

Iowa is divided into agricultural statistics districts for convenience in compiling and presenting statistical information on crops and livestock. These nine districts are outlined on the above map. The districts are designated as follows: Northwest (NW), West Central (WC), Southwest (SW), North Central (NC), Central (C), South Central (SC), Northeast (NE), East Central (EC), and Southeast (SE). In this bulletin, tables with statistical information by county have the counties grouped alphabetically within each district. Totals and averages are shown for each district.

Following is an alphabetical list of counties showing the crop reporting district in which each county is located:

¹The "New Definition" of a farm, starting in 1975, includes places which had annual sales of agricultural products of \$1,000 or more. This is the same definition used by the Department of Commerce, Bureau of the Census, for the 1978 Census of Agriculture. The "Old Definition" of a farm included places of 10 or more acres and had annual sales of \$50 or more and places of less than 10 acres that had annual sales of \$250 or more.

2005 Iowa Crop Summary

The 2005 crop season began with unseasonably mild weather. Despite the trend of milder weather, the month of April still saw the typical variation in temperature and spring storms. The warmer than usual weather early in the month caused Iowa to see the onset of fieldwork for farmers. Rain storms later in the month slowed planting progress so that by the end of April, 92 percent of oats had been planted, as well as, 17 percent of corn.

May began with cooler than normal conditions predominating. A hard frost occurred in the second week of the month possibly doing damage to emerged crops. The middle through the end of the month saw greatly fluctuating conditions in different areas of the state. Some areas were too wet and planting was slowed, while other areas of the state were in need of rain. At the end of May, 87 percent of soybeans had been planted and 49 percent had emerged. Corn planting was finished and was 93 percent emerged. Also, the first alfalfa hay cutting was 23 percent complete.

The beginning of June saw typical early summer weather as farmers in the state wrapped up the planting season. The second week of the month saw wet windy conditions that hindered fieldwork throughout most of the state. Hot weather prevailed by the end of June. This initially improved crop conditions and growth rates. As the month came to an end, rainfall levels varied widely, leaving crops in the eastern portion of the state in need of rain. The first cutting of alfalfa was 99 percent complete. Oat acreage headed was 95 percent. The majority of corn, soybeans, oats, and hay were all considered to be in good or excellent condition.

The beginning of July saw hot, dry conditions across most of Iowa. These conditions persisted until the last week in July when a cold front moved through the area, bringing much needed rain to most of the state. The lack of precipitation early in the month caused the deterioration of crop conditions, most significantly in east central Iowa. Crop conditions were listed as fair to good as a result of this weather pattern. At months end, 95 percent of soybeans were blooming and 67 percent were setting pods. The corn crop development was ahead of normal as 99 percent of corn had tasseled and 93 percent had silked. The oat harvest was 89 percent complete and the second alfalfa harvest was 98 percent complete.

The weather trend in August was above normal temperatures and below normal rainfall across the state. In the third week of August there were thunderstorms across much of the state. Northeast Iowa saw rainfall totals in excess of four inches as a result of these storms. At the end of the month the lack of rain continued in other areas of the state. Reports were received about creeks beginning to dry up and pastures browning. Pod setting was 99 percent complete, equal to the 5-year average. Soybean yellowing and leaf drop was 12 percent complete, slightly ahead of the 5-year average. Corn development was ahead of normal and the condition of both corn and soybeans remained about the same as July.

September continued the trend of above normal temperatures and below normal rainfall for the state. The month began with the driest week seen in six months with only 0.16 inches of rainfall. This allowed area farmers to make fieldwork progress nearly every day of the week. Severe weather was reported in 23 counties in the second week of the month, and several counties in northern Iowa reported hail. These storms caused a brief pause in fieldwork, but by weeks end harvest had begun. The month ended with the wettest week in six weeks with parts of Iowa seeing four plus inches of rainfall. Corn harvest was 7 percent complete, soybean harvest was 27 percent complete, and the fourth cutting of alfalfa had begun.

The month of October saw widely varying temperatures across the state. Much of the state saw rain showers throughout the month, but totals still remained low. The drier weather lead to lower drying costs for farmers. This continued dry weather has also lead to aflatoxin concerns in southeastern and east central Iowa as well as concerns of soil moisture conditions for the future. By the end of the month 80 percent of corn had been harvested and about 99 percent of soybeans had been harvested.

As November began, the 2005 harvest was coming to a close. The shortage of grain storage on- and off-farm was still a problem. Corn harvest was nearly complete and fall fertilizer application was 66 percent complete. Temperatures varied widely as the month began, but began to approach seasonal norms in the third week of the month. As November came to a close the first snowfall was seen as 1 to 2 inches blanketed much of the state.

