November 2015

This issue of the *New England Agricultural Statistics 2014* contains the most accurate, reliable, and unbiased information on the crop, livestock, and other agricultural products for each of the six New England States.

This publication satisfies the growing need for accurate, reliable, and unbiased information and data. The data comes from farmers, agricultural businesses, County Extensions, and other USDA agencies from across the New England States.

The data is used to provide facts to decision makers that determine the future of agriculture in their State. The goal for this publication remains unchanged. That goal is to provide the public with data to help them understand the current situation of agriculture within each of the New England States and in the region as a whole.

I wish to thank the thousands of farm operators across the region who participated in the surveys we conducted throughout the year. We understand the time commitment needed to complete these questionnaires and fully appreciate your effort. We strive to assure all your individual reports and business data are held in the strictest confidence. You **are** the heart and soul of our program, for without your cooperation, the rest of the story could not be accurately written.

Sincerely,

A handwritten signature in black ink that reads "Gary R. Keough". The signature is written in a cursive, flowing style.

¹ Number of farms reporting item divided by total number of farms.

² Total expenditures divided by total number of farms. Items may not sum to total due to rounding.

³ Atlantic Region consists of CT, DE, KY, ME, MD, MA, NH, NJ, NY, NC, PA, RI, TN, VA, VT, WV.

⁴ Includes purchases and leasing of livestock and poultry.

⁵ Includes all crop custom work, veterinary custom services, transportation costs, marketing charges, insurance, leasing of machinery and equipment, general and miscellaneous business expenses, and utilities.

⁶ Includes cash rent paid, share rent, plus public and private grazing fees.

⁷ Includes material and application costs.

⁸ The sum of real estate taxes and personal property taxes for operator, landlord, and contractor.

⁹ Includes all other fuels not specifically listed in the questionnaire (natural gas, coal, fuel oil, kerosene, wood, etc.).

¹⁰ Includes bedding/litter, marketing containers, power farm shop equipment, oil and lubricants, temporary fencing, miscellaneous non-capital equipment and supplies, repairs and maintenance of equipment not depreciated, and other small, non-capital equipment.

¹¹ Includes all expenditures related to new construction or repairs of buildings, fences, operator dwelling (if dwelling is owned by operation), and any improvements to physical structures of land.

¹² Includes all purchases of seed, plants, or seed treatments for nursery or farming operation. Excludes bedding plants, nursery stock, and seed purchased for resale.

¹³ Records any capital expenses not recorded in specific items on the questionnaire. It was estimated for the first time in 2005. Due to the small size of this expense, a zero in this line-item denotes less than 5 million dollars. Average value derived from expenditure rounding to zero will also be zero.

¹⁴ Includes landlord and contractor share of farm production expenses. May not add due to rounding.

¹⁵ United States excludes AK and HI.

Sweet Corn Production and Value — New England: 2005-2014 For Fresh Market

Sweet Corn Production — United States: 2014 For Fresh Market, Percent by State

**FRESH MARKET PRICE AND YIELD DATA
VEGETABLES AND FRUIT**

USDA's National Agricultural Statistics Service (NASS), New England Field Office collects, analyzes, and estimates fruit and vegetable prices and yields at the request of USDA Farm Service Agency (FSA). Funding was provided by the State Departments of Agriculture in Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, and Vermont. The data provide a valuable tool for growers to use in making production and marketing decisions and for FSA to administer farm programs based on State yield and price data. It is also used by Cooperative Extension to provide outreach and education and it is used by the State Departments of Agriculture to assist growers.

¹ Apple production from commercial orchards with 100 or more bearing age trees.

² Yield is based on total production, which includes unharvested production and fruit harvested but not sold due to market conditions.

³ Total production is the quantity actually harvested plus quantities of mature fruit not harvested because of economic or natural reasons.

⁴ Utilized production is the amount sold plus quantities used at home, given away, or held in storage.

¹ Honey producing colonies are the maximum number of colonies from which honey was taken during the year. It is possible to take honey from colonies which did not survive the entire year.

² Stocks held by producers.

³ Average price per pound based on expanded sales.

⁴ Value of production is equal to production multiplied by average price per pound.

⁵ Alaska, Connecticut, Delaware, Maryland, Massachusetts, Nevada, New Hampshire, New Mexico, Oklahoma, Rhode Island, and South Carolina not published separately to avoid disclosing data for individual operations.

⁶ Due to rounding, total colonies multiplied by total yield may not exactly equal production.

Where can I get more statistics or economic analysis?

National Agricultural Statistics Service (NASS) publications include weekly, monthly, quarterly, and annual estimates of production, stocks, inventories, disposition, utilization and prices of agricultural commodities, and other items. The Census of Agriculture is published every five years covering all commodities by state, county, and zip code. Other census reports include the Agricultural Atlas, History of the 2012 Census of Agriculture, Congressional District Tabulations, Farm and Ranch Irrigation, Horticulture Specialties, Watershed, On-Farm Organic Production, Organic Production, and Specialty Crops.

Economic Research Service (ERS) Situation and Outlook Reports and periodicals analyze the current situation and forecast market conditions. ERS monographs offer economic analysis in the area of trade, production, rural development, farm inputs, and other topics.

The World Agricultural Outlook Board (WAOB) issues regular forecasts of United States and world supply and demand prospects for major agricultural commodities.

How can I get National publications from NASS and ERS for all states?

- **For Free E-mail Subscriptions** go to <http://usda.mannlib.cornell.edu/MannUsda/aboutEmailService.do>
You will be directed to a sign-on page for your email information. Through this service, you will receive the reports of your choice within one hour of their publication via email. Please note that delivery time may take longer depending on factors such as network speed and congestion.
- **For a Free Catalog of Products and Services call 1-800-999-6779.**
The NASS and ERS catalogs list all products and services available from each agency. The NASS catalog includes a calendar of publication dates for agricultural statistics reports throughout the year.

How can I get State publications from NASS field offices?

- **For Free E-mail Subscriptions** go to http://www.nass.usda.gov/Statistics_by_State/New_England/index.asp. There is a link on the right "Subscribe to New England Reports". (New England includes CT, ME, MA, NH, RI and VT.)
- **For Paper Subscriptions** use the order form in this book; see 'New England Reports' for details. For States outside of New England, call 1-800-727-9540.
