**Agricultural Statistics**  
**1996-97**

Robert McKay leases this ranch near McGill in White Pine county from Kennecott Mineral Corporation. The ranch is known as "The Old Dairy" because the hay fields once supported a dairy herd that supplied the Kennecott mine workers with fresh dairy products. The mine was closed in the late 1970's, and the hay fields now help support McKay's herd of beef cattle.

July 15, 1997

Dear Nevadans:

Agriculture is a major component of the high quality of life we enjoy in Nevada and our farmers and ranchers serve our State well as stewards of much of the land. Maintaining our western heritage and open spaces is important to us and future generations. Farming and ranching has been under pressure from many sources, including tightening markets, urban demands, and constricting regulations. The economic viability of some agricultural sectors has eroded to the point where we are losing some farms. We must work together to keep agriculture viable in Nevada.

Accurate and timely statistics on agriculture, such as those presented in this publication, are vital to good decision making regarding this industry. I support the efforts of Nevada Agricultural Statistics Service to provide valuable information on agriculture.

Sincerely,

A handwritten signature in cursive script that reads "Bob Miller". The signature is written in dark ink and is positioned above the printed name.

To Friends of Agriculture:

As our state nears the 21<sup>st</sup> century, it is even more apparent that a dynamic and progressive agricultural industry is essential in sustaining Nevada's economy. Nevada farmers and ranchers serve as an important link to the past and also as an essential element in diversifying our state's economy to meet future needs, not only for our rural communities but for the state as a whole.

The Nevada Division of Agriculture is pleased to contribute to this issue of *Agricultural Statistics*. The unbiased, accurate and timely information provided in this publication, which has been compiled by the Nevada Agricultural Statistics Service, provides a reference for future marketing and management decisions.

I want to acknowledge and thank all the dedicated farmers and ranchers who responded to the Agricultural Statistics Service Survey.

Sincerely,

A handwritten signature in cursive script that reads "Paul Iverson".

To the Providers and Users of Agricultural Statistics:

The mission of Nevada Agricultural Statistics Service is to serve Nevada, its agriculture, and its rural communities by providing meaningful, accurate, and objective statistical information and services. One step in this direction is the preparation of Nevada Agricultural Statistics 1996-97 which presents a statistical profile of agricultural production, disposition, and income in Nevada for the ten year period 1987-1996. Estimated livestock inventories through January 1, 1997 are included, as are county level estimates for our most predominant commodities.

Nevada agriculture faces increasing pressure from forces both within and outside of the industry and the need for unbiased, meaningful statistics is increasing proportionately. We are challenged to meet these needs without overburdening our primary constituents; Nevada farmers and ranchers. Thank you, Nevada farmers and ranchers for your continued cooperation in providing the data used to prepare these statistics.

This publication is made available through the cooperative effort of Nevada Division of Agriculture and University of Nevada-Reno College of Agriculture with National Agricultural Statistics Service, U.S. Department of Agriculture. On behalf of the staff of Nevada Agricultural Statistics Service, it is my pleasure to present this bulletin. Questions regarding any of these statistics or requests for additional information are welcomed.

  
Martin J. Owens  
State Statistician

## TABLE OF CONTENTS

<sup>1</sup> Value added to gross income. Value added to net farm income equals difference in net farm income and returns to operators.

<sup>2</sup> Includes landlord capital consumption.

<sup>3</sup> Statistics represent the farm sector, defined as including farm operators' dwellings located on farms.

<sup>4</sup> Statistics no longer given in above format. Net value-added data for 1996 will be released October 1, 1997.

## 1996 Crop/Weather Summary

---

**January:** Snowfall and cold temperatures in the North put an end to aftermath grazing and increased supplemental feedings for livestock. Alfalfa haying wrapped up in extreme south and hay marketing was active statewide. Main farm/ranch activities: moving, working and marketing livestock, final haying, ditch and equipment maintenance, meetings.

**February:** Above normal precipitation in northern and central regions assured adequate surface irrigation water supplies, but concerns shifted to potential flood problems with nearly full reservoirs and heavy snow pack. The southern region remained dry and irrigation of orchards, hay, and fall seeded grains was necessary. Main farm/ranch activities: livestock feeding and marketing, equipment and ditch maintenance, meetings, tax preparation.

**March:** Due to several storm systems, field work was undertaken sporadically. Snow pack continued to be above normal, assuring adequate water supplies for irrigation. Fall seeded grains greened and hay fields were being fertilized. Main farm/ranch activities: plowing, ditch cleaning, onion planting, calving, lambing and sheering.