¹ "Ending stocks available by days" is calculated by dividing the current year's total use (feed & residual; food, seed & industrial; exports) by days during year to obtain a daily use. The ending stocks are then divided by the daily use to obtain stocks available by days. ²Estimated. ³Projection June 2006.

Biotechnology Varieties, Iowa and U.S.

USDA, National Agricultural Statistics Service conducts the June Agricultural Survey each year. Randomly selected farmers across Iowa were asked if they planted corn or soybean seeds that, through biotechnology, are resistant to herbicides, insects, or both. Conventionally bred herbicide resistant varieties were excluded. Insect resistant varieties include only those containing bacillus thuringiensis (Bt). Stacked gene varieties include those containing biotech traits for both herbicide and insect resistance.

¹ Planted acres in 2005 for Iowa were 12.8 million acres.

The agricultural chemical use estimates refer to on-farm use of commercial fertilizers and pesticides on targeted crops for the 2005 crop year. The targeted crops for Iowa only included corn. Farm and ranch operators were enumerated late in the growing season after the farm operator had indicated that planned applications were completed.

The data were compiled from the Agricultural Resources Management Survey (ARMS). The main portion of data collection time frame occurred during the months of September-December of 2005.

This report excludes pesticides used for seed treatments and postharvest applications to the commodity. Spot treatments, which account for a very small percentage of total applications, are also excluded.

2005 Livestock Summary

Iowa

Iowa's cattle, hog, and sheep producers received \$6.78 billion from marketings in 2005. This was up nearly 12 percent from the \$4.98 billion received in 2004. Cattle accounted for \$2.43 billion of the cash receipts in 2005 while hog sales totaled \$4.30 billion and sheep \$40.8 million. This compares to 2004 receipts of \$2.12 billion for cattle, \$3.80 billion for hogs, and \$34.6 million for sheep.

Cattle: Iowa producers had 3.80 million cattle and calves on farms as of January 1, 2006, up 5 percent from January 1, 2005. Cows and heifers that have calved totaled 1.24 million head, up 3 percent from a year earlier. Of this total, 1.05 million head were beef cows, up 4 percent from last year, and 187,000 head were milk cows, unchanged from last year.

Heifers weighing 500 pounds or more, at 890,000 head, were up 10 percent from the previous year. Of this total, 140,000 were beef cow replacements, 120,000 were milk cow replacements, and 630,000 were other heifers.

Steers weighing 500 pounds or more, at 1.10 million head, were up 7 percent from a year ago. An estimated 70,000 bulls weighing 500 pounds or more were on hand, unchanged from last year. Calves weighing 500 pounds or less totaled 500,000 head, down 2 percent from the previous year. The estimated 2005 calf crop for Iowa is 1.20 million head, up 6 percent from a year ago.

Hogs: Iowa continues to rank number one among the states in hog inventory. Hogs and pigs on hand December 1, 2005 totaled 16.5 million, or almost 27 percent of the Nation's hogs.

The state's pork producers farrowed 1.79 million sows during 2005 (December 2004 through November 2005), 45,000 more than during 2004. The average pigs saved per litter was 8.99, resulting in a pig crop of 16.0 million, up 5 percent from the previous year. Marketings of hogs were 31.82 million head in 2005, up 7 percent from 2004.

Sheep: Sheep numbers on January 1, 2006 in Iowa totaled 235,000 head, down 4 percent from January 1, 2005. An estimated 205,000 lambs were born during 2005, down 5 percent from the previous year. The 220,000 sheep shorn in 2005 produced 1.27 million pounds of wool valued at \$343,000.

Milk Production: Iowa dairymen produced an estimated 4.02 billion pounds of milk during 2005, up slightly from 2004. There was an average of 194,000 milk cows on hand during 2005, up less than 1 percent from the 193,000 a year earlier. The annual average milk produced per cow was 20,722 pounds, up from the 19,953 pound average in 2004.

Red Meat Production: Slaughter plants in Iowa produced 6.48 billion pounds of red meat (beef, veal, pork, and mutton) during 2005, 2 percent below the previous year.

United States

The 2005 gross income from cattle and calves, hogs and pigs, and sheep and lambs for the United States totaled \$65.3 billion, up 4 percent from 2004. Gross income increased for hogs and pigs, cattle and calves, and sheep and lambs.

Total 2005 cash receipts from marketings of meat animals increased 4 percent to \$64.8 billion. Cattle and calves accounted for 76 percent of this total, hogs and pigs 23 percent, and sheep and lambs 1 percent. Production increased for hogs but declined for both cattle and sheep. Average prices were up for all species.

