~ ~ ~ About the Cover ~ ~ ~

"Wheat" was taken by seventeen-year-old Alaina Weaver from Roann, Indiana and appears on the front cover. Alaina is a nine-year 4-H member. She has enjoyed the photography project and says, "the competition and personal improvement motivates me". She was able to capture this photo when the sun came out after a light shower.

The photograph on the back cover, "Matilda Jane", was taken by thirteen-year-old Eden Wehner from Madison, Indiana. She is a five-year member of 4-H. She developed a love for taking pictures because of her mom. Eden took this picture on a frosty morning while Matilda had frost tipped hair.

We extend a special thanks to the farmers, agri-businesses, extension officials and others who voluntarily provided basic data used to prepare the statistics presented in this publication and to the corps of enumerators who so faithfully collected much of our raw data.

We would also like to thank all the 4-H photography members that submitted pictures for use in our publication. All the photos were displayed virtually through a special portal for the 2020 Indiana State Fair.

Karen Plaut, Glenn W. Sample Dean of Agriculture

This information is very important, but just as important are the people. We take this opportunity to thank the following for helping provide this valuable resource to the farmers of Indiana.

Nathanial Warenski State Statistician

In this 2020-2021 annual issue of the "Indiana Agricultural Statistics" publication you will find information about Indiana's entire agricultural industry. This is the 95th edition and is published by the cooperative efforts of Purdue University and USDA's National Agricultural Statistics Service. This year's edition will be the seventh edition that will be published and available from a free mobile app created by Purdue University. The app is available for Apple iPhone, iPad and iPod touch as well as Android users. It can be obtained through iTunes, Google Play and Amazon. Links to those sites where the app can be downloaded are in Purdue Extension's The Education Store or use the Quick Response Code (QRC) located on page 132 in this book.

We are again pleased to feature the photography talents of 12 individual 4-H members within Indiana's 2020-2021 Agricultural Statistics Annual Summary. These photographs, exhibited virtually at the 2020 Indiana State Fair, provide a glimpse of Indiana's agriculture from future farmers' perspective. We are grateful to all of the 4-H members who submitted their photos for publication.

The 2022 Census of Agriculture is coming up soon. We ask that you ensure your farm is counted by visiting https://www.agcounts.usda.gov/static/get-counted.html. The data in this publication is collected from Indiana Farmers, agricultural businesses, USDA Farm Service Agency County Staff, Purdue University County Extension Staff, NASDA Enumerators and others that make this Publication possible.

This data is used to provide facts to decision makers that determine the future of Indiana's agricultural industry. The goal for this publication remains unchanged. It is to provide the public with data to help them understand the current situation of Indiana's farming community and future opportunities. While we strive to exceed this goal the Indiana Field Office of USDA's National Agricultural Statistics Service assures that all individual reports and business data are held in the strictest confidence. We take every action possible to protect your data.

Indiana agriculture continues to be a growing segment of the State's economy, with Indiana ranked in the top ten nationally for farm receipts. Hoosier farmers should take pride in the fact that even with adverse weather conditions, rising production expenses and prices, Indiana agriculture continues to thrive. Indiana continues to rank near the top nationally in the production of corn, soybeans, popcorn, blueberries, peppermint, spearmint, processing tomatoes, fresh market melons, and vegetables for processing. Indiana livestock producers put our state's rank at the top for hogs, chickens, eggs, and turkeys.

This Federal/University cooperative effort has existed since 1925 and continues to enhance the opportunity for agricultural research programs for State specific statistical projects in support of agricultural researchers and decision makers. Some of those projects

include Agronomic Survey of Indiana Corn and Soybean Growers, Plant Disease and Fungicide Use Survey, and Timber Price Survey. Results of these special research efforts are published by the individual research programs. Results from these special surveys are not a part of this publication but please feel free to contact us for reference to those researchers for additional information.

Thank you for the opportunity to serve the agricultural community, with your help in providing timely, accurate, and unbiased data. Please let us know your comments and suggestions.

Sincerely,

Nathanial Warenski State Statistician USDA, NASS, Great Lakes Region - Serving Indiana, Michigan and Ohio

FARM INCOME

CASH RECEIPTS

Indiana farmers received \$10.3 billion in cash receipts from farm marketings in 2020, down 2 percent from 2019. Cash receipts from crops were down 2 percent, and receipts for livestock were also 2 percent below the previous year. Marketings of crops, at \$6.68 billion, accounted for 64.7 percent of the total cash receipts in 2020 while livestock receipts, at \$3.65 billion, accounted for the remaining 35.3 percent. In the previous year's revised totals, crop receipts accounted for 64.7 percent and livestock 35.3 percent of total cash receipts.

