## Acknowledgments

### ~ ~ ~ About the Cover ~ ~ ~

"Indiana Grown" was taken by sixteen-year-old Lillian Dove from New Palestine, Indiana and appears on the top left side of the front cover.

Fourteen-year-old Hannah Eller from Kokomo, Indiana took the picture, "Sunset on the Farm". Her picture appears on the top right side of the front cover.

"Cow" was taken by eleven-year-old Elayna Cates from Marion, Indiana. Her picture is on the bottom of the front cover.

The photograph on the back cover, "Fun With the Goats", was taken by ten-year-old Reece Jones from Plymouth, Indiana.

We extend a special thanks to the farmers, agri-businesses, extension officials and others who voluntarily provided basic data used to prepare the statistics presented in this publication and to the corps of enumerators who so faithfully collected much of our raw data.

We would also like to thank all the 4-H photography members that submitted pictures for use in our publication. All the photos were included on posters displayed at the 2022 Indiana State Fair.

This information is very important,  
but just as important are the  
people. We take this opportunity to  
thank the following for helping  
provide this valuable resource to  
the farmers of Indiana.

## Nathanial Warenski State Statistician

In this 2022-2023 annual issue of the “Indiana Agricultural Statistics” publication you will find information about Indiana’s entire agricultural industry. This is the 97th edition and is published by the cooperative efforts of Purdue University and USDA’s National Agricultural Statistics Service. This year’s edition will be the ninth edition that will be published and available from a free mobile app created by Purdue University. The app is available for Apple iPhone, iPad and iPod touch as well as Android users. It can be obtained through iTunes, Google Play, and Amazon. Links to those sites where the app can be downloaded are in Purdue Extension’s [The Education Store](#) or use the Quick Response Code (QR) located on page 132 in this book.

We are again pleased to feature the photography talents of 18 individual 4-H members within Indiana’s 2022-2023 Agricultural Statistics Annual Summary. These photographs, exhibited at the 2022 Indiana State Fair, provide a glimpse of Indiana’s agriculture from future farmers’ perspective. We are grateful to all the 4-H members who submitted their photos for publication.

I would like to take a moment to thank everyone for completing the 2022 Census of Agriculture. The data from Census will be released in February 2024. It is the culmination of the greatest count of agriculture, and you helped tell the story! It is not just the story of corn, soybeans, and hogs, it tells of the diversity of your farm with mint, pumpkins, poultry, and cattle. It tells of farm economy. It tells us who is farming. But most importantly, it tells your story!

This data is used to provide facts to decision makers that determine the future of Indiana’s agricultural industry. The uses of the data are as diverse as the agriculture of Indiana. The goal for this publication remains unchanged. It is to provide the public with data to help them understand the current situation of Indiana’s farming community and future opportunities. While we strive to exceed this goal, the Indiana Field Office of USDA’s National Agricultural Statistics Service, assures that all individual reports and business data are held in the strictest confidence. We take every action possible to protect your data.

Indiana agriculture continues to be a growing segment of the State’s economy, with Indiana ranked in the top ten nationally for farm receipts. Hoosier farmers should take pride in the fact that even with adverse weather conditions, rising production expenses and prices, Indiana agriculture continues to thrive. Indiana continues to rank near the top nationally in the production of corn, soybeans, popcorn, blueberries, peppermint, spearmint, processing tomatoes, fresh market melons, and vegetables for processing. Indiana livestock producers put our state’s rank at the top for hogs, chickens, eggs, and turkeys.

This Federal/University cooperative effort has existed since 1925 and continues to enhance the opportunity for agricultural research programs for State specific statistical projects in support of agricultural researchers and decision makers. Some of those projects include Agronomic Survey of Indiana Corn and Soybean Growers, Plant Disease and Fungicide Use Survey, and Timber Price Survey. Results of these special research efforts are published by the individual research programs. Results from these special surveys are not a part of this publication but please feel free to contact us for reference to those researchers for additional information.

