November 2016

This issue of the *New England Agricultural Statistics 2015* contains the most accurate, reliable, and unbiased information on the crop, livestock, and other agricultural products for each of the six New England States.

This publication satisfies the growing need for accurate, reliable, and unbiased information and data. The data comes from farmers, agricultural businesses, County Extensions, and other USDA agencies from across the New England States.

The data is used to provide facts to decision makers that determine the future of agriculture in their State. The goal for this publication remains unchanged. That goal is to provide the public with data to help them understand the current situation of agriculture within each of the New England States and in the region as a whole.

I wish to thank the thousands of farm operators across the region who participated in the surveys we conducted throughout the year. We understand the time commitment needed to complete these questionnaires and fully appreciate your effort. We strive to assure all your individual reports and business data are held in the strictest confidence. You **are** the heart and soul of our program, for without your cooperation, the rest of the story could not be accurately written.

Sincerely,

Where can I get more statistics or economic analysis?

National Agricultural Statistics Service (NASS) publications include weekly, monthly, quarterly, and annual estimates of production, stocks, inventories, disposition, utilization and prices of agricultural commodities, and other items. The Census of Agriculture is published every five years covering all commodities by state, county, and zip code. Other census reports include the Agricultural Atlas; Congressional District Tabulations; Farm and Ranch Irrigation; Aquaculture; Horticulture Specialties; Watershed; On-Farm Energy Production; Organic Production; Tenure, Ownership, and Transition of Agricultural Land; Local Food Marketing Practices; and Specialty Crops.

Economic Research Service (ERS) Situation and Outlook Reports and periodicals analyze the current situation and forecast market conditions. ERS monographs offer economic analysis in the area of trade, production, rural development, farm inputs, and other topics.

The World Agricultural Outlook Board (WAOB) issues regular forecasts of United States and world supply and demand prospects for major agricultural commodities.
