2023 CHEMICAL USAGE FOR BARLEY

State-level estimates for 2023 chemical usage for barley are now available, according to the USDA's National Agricultural Statistics Service. The 2023 Agricultural Chemical Use Survey of barley producers collected data about fertilizer and pesticide use, as well as pest management practices in growing barley. NASS conducted the survey among barley producers in 14 states that together accounted for 95.6% of the 3.1 million acres planted to barley in the United States in 2023: California, Colorado, Idaho, Minnesota, Montana, North Carolina, North Dakota, Oregon, Pennsylvania, South Dakota, Virginia, Washington, Wisconsin, and Wyoming. The estimates can be accessed using the QuickStats online database, found here: <https://quickstats.nass.usda.gov>.

For pre-defined Quick Stats queries, go to https://www.nass.usda.gov/Surveys/Guide_to_NASS_Surveys/Chemical_Use/index.php and click "Data Tables" under the 2023 Barley, Oats, Peanuts, and Soybeans heading. For methodology information, go to https://www.nass.usda.gov/Surveys/Guide_to_NASS_Surveys/Chemical_Use/index.php and click "Methodology."

For state specific questions, please contact the following State Statisticians at 1-800-392-3202.

Colorado – Rodger Ott
Montana – Eric Sommer
Wyoming – Leslee Lohrenz