Thank you for the opportunity to serve the agricultural community, with your help in providing timely, accurate, and unbiased data. Please let us know your comments and suggestions.

Sincerely,

Nathanial Warenski  
State Statistician

USDA, NASS, Great Lakes Region - Serving Indiana, Michigan, and Ohio

# FARM INCOME

## CASH RECEIPTS

Indiana farmers received \$18.4 billion in cash receipts from farm marketings in 2022, up 29 percent from 2021. Cash receipts from crops were up 23 percent, and receipts for livestock were up 43 percent from the previous year. Marketings of crops, at \$12.03 billion, accounted for 65.5 percent of the total cash receipts in 2022 while livestock receipts, at \$6.35 billion, accounted for the remaining 34.5 percent. In the previous year's revised totals, crop receipts accounted for 68.7 percent and livestock 31.3 percent of total cash receipts.

Corn was the leading source of income for Indiana farmers in 2022 and amounted to \$6.43 billion, followed again by soybeans with \$4.81 billion. Poultry and eggs moved into third place with \$2.89 billion. Meat animals dropped to the fourth leading contributor with \$2.02 billion and dairy followed with \$1.12 billion. These five commodity groups accounted for nearly 94 percent of the 2022 cash receipts.

**2022 Indiana Cash Receipts**

<sup>1</sup> Includes fruits and nuts.

<sup>1</sup> Value of Agricultural sector production is the gross value of the commodities and services produced within a year. Net value-added is the sector's contribution to the National economy and is the sum of the income from production earned by all factors-of-production, regardless of ownership. Net farm income is the farm operators' share of income from the sector's production activities. The concept presented is consistent with that employed by the Organization for Economic Cooperation and Development.

<sup>1</sup> Value of Agricultural sector production is the gross value of the commodities and services produced within a year. Net value-added is the sector's contribution to the National economy and is the sum of the income from production earned by all factors-of-production, regardless of ownership. Net farm income is the farm operators' share of income from the sector's production activities. The concept presented is consistent with that employed by the Organization for Economic Cooperation and Development.

<sup>2</sup> Includes expenses associated with operator dwellings.

<sup>3</sup> Includes federal and private crop and livestock insurance premiums as well as casualty, hail, motor vehicle, and all other insurance.

