hint)

Quick Stats Lite (Beta)

Introducing our new, guided interface to the Quick Stats 2.0 database! It is designed to provide a more structured approach to help users get commonly requested statistics from our online database.

We are making further improvements to Quick Stats Lite which will be rolled out periodically over the next few months. Planned changes are: more commodities and views, enhancements to the results section, and usability features to help you easily change your selections or link you to the Quick Stats 2.0 interface which offers additional functionality. We would like to hear back from you about your experiences with this new tool as well as any suggestions for further improvements. [Please click here to provide feedback.](#)

Quick Stats 2.0

Quick Stats 2.0 is the most comprehensive tool for accessing agricultural data published by NASS. It allows you to discover exactly the information you desire, whether it is based on commodity, location, or time period. You can then visualize the data on a map, manipulate and export the results, or save a link for future use.

Data By Subject

Obtain an agricultural statistics profile for a particular subject area or commodity. Data is currently available in the following areas:

- Crops and Plants
- Economics
- Livestock and Animals

Pre-Defined Queries

Listing of requested queries that have been developed for your convenience based on their timeliness and user feedback.

E-Mail Delivery Of Reports
What is this service?
Our electronic mailing list provides quick and timely access to the agricultural and economic estimates that are available in the reports section of this system. Through this service, you will receive the reports of your choice within three hours of their publication via email. Please note that delivery time may take longer depending on factors such as network speed and congestion.
