

LAYERS and EGGS

New Hampshire poultry numbers were excluded from publication beginning in 2009 to avoid disclosure of individual operations. New England totals for 2009 - 2012 are not comparable with previous years.

Laying flocks in New England produced 1.742 billion eggs in 2013, down from 1.745 billion the previous year. Maine led New England as the top poultry State with

989 billion eggs produced in 2013, followed by Connecticut with 667 million eggs. The average price received for a dozen eggs in 2013 was \$0.90 compared with \$0.85 per dozen received a year earlier. Egg production in Connecticut, Maine, Massachusetts and Vermont was valued at \$131 million in 2013, up from the \$122 million value in the four States in 2012.

¹ Annual statistics cover the period from December 1 of the previous year through November 30 of the current year.

² Includes all layers and eggs produced in both table egg and hatching egg flocks regardless of size.

³ Total egg production divided by average number of layers on hand.

⁴ Handling, shipping, and marketing charges are excluded.

¹ Annual statistics cover the period from December 1 of the previous year through November 30 of the current year.² Includes all layers and eggs produced in both table egg and hatching egg flocks regardless of size.³ Eggs per Layer equals total egg production divided by average number of layers.⁴ Handling, shipping, and marketing charges are excluded.⁵ New Hampshire estimates discontinued in 2009 to avoid disclosure of individual operations.⁶ For the years 2003 – 2008, New England includes Connecticut, Maine, Massachusetts, New Hampshire, and Vermont. Beginning in 2009, New England includes Connecticut, Maine, Massachusetts, and Vermont.