Data as of August 31, 2023

State	0	0	18	206	352	665	774	688	490	235	7	0	3,435

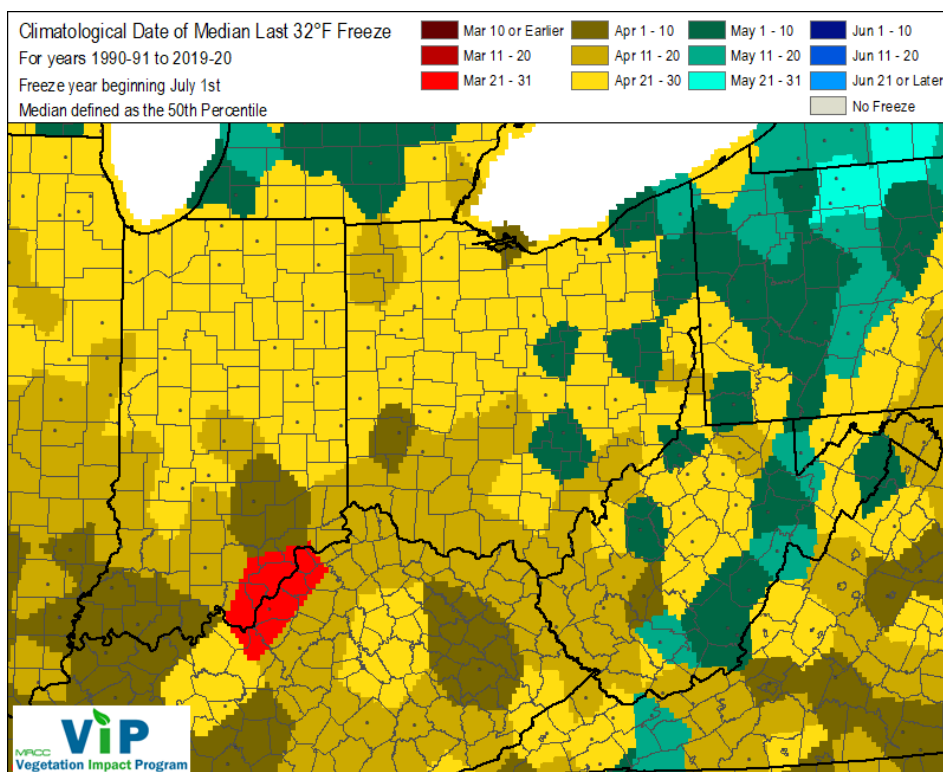

The above estimates of Growing Degree Days (GDD) Normals are derived from normal temperatures (1991-2020) at mid-month and the corresponding GDD. For example, a weekly average temperature of 60°F resulted in 84 GDD. The basic formula is:  $\frac{1}{2} (\max T - 50) + \frac{1}{2} (\min T - 50) = \text{GDD for one day}$ . The maximum temperature is not allowed to exceed 86 degrees F. Negative units are not accumulated.

**FARM MARKETINGS**

## CROP HIGHLIGHTS

**ACREAGE:** Indiana's principal field crops totaled 11.8 million acres for harvest during 2022, 10 thousand acres less than 2021. Soybean harvested acreage at 5.83 million was up 190 thousand from the previous year. Corn harvested for grain acreage was 5.13 million down 140 thousand acres from previous year.

**YIELDS:** A cold and wet start to the 2022 planting season offered very little opportunity for fieldwork throughout the month of April. The average temperature for the month was 47.8 degrees Fahrenheit. By the end of April, planting progress for both corn and soybeans had barely begun, and winter wheat jointing progress closed out 10 percentage points behind its five-year average.

Cool temperatures and ample rainfall carried over into early May, further delaying planting progress. The average temperature for May was 62.4 degrees. More ideal fieldwork conditions in the middle of May spurred corn and soybean planting progress onward. By the end of the month, planting progress for both corn and soybeans managed to surpass their respective five-year averages and winter wheat heading progress closed out May 11 points behind its five-year average pace.

The month of June brought warmer and drier weather conditions. The average temperature for the month was 73.0 degrees. By mid-June, corn and soybean planting neared completion. Above average temperatures paired with inconsistent rainfall caused topsoil moisture levels to decrease steadily throughout the month. At the beginning of June, 89 percent of topsoil moisture was reported as adequate or surplus and by the end of June, topsoil moisture was rated at 42 percent adequate or surplus.

As June wrapped up, corn and soybean emergence neared completion with 59 percent of corn and 61 percent of soybeans rated in good to excellent condition. At this time, first cuttings of alfalfa and other hay also neared completion and second cuttings were in full swing. Nearly a third of the State's winter wheat had been harvested by the end of June with 65 percent of the crop rated in good to excellent condition.

Hot and dry conditions continued into July. Topsoil moisture level ratings averaged 46 percent adequate or surplus throughout the month. The average temperature for the month was 75.4 degrees. By mid-July, winter wheat harvest finished up slightly ahead of its five-year average. By the end of July, impacts of dry weather became more evident. Corn silking progress was in line with its five-year average pace

and 46 percent of corn was rated in good to excellent condition. Soybean blooming progress continued a little behind its five-year average. Soybean condition was rated 48 percent good to excellent. Only 35 percent of pastures were rated in good to excellent condition, but livestock were reportedly doing well despite slow pasture regrowth.