Corn was the leading source of income for Indiana farmers in 2020 and amounted to \$3.22 billion. Soybeans were second at \$2.88 billion and meat animals remained in third place with \$1.37 billion. Poultry and eggs were the fourth leading contributor with \$1.27 billion and Dairy follows with \$748 million. These five commodity groups accounted for almost 92 percent of the 2020 cash receipts.

¹ Includes fruits and nuts.

¹ Value of Agricultural sector production is the gross value of the commodities and services produced within a year. Net value-added is the sector's contribution to the National economy and is the sum of the income from production earned by all factors-of-production, regardless of ownership. Net farm income is the farm operators' share of income from the sector's production activities. The concept presented is consistent with that employed by the Organization for Economic Cooperation and Development.

Value of Agricultural sector production is the gross value of the commodities and services produced within a year. Net value-added is the sector's contribution to the National economy and is the sum of the income from production earned by all factors-of-production, regardless of ownership. Net farm income is the farm operators' share of income from the sector's production activities. The concept presented is consistent with that employed by the Organization for Economic Cooperation and Development.

Data as of September 2, 2021 Source: Economic Research Service

 $^{^{\}rm 2}$ Includes expenses associated with operator dwellings.

³ Includes federal and private crop and livestock insurance premiums as well as casualty, hail, motor vehicle, and all other insurance.

¹ Gross payments from the U.S. government to the farm sector

² Payments returned to the U.S. government by the farm sector

³ Accounting adjustments. A negative value indicates payments returned exceeded gross payments during the calendar year.

⁴ Includes Market Facilitation Program.

The above estimates of Growing Degree Days (GDD) Normals are derived from normal temperatures (1971-2000) at mid-month and the corresponding GDD. For example, a weekly average temperature of $60^{\circ}F$ resulted in 84 GDD. The basic formula is: 1/2 (max T -50) + 1/2 (min T -50) = GDD for one day. The maximum temperature is not allowed to exceed 86 degrees F. Negative units are not accumulated.

CROP HIGHLIGHTS

ACREAGE: Indiana's principal field crops totaled 11.8 million acres for harvest during 2020, 740 thousand acres more than 2019. Soybean harvested acreage at 5.68 million and corn harvested for grain acreage at 5.25 million were up 320 thousand and 430 thousand acres respectively from the previous year.

YIELDS: The 2020 spring planting season was exceptionally more favorable than the previous year. Cool temperatures and below average precipitation throughout April made ideal conditions for fieldwork and planting. By the end of the month, corn and soybean plantings were off to a quick start, ahead of the five-year average, though the cooler temperatures kept winter wheat progress slightly behind schedule.

The colder weather continued into May, with the average temperature for the first two weeks at only 51.8 degrees, 7.1 degrees below normal for the State. While planting progress was not hindered much by the cool weather, concerns of damage in winter wheat and early planted soybeans arose after frost events in the first half of the month. Heavy rains in the latter half of the month also raised concerns, but by the end of May, crop conditions remained favorable with 68% of corn and 69% of soybeans rated in good to excellent condition.

Warmer and drier weather took hold in June, allowing corn and soybean planting to mostly wrap up by the middle of the month, slightly ahead of schedule. Corn and soybean emergence also progressed ahead of schedule, with 94% of corn emerged by June 14, compared to the 86% five-year average. Drought concerns arose after the first three weeks of the month saw precipitation levels well below normal. However, significant rain events near the end of the month helped to replenish moisture levels. By the month's end, topsoil moisture levels were at 65% adequate to surplus, compared to 97% at the end of May.

July welcomed even more hot and dry weather, which aided winter wheat maturation and harvest progress, but again brought about drought concerns in corn and soybeans. The dry weather pushed winter wheat harvest ahead of schedule, with 96% of the crop harvested by July 19, compared to the five-year average of 89%. Sporadic and scattered rainfall in the first half of the month did little to maintain soil moisture, with topsoil and subsoil moisture levels reaching a low of 54% adequate to surplus by July 13. The hot and dry weather also slowed pasture growth and caused concern for heat stress in livestock.

Thankfully, timely rain events in the last two weeks of July helped to ward off drought concerns and improve crop conditions, with corn and soybeans reported at 67% and 68% good to excellent condition, respectively.

Throughout the remainder of the growing season, corn and soybean progress continued either in line or ahead of the five-year averages. By August 30, 63% of both corn and soybeans were rated in good to excellent condition, compared to 33% for both crops in 2019.

