

Mississippi Crop Progress and Condition

Delta Region - Mississippi Field Office 121 North Jefferson Street, Suite 230 Jackson, MS 39201 (601) 359-1259 · FAX (855) 270-2705 · <u>www.nass.usda.gov</u> Cooperating with Mississippi Department of Agriculture and Commerce

This report contains the results from the **Crop Progress and Condition** weekly survey. The survey is completed by county extension agents' visual observations and contact with producers in their county. These data are also posted on our web site at *https://www.nass.usda.gov/ms* and in a more detailed report at *https://www.nass.usda.gov*. Thanks to all of the county extension agents who responded to this survey.

Week Ending: April 6, 2025

Released: April 7, 2025

According to the National Agricultural Statistics Service in Mississippi, there were 2.4 days suitable for fieldwork for the **week ending Sunday, April 6, 2025**. Topsoil moisture supplies were 1 percent very short, 4 percent short, 45 percent adequate, and 50 percent surplus. Subsoil moisture supplies were 1 percent very short, 4 percent short, 48 percent adequate, and 47 percent surplus.

Crop Progress for Week Ending April 6, 2025

Crop	This week	Last week	Last year	5-year average
	(percent)	(percent)	(percent)	(percent)

Mississippi Subsoil Moisture Map for the week of March 24 - March 30, 2025

The Soil Moisture Active Passive (SMAP) provides measurements of soil moisture in the root zone as a weekly average, represented by pixels. Each pixel represents 9 by 9 kilometer plot or about 20,000 acres. The SMAP data measures soil moisture in cubic centimeters of water/cubic centimeters of soil. The scale represents the percent of water in a given volume of soil. More information and additional mapping is available at https://nassgeo.csiss.gmu.edu/CropCASMA/.