Mid-August rains brought relief and aided in stabilizing crop condition. For the remainder of the growing season, crop progress items fell behind their respective five-year average benchmarks somewhat. As September ended, the corn and soybean harvesting season was off to a delayed start. Corn condition was rated 54 percent good to excellent and soybeans were rated 55 percent good to excellent. Winter wheat planting was also off to a slow start.

Corn harvested for silage wrapped up near mid-October. As the harvesting season closed out, ideal fieldwork conditions spurred all crop progress items helping corn harvested for grain, soybean harvest, and winter wheat emergence to catch up to their respective five-year averages. The 2022 Indiana corn yield was 190.0 bushels per acre while soybeans yielded 57.5 bushels per acre.

**PRODUCTION:** Indiana corn production in 2022 totaled 947.7 million bushels, 5 percent below 2021's total of 1,027.7 million bushels. Indiana's soybean production totaled 335.2 million bushels, down 1 percent from 2021's 338.4 million bushels. Indiana wheat production at 19.4 million bushels was down 15 percent from 2021's 23.0 million bushels. All hay production, at 1.59 million tons, was up 2 percent from the previous year.

<sup>1</sup> Data from Objective Yield Survey.

## BIOTECHNOLOGY VARIETIES

The National Agricultural Statistics Service conducts the June Agricultural Survey in all States each year. Randomly selected farmers across Indiana are asked if they planted corn or soybean seeds that, through biotechnology, are resistant to herbicides, insects, or both. Conventionally bred herbicide resistant varieties were excluded. Insect resistant varieties include only those containing bacillus thuringiensis (Bt). Stacked gene varieties include those containing biotech traits for both herbicide and insect resistance.

## BIOTECHNOLOGY VARIETIES, PERCENT OF ALL PLANTED ACRES INDIANA, 2017-2023

**LIVESTOCK PRODUCTION COSTS**

# LIVESTOCK HIGHLIGHTS

**HOG AND PIG** numbers (December 1, 2022), at 4.45 million, were up 2 percent from a year earlier. The average value per head increased from \$115.00 in 2021 to \$135.00 in 2022. This raised the total inventory value to \$587.3 million, 17 percent above a year ago. Indiana remained in fifth place in the nation for the number of hogs on hand December 1, 2022.

**CATTLE** inventory numbers, at 790,000, were down 2 percent from January 1, 2022, while value per head increased to \$1,190 per head, up \$130.00 from the previous year. Total cattle inventory value, at \$940.1 million, increased 9 percent from the \$858.6 million last year. Cows and heifers that have calved totaled 360,000 head, down 3 percent from a year earlier. Of this total, 173,000 were beef cows, down 6 percent; and 187,000 were milk cows, up 1 percent from the previous year.

Total **SHEEP** inventory, at 62,000 head for January 1, 2023, was up 3 percent from a year earlier. Breeding sheep totaled 54,000 head. Average value per head, at \$285.00, was up \$26.00 from 2022. Total inventory value, at \$17.7 million, was 14 percent above the previous year.

Total **CHICKEN** inventory, excluding broilers, on December 1, 2022, at 46.4 million birds, was up 2 percent from the previous year. Indiana remained in third place in the nation for total chickens, excluding broilers, and for layers (37.1 million). The total value of the chicken inventory was \$157.6 million, up 15 percent from 2021. The value per bird, at \$3.40, was up \$0.40 from the previous year.

## HOGS AND PIGS

The total pig crop in 2022 was down 4 percent from the pig crop in 2021. Sows farrowed during the year was down 3 percent from the previous year, and litter rates decreased to 10.72. Hog and pig cash receipts totaled \$1.56 billion, increasing 6 percent from the previous year. Gross income of \$1.57 billion (cash receipts plus value of home consumption), also increased 6 percent from the previous year.