Dry conditions persisted throughout much of the fall, causing some instances of field fires as harvest progressed. Corn and soybean harvest progressed mostly on schedule, with only minor delays after much needed rain events in late-October. Soybean harvest wrapped up around mid-November, with corn harvest not far behind, both finishing slightly ahead of the five-year averages. The Indiana corn yield was 187 bushels per acre, while soybeans yielded 58 bushels per acre.

PRODUCTION: Indiana corn production in 2020 totaled 981.8 million bushels, 21 percent above 2019's total of 814.6 million bushels. Indiana's soybean production totaled 329.4 million bushels, up 21 percent from 2019's 273.4 million bushels. Indiana wheat production at 17.5 million bushels was up 9 percent. All hay production at, 1.28 million tons, was down 1 percent from the previous year.

BIOTECHNOLOGY VARIETIES

The National Agricultural Statistics Service conducts the June Agricultural Survey in all States each year. Randomly selected farmers across Indiana are asked if they planted corn or soybean seeds that, through biotechnology, are resistant to herbicides, insects, or both. Conventionally bred herbicide resistant varieties were excluded. Insect resistant varieties include only those containing bacillus thuringiensis (Bt). Stacked gene varieties include those containing biotech traits for both herbicide and insect resistance.

LIVESTOCK HIGHLIGHTS

HOG AND PIG numbers (December 1, 2020), at 4.45 million, were up 1 percent from a year earlier. The average value per head increased from \$102.00 in 2019 to \$106.00 in 2020. This raised the total inventory value to \$471.7 million, 5 percent above a year ago. Indiana remained in fifth place in the nation for the number of hogs on hand December 1, 2020.

CATTLE inventory numbers, at 850,000, were up 1 percent from January 1, 2021 and value per head increase to \$980 per head, up \$60.00 from the previous year. Total cattle inventory value, at \$833.0 million, increased 8 percent from the \$772.8 million last year. Cows and heifers that have calved totaled 385,000 head, up 4 percent from a year earlier. Of this total, 194,000 were beef cows, unchanged; and 191,000 were milk cows, up 9 percent from the previous year.

Total **SHEEP** inventory, at 60,000 head for January 1, 2021, was up 5 percent from a year earlier. Breeding sheep totaled 53,000 head. Average value per head at \$244.00, was up \$5.00 from 2020. Total inventory value at \$14.6 million was 6 percent above the previous year.

Total **CHICKEN** inventory, excluding broilers, on December 1, 2020, at 44.5 million birds, was down 2 percent from the previous year. With this inventory, Indiana moved to second place in the nation for total chickens, excluding broilers, and for layers (35.6 million). The total value of the chicken inventory was \$129.0 million, up 24 percent from 2019. The value per bird, at \$2.90 was up \$0.60 from the previous year.

¹ NASS will no longer estimate numbers from survey data for Cattle County estimates. The new approach for setting livestock county numbers, termed "raking", utilizes county level livestock information from the Census of Agriculture, administrative data and current year state-level Agricultural Statistics Board (ASB) inventory and production estimates. To provide the data user with a consistent data series, NASS has established county numbers using the raking approach for commodities beginning with data from the 2007 Census. For cattle, this new methodology was implemented with the 2008 numbers. These new data items are available in both Quick Stats 1.0 and Quick Stats 2.0 databases. Previously established estimates for these years have been removed from all versions of Quick Stats. District level estimates will no longer be published for Cattle. This is consistent with the Census of Agriculture. For more information about this new methodology, go to http://www.nass.usda.gov/Data_and_Statistics/County_Data_Files/Livestock_County_Estimates/index.asp

COUNTY HIGHLIGHTS

COUNTY HIGHLIGHTS

The following pages of county statistics represent the results of a survey of over 15,000 farm operators following the 2020 harvest season. In addition to these data are selected items of interest from the U.S. Population Census, 2017 Census of Agriculture, and 2019 Cash Receipts information from the Bureau of Economic Analysis. The County Highlights section summarizes the importance of agriculture to each and every Indiana County while comparing the magnitude of importance across counties.

Planted acreage for hay is represented by three dashes because this category is not estimated, planted acreage and yield for popcorn are represented by three dashes because these categories are not surveyed; in all other places the three dashes represent zero for that county. An asterisk signifies that the county has data for this item, but it cannot be disclosed for confidentiality purposes. The 2017 Chicken data from Census includes only layers twenty weeks old and older.

Below is a list of comparable items at the state level.

