USDA to forecast cranberry production

HARRISBURG, PA – The U.S. Department of Agriculture’s National Agricultural Statistics Service (NASS) will conduct a forecast survey for 2022 cranberry production during August 2022. This survey can be completed by mail, phone, or online at agcounts.usda.gov.

“The information from this survey directly impacts our regions’ growers by providing a forecast of production throughout the country,” said King Whetstone, director of the NASS Northeastern Regional Field Office. “States with cranberry growers participating in this survey include Massachusetts, New Jersey, Oregon, and Wisconsin.”

In these surveys, NASS asks participants to answer a variety of questions about cranberries. For their convenience, survey participants have the option to respond online. NASS safeguards the privacy of all respondents and publishes only aggregate data, ensuring that no individual operation or producer can be identified, as required by federal law.

NASS will compile, analyze, and publish survey results in the August 12, 2022, *Crop Production* report. All previous publications are available online at <https://www.nass.usda.gov/Publications/index.php>. For more information on NASS surveys and reports, call the NASS Northeastern Regional Field Office at (800) 498-1518.

###

NASS is the federal statistical agency responsible for producing official data about U.S. agriculture and is committed to providing timely, accurate and useful statistics in service to U.S. agriculture

USDA is an equal opportunity provider, employer, and lender.