<sup>1</sup> NASS will no longer estimate numbers from survey data for Cattle County estimates. The new approach for setting livestock county numbers, termed "raking", utilizes county level livestock information from the Census of Agriculture, administrative data and current year state-level Agricultural Statistics Board (ASB) inventory and production estimates. To provide the data user with a consistent data series, NASS has established county numbers using the raking approach for commodities beginning with data from the 2007 Census. For cattle, this new methodology was implemented with the 2008 numbers. These new data items are available in both Quick Stats 1.0 and Quick Stats 2.0 databases. Previously established estimates for these years have been removed from all versions of Quick Stats. District level estimates will no longer be published for Cattle. This is consistent with the Census of Agriculture. For more information about this new methodology, go to [http://www.nass.usda.gov/Data\\_and\\_Statistics/County\\_Data\\_Files/Livestock\\_County\\_Estimates/index.asp](http://www.nass.usda.gov/Data_and_Statistics/County_Data_Files/Livestock_County_Estimates/index.asp)

# COUNTY HIGHLIGHTS

## COUNTY HIGHLIGHTS

The following pages of county statistics represent the results of a survey of over 15,000 farm operators following the 2022 harvest season. In addition to these data are selected items of interest from the U.S. Population Census, 2017 Census of Agriculture, and 2021 Cash Receipts information from the Bureau of Economic Analysis. The County Highlights section summarizes the importance of agriculture to each and every Indiana County while comparing the magnitude of importance across counties.

Planted acreage for hay is represented by three dashes because this category is not estimated, planted acreage and yield for popcorn are represented by three dashes because these categories are not surveyed; in all other places the three dashes represent zero for that county. An asterisk signifies that the county has data for this item, but it cannot be disclosed for confidentiality purposes. The 2017 Chicken data from Census includes only layers twenty weeks old and older.

Below is a list of comparable items at the state level.

## STATE DATA

2022 Census Population	6,833,037	2021 Cash Receipts	\$14,634,975,000
2017 Total Land Area (acres)	22,928,355	Crop Receipts	\$9,844,958,000
2017 Number of Farms	56,649	Livestock Receipts	\$4,790,017,000
2017 Land in Farms (acres)	14,969,996		
2017 Average Size of Farm (acres)	264	2021 Other Income	\$1,231,381,000
		Government Payments	\$643,600,000
2017 Value of Land & Bldgs (avg/acre)	\$6,576	Imputed Income/Rent Received	\$587,781,000
2017 Cropland (acres)	12,909,673

## REPORTS AND DATA FROM USDA'S NATIONAL AGRICULTURAL STATISTICS SERVICE (NASS)

### Internet:

Reports and data from NASS as well as the Indiana Field Office are available on the internet.

For access, choose from the following:

### NASS

<http://www.nass.usda.gov/>

Today's reports will be listed on the screen. To select from other reports, click on the **View previous reports** link next to "Today's Reports". You will then be redirected to another screen to make your selections.

### Indiana Field Office

[http://www.nass.usda.gov/Statistics\\_by\\_State/Indiana/](http://www.nass.usda.gov/Statistics_by_State/Indiana/)

Publications pertaining to data specific to Indiana can be accessed from our Home page listed above. There is a list of publications under **Indiana Publications**.

Data for other States can be accessed by choosing the desired State in the **Statistics by State** box on the right side of the screen.

### NASS Subject Specialists:

NASS maintains a listing of subject and commodity specialists for the various program areas. From the NASS Home page, click on **Publications**, then select **Contact a Specialist** in the **I Want To....** box on the right-hand side of the screen.

### NASS Customer Service:

NASS operates an information center, staffed 7:30 a.m. to 4:00 p.m. ET Monday-Friday (except for federal holidays), to assist you with accessing reports and data via the Internet, or obtaining printed copies.

Please call **1-800-727-9540**.

### Quick Stats Tools:

Historical County, State, and U.S. information is available on the Internet **FREE OF CHARGE**. The database uses custom extracts based on commodity, year, State, and other selection criteria to produce an output file compatible for updating databases and/or spreadsheets. The database can be accessed from the NASS Home page shown above, or any State Field Office Home page. Just click on the **Quick Stats** button and follow the instructions. Searches for U.S. and State, State and County, and the Census of Agriculture data can be queried from here.