**April:** Unpredictable weather patterns left snow and temperatures about 5 degrees below normal one week, then clear and favorable the next. Precipitation spread over two-thirds of state with a foot of snow falling in the Sierra Nevadas. Southern Nevada was left parched, delaying field work but fall grains were greening and onions and garlic continued to grow. Main farm/ranch activities: spring grain planting, hay fields sprayed and fertilized, field plowing and leveling, ditch maintenance, calving, branding, vaccinating, lambing, sheering, and alfalfa harvest.

**May:** Warm weather started the month with storms following bringing much needed precipitation to entire state. Some below average temperatures were experienced with snowfall in higher elevations. Alfalfa growth slowed due to low temperatures. Grain crops in good to excellent condition. Main farm/ranch activities: spring planting, potato planting, alfalfa harvest, calving, branding, vaccinating, lambing, sheering, fertilizing, spraying, and irrigating.

**June:** Temperatures were above average with scattered thunderstorms and little precipitation. The month ended with a cold front bringing cooler temperatures and widespread wet weather, including snow in higher elevations, hail and urban flooding in Reno, Carson City and Fallon. Fieldwork was slowed by weather and crop development was behind schedule. Grain condition good to excellent in most areas. Alfalfa cutting began in the North, continued in the South. Branding, vaccinating, movement to summer ranges continued. Main farm/ranch activities: irrigating, fertilizing, spraying for weeds and insects, haying.

**July:** High temperatures dominated and thunderstorms were prevalent during most of month. Some Alfalfa hay damaged by rains. Harvest of grains for silage continued in Northwest. Grain acreage continued to mature and harvest began. Potatoes bloomed while onions and garlic were in good to excellent condition. Range livestock being supplemented with salt and minerals. Main farm/ranch activities: haying, irrigating, insect and weed spraying, Sudan grass planting.

**August:** Temperatures remained normal throughout month with on and off thunderstorms. All parts of Nevada received precipitation. Small grain harvest in full swing. Alfalfa hay cutting continued in North and South. Potatoes and onions in good condition. Garlic harvest underway and onion harvest approached. Range and pasture condition deteriorated. Main farm/ranch activities: haying, grain harvest, preparations for alfalfa seeding, garlic digging.

**September:** Low to normal temperatures prevailed with low pressure systems passing through. Spring wheat, barley and oats harvest completed throughout month. Alfalfa hay cutting continued as corn cutting for silage in full swing. Potato and onion harvest proceeded. Field preparation for garlic planting began. Livestock movement to fall pastures. Livestock numbers remained high, awaiting better prices. Main farm/ranch activities: haying, alfalfa seed harvest, potato digging, field preparations for fall planting.

**October:** First half of month began with above normal temperatures but fell to record or near record levels by month's end. Winter wheat and barley seeding well along. Silage corn harvest and alfalfa cutting completed while planting of new alfalfa continued. Potato and onion harvest in full swing, both crops in good to excellent condition. Garlic planting nearly complete. Drought continues in South - Southeast. Pregnancy testing cows, weaning calves. Main farm/ranch activities: haying, potato digging, onion harvest, fall planting, moving livestock.

**November:** Temperatures were average to above average. Precipitation was recorded throughout State, greatly helping the drought stricken South. Fall grain seeding complete and emergence began. Alfalfa grazing continued. Sudan harvest complete in extreme South. Potato and onion harvest complete. Pregnancy testing cows, weaning calves continued. Main farm/ranch activities: working livestock and finishing harvests.

**December:** Temperatures turned colder in all regions. Heavy precipitation yielded above normal snow pack, especially in the Sierras. Growth of fall seeded grain crops halted by cold weather. Winter wheat and barley remained in fair condition. Winter feed, forage supplies adequate. Cattle prices dismal. Main farm/ranch activities: working livestock, equipment maintenance, association meetings.

## 1996 PESTICIDE AND HERBICIDE APPLICATION SUMMARY

This summary was compiled from information contained in mandatory monthly reports submitted by the 1996 Custom Applicator licensees. Its accuracy is based on these monthly reports, and the data therein does not constitute approval or recommendations by the Nevada State Division of Agriculture or the Nevada Agricultural Statistics Service. This is not a complete summary in that it only contains the chemicals applied by custom applicators. It does not include chemical applications by individual farmers and ranchers who may apply chemicals on their own operations.