REPORTS AND DATA FROM USDA'S NATIONAL AGRICULTURAL STATISTICS SERVICE (NASS)

Internet:

Reports and data from NASS as well as the Indiana Field Office are available on the internet.

For access, choose from the following:

NASS

http://www.nass.usda.gov/

Today's reports will be listed on the screen. To select from other reports, click on the **View previous reports** link next to "Today's Reports". You will then be redirected to another screen to make your selections.

Indiana Field Office

http://www.nass.usda.gov/Statistics_by_State/Indiana/

Publications pertaining to data specific to Indiana can be accessed from our Home page listed above. There is a list of publications under **Indiana Publications**.

Data for other States can be accessed by choosing the desired State in the **Statistics by State** box on the right side of the screen.

NASS Subject Specialists:

NASS maintains a listing of subject and commodity specialists for the various program areas. From the NASS Home page, click on **Publications**, then select **Contact a Specialist** in the **I Want To....** box on the right hand side of the screen.

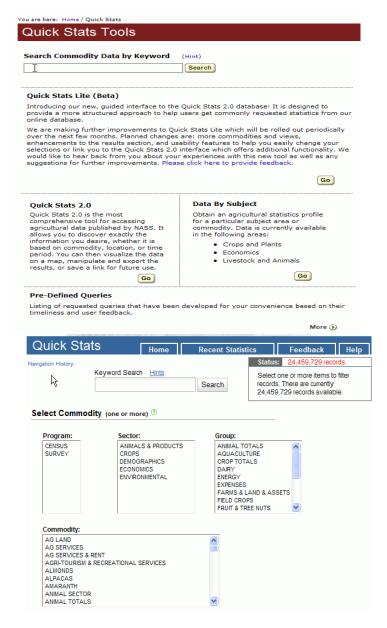

NASS Customer Service:

NASS operates an information center, staffed 7:30 a.m. to 4:00 p.m. ET Monday-Friday, to assist you with accessing reports and data via the Internet, or obtaining printed copies.

Please call 1-800-727-9540.

Quick Stats Tools:

Historical County, State, and U.S. information is available on the Internet FREE OF CHARGE. The database uses custom extracts based on commodity, year, State, and other selection criteria to produces an output file compatible for updating databases and/or spreadsheets. The database can be accessed from the NASS Home page shown above, or any State Field Office Home page. Just click on the **Quick Stats** button and follow the instructions. Searches for U.S. and State, State and County, and the Census of Agriculture data can be queried from here.

CUSTOMER SERVICE

E-Mail Subscriptions:

NASS Reports: Subscriptions to NASS reports are offered free through our e-mail service. Select the **Publications** drop down menu in the green bar of the NASS Home page. Select National Reports under Receive reports by E-mail. First time users will be required to set up an account. Select Register and follow instructions to choose the National reports you would like to receive and they will be delivered as soon as they are published.

GET THE APP:

The Indiana Annual Bulletin is available in an electronic reader format.

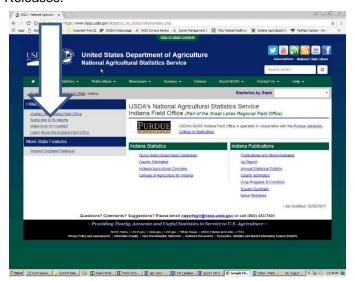

Download the FREE App!

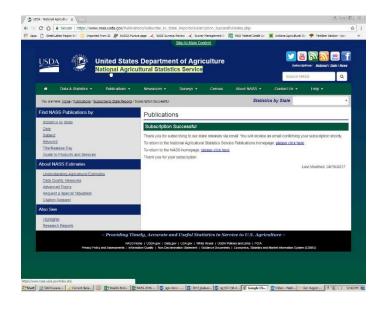

Compatible with Android and Apple Products.
Get it at iTunes, Google Play, and Amazon.

Indiana Field Office Reports: State specific reports are also available free via e-mail. Under the Publications drop down menu of the NASS Home page, select State Reports under the heading Receive reports by E-mail. Reports from all states are available with this selection. Scroll down to select the reports you want, enter your name and e-mail address, and then click on Subscribe. Or, on the left side of the Indiana Field Office Home page, select Subscribe to IN reports. This will give you only reports for Indiana. After entering your name and e-mail address, click on Subscribe. E-mail reports available through the Indiana Field Office include: All Reports, Agriculture Report, Crop-Weather, Crops and Livestock, Miscellaneous, Press Releases.

Once you "Subscribe", you will receive a confirmation message in your email.