You are here: [Home](#) / [Quick Stats](#)

#### Quick Stats Tools

Search Commodity Data by Keyword [\(Hint\)](#)

#### Quick Stats Lite (Beta)

Introducing our new, guided interface to the Quick Stats 2.0 database! It is designed to provide a more structured approach to help users get commonly requested statistics from our online database.

We are making further improvements to Quick Stats Lite which will be rolled out periodically over the next few months. Planned changes are: more commodities and views, enhancements to the results section, and usability features to help you easily change your selections or link you to the Quick Stats 2.0 interface which offers additional functionality. We would like to hear back from you about your experiences with this new tool as well as any suggestions for further improvements. [Please click here to provide feedback.](#)

#### Quick Stats 2.0

Quick Stats 2.0 is the most comprehensive tool for accessing agricultural data published by NASS. It allows you to discover exactly the information you desire, whether it is based on commodity, location, or time period. You can then visualize the data on a map, manipulate and export the results, or save a link for future use.

#### Data By Subject

Obtain an agricultural statistics profile for a particular subject area or commodity. Data is currently available in the following areas:

- Crops and Plants
- Economics
- Livestock and Animals

#### Pre-Defined Queries

Listing of requested queries that have been developed for your convenience based on their timeliness and user feedback.

## E-Mail Subscriptions:

**NASS Reports:** Subscriptions to NASS reports are offered free through our e-mail service. Select the **Publications** drop down menu in the green bar of the NASS Home page. Select **National Reports** under **Receive reports by E-mail**. First time users will be required to set up an account. Select **Register** and follow instructions to choose the National reports you would like to receive, and they will be delivered as soon as they are published.

**Indiana Field Office Reports:** State specific reports are also available free via e-mail. Under the **Publications** drop down menu of the NASS Home page, select **State Reports** under the heading **Receive reports by E-mail**. Reports from all states are available with this selection. Scroll down to select the reports you want, enter your name, and e-mail address, and then click on **Subscribe**. Or, on the left side of the Indiana Field Office Home page, select **Subscribe to IN reports**. This will give you only reports for Indiana. After entering your name and e-mail address, click on **Subscribe**. E-mail reports available through the Indiana Field Office include: All Reports, Agriculture Report, Crop-Weather, Crops and Livestock, Miscellaneous, Press Releases.

## GET THE APP:

The Indiana Annual Bulletin is available in an electronic reader format.

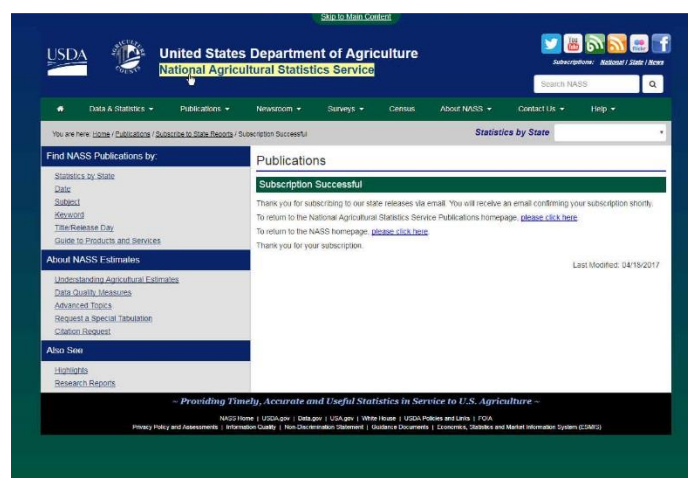

Download the **FREE** App!

Compatible with Android and Apple Products. Get it at iTunes, Google Play, and Amazon.

Once you "Subscribe", you will receive a confirmation message in your email.