Cattle and Calves: Cash receipts from marketings of cattle and calves increased from \$47.3 billion in 2004 to \$49.2 billion in 2005. All cattle and calf marketings totaled 53.0 billion pounds in 2005, down 2 percent from the previous year. The U.S. annual average price per

100 pounds live weight for cattle was \$89.70, an increase of \$3.80 from 2004. For calves, the annual average price increased \$16.00 to \$135.00.

Hogs and Pigs: Cash receipts from hogs and pigs totaled \$15.0 billion during 2005, up 5 percent from 2004. Marketings increased to 28.5 billion pounds in 2005, up 3 percent from 2004. The U.S. annual average price per 100 pounds live weight increased from \$49.30 in 2004 to \$50.20 in 2005.

Sheep and Lambs: Cash receipts from marketings of sheep and lambs in 2005 were \$569 million, up 9 percent from 2004. Marketings decreased 1 percent to 571 million pounds. The U.S. annual average price per 100 pounds live weight for sheep increased from \$38.80 in 2004 to \$45.10 in 2005; while for lambs, the annual average price increased \$9.00 to \$110.00.

2005 Poultry Summary

Iowa

Chicken inventories in the state totaled 58.5 million birds on hand December 1, 2005, and represented a 2 percent increase from the same date the previous year. Average number of layers on hand during 2005 was 48.8 million, 12 percent above the 43.6 million birds during 2004. Egg production per bird, at 266 eggs, was down 1 egg from 2004. Total egg production for 2005 was 12.98 billion eggs, 12 percent above

the previous year. In 2005 the value of production from eggs was \$335.3 million, up from \$491.7 million in 2004. The eggs produced brought an average of 31.0 cents per dozen, down from 50.8 cents per dozen in 2004.

An estimated 75.1 million egg-type chicks were produced in Iowa hatcheries during 2005, up nearly 4 percent from the 72.3 million produced in 2004.

United States

The combined value of production from broilers, eggs, turkeys, and the value of sales from chickens in 2005, was \$28.2 billion, down 2 percent from the \$28.9 billion in 2004. Of the combined total, 74 percent was from broilers, 14 percent from eggs, 11 percent from turkeys, and less than 1 percent from chickens.

The value of broilers produced during 2005 was \$20.9 billion, up 2 percent from 2004. The total number of broilers produced in 2005 was 8.87 billion, up 1 percent from 2004. The total amount of live weight broilers produced in 2005 was 47.9 billion pounds, up 5 percent from 2004. The 2005 average price per pound on a live weight equivalent basis was 43.6 cents per pound, compared with 44.6 cents in 2004.

Value of all egg production in 2005 was \$4.04 billion, down 24 percent from the \$5.30 billion in 2004. Egg production totaled

90.0 billion eggs, up 1 percent from the 89.1 billion eggs produced in 2004. In 2005, all eggs averaged 53.9 cents per dozen, compared with 71.4 cents in 2004.

At \$3.23 billion, the value of turkeys produced in 2005 was up 6 percent from the \$3.05 billion the previous year. Turkey production in 2005 totaled 7.21 billion pounds, down 1 percent from the 7.28 billion pounds produced in 2004. The average price received by producers during 2005 was 44.9 cents per pound, compared with 42.0 cents in 2004.

The value of sales from chickens (excluding broilers) in 2005 was \$64.6 million, up 12 percent from the \$57.6 million a year ago. Prices averaged 6.5 cents per pound, compared with 5.8 cents in 2004. The number of chickens sold in 2005 totaled 193 million, up 1 percent from the total sold during the previous year.

¹For livestock and livestock products, prices are calendar year monthly prices weighted by monthly marketings except for milk cow prices (which is a straight average of the quarterly prices) and hog and egg prices (which are weighted averages of monthly prices for marketing season). Months underlined indicate end of marketing year for that commodity. ²All eggs prior to 1982. *Data not available.

¹ Retail costs are based on CPI-U of retail prices for domestically produced farm foods, published monthly by the Bureau of Labor Statistics (BLS). Farm value is the payment for the quantity of farm equivalent to the retail unit, less allowance for by-product. Farm values are based on prices at first point of sale, and may include marketing charges such as grading and packing for some commodities. The farm-retail spread, the difference between the retail value and farm value, represents charges for assembling, processing, transporting, and distributing. ² Weighted-average value of retail cuts from pork and Choice yield grade 3 beef. Prices from BLS. ³ Value of wholesale (boxed beef) and wholesale cuts (pork) equivalent to 1 lb. of retail cuts adjusted for transportation costs and by-product values. ⁴ Market value to producer for live animal equivalent to 1 lb. of retail cuts, minus value of by-products. ⁵ Charges for retailing and other marketing services such as wholesaling and in-city transportation. ⁶ Charges for livestock marketing, processing, and transportation.
