# TABLE OF CONTENTS

## INTRODUCTION/ACKNOWLEDGMENT

New Mexico Agricultural Statistics Service  
National Association of State Departments of Agriculture

## GENERAL

Release Dates for Statistical Publications .....	3
Number of Farms and Land in Farms .....	4
Usual Planting and Harvesting Dates .....	5
Climate .....	6
Fertilizer Shipped Into New Mexico .....	7
Commercial Feed Sold in New Mexico .....	8

## PRICES AND INCOME

Farm Sector Economic Analysis .....	9
Balance Sheet of Farm Sector .....	11
Income From Farming .....	12
Cash Receipts by Commodity .....	13
Cash Receipts by Commodity and by County .....	15
Government Payments .....	24
Prices Received for Hay .....	26
Prices Received for Cattle .....	27

## LIVESTOCK

Livestock Summary .....	28
Cattle and Calves .....	29
Number and Value .....	29
Number by Class .....	30
Commercial Slaughter .....	30
Inventory, Supply, and Disposition .....	31
Production, Price, and Income .....	31
Number by County .....	32
Number on Feed by County .....	33
Range and Pasture Feed Condition .....	33
Milk Production	
Milk Production and Income .....	34
Prices Received for Milk .....	34
Milk Production by County .....	35
Monthly Milk Production .....	35
Sheep and Lambs	
Number and Value .....	36
Commercial Slaughter .....	36
Number by Class .....	37
Wool Production and Value .....	37
Prices Received for Wool .....	37
Inventory, Supply, and Disposition .....	38
Production, Price, and Income .....	38
Number by County .....	39
Hogs and Pigs	
Inventory, Supply, and Disposition .....	40
Production, Price, and Income .....	40
Goats	
Inventory .....	41
Mohair Production, Price, and Value .....	41

## FIELD CROPS

Crop Summary .....	42
Acreage and Value of Principal Field Crops .....	43
Wheat .....	44
Wheat by County .....	45
All Hay .....	46
All Hay by County .....	46
Alfalfa and Other Hay .....	47
Alfalfa Hay by County .....	47
Sorghum .....	48
Sorghum by County .....	49
Corn .....	50
Corn Silage by County .....	50
Corn by County .....	51
Upland Cotton .....	52
Upland Cotton by County .....	52
Cottonseed .....	53
American-Pima Cotton .....	54
American-Pima Cotton by County .....	54
Potatoes .....	55
Dry Beans .....	55
Peanuts .....	56
Peanuts by County .....	56

## FRUITS, NUTS, AND VEGETABLES

Apples .....	57
Chile	
Acreage and Production by County .....	58
Acreage, Yield, and Production by County .....	59
Onions	
Monthly Prices Received .....	60
Acreage, Yield, Production, and Value .....	61
Onions by County .....	61
Pecans .....	62
Pecans by County .....	62
Miscellaneous Crops and Livestock .....	63

# *FARM SECTOR ECONOMIC ANALYSIS*

## *FARM INCOME CONCEPTS*

Cash receipts from farm marketings represent gross income from the sales of crops, livestock, and poultry during the calendar year. The value of home consumption of farm products, inter-farm sales of livestock, and crops fed on farms where grown are not included in cash receipts. Cash receipts from marketings of crops are the final product of several estimates: acreage, yields, percentage of total production sold, average price, and changes in inventories. Marketings of livestock and poultry include the sale value of an animal only once, usually at the time when the animal is sold for slaughter or at final disposition.

Final agricultural sector output includes cash receipts as well as the value of home consumption, crop and livestock inventory adjustments, and other farm-related income. Net value added is the sector's contribution to the national economy and is the sum of the income earned by all factors of production, including direct government payments, minus all production expenses and capital consumption. Government payments to farmers are those payments made directly to farm producers in connection with farm programs. Examples of intermediate consumption outlays include purchase and repair of farm equipment and vehicles; purchases of fuel, seed, feed, and livestock; as well as utilities, marketing, transportation, and storage expenses.

Net farm income is the operator's share of income from the agricultural sector's production activities after deductions for wages paid to hired workers, rent received by non-operator landlords, and real estate and non-real estate interest.

## *ASSETS & DEBTS*

New Mexico's farm and ranch assets continued to increase with \$12.1 billion in assets in 2003, up 1.5 percent from 2002. Real estate, which is the largest farm and ranch asset, was valued at \$9.6 billion, up 1.7 percent from a year earlier. Livestock and poultry values dropped slightly, just under \$1.3 billion. Machinery and motor vehicles increased to \$515.5 million. Crop assets dropped to \$78.5 million, while financial assets were up at \$649.0 million. Farm and ranch debt continued to increase, with \$1.61 billion in 2003, compared to \$1.57 billion in 2002. Real estate debt accounts for 56 percent of the total 2003 debt. Both the debt-to-equity and debt-to-assets ratios increased during 2003 to 15.3 and 13.3 respectively.

---

## *INCOME*

The total value of the agriculture sector output from New Mexico farmers and ranchers increased in 2004 to \$2.7 billion, up 20 percent from 2003. The rise in value in 2004 can be largely attributed to the livestock industry, whose value of production increased to almost \$2.0 billion, up 27 percent. Total crop output increased 7.3 percent to \$582.3 million. Revenues from forestry and services totaled \$140.6 million in 2004, down 13 percent. Direct government payments were down 14 percent to \$80.6 million. After deductions for production expenses, hired labor, and other economic factors, the state's net farm income totaled \$862.4 million, up 65 percent from 2003.

***PRODUCTION EXPENSES***

New Mexico farmers and ranchers purchased \$1.5 billion of inputs in 2004 to produce their crops and livestock. This was 7.0 percent more than 2003 and 18 percent less than 2002. Livestock feed was the largest purchase at \$454.9 million, followed by livestock purchases of \$453.9 million. The repair and maintenance of capital items cost farmers and ranchers \$87.0 million, and petroleum fuel and oil cost them \$65.8 million. Property taxes increased 1.9 percent to \$23.5 million

---

***CASH RECEIPTS***

New Mexico crop and livestock product sales in 2004 totaled \$2.6 billion, a 19 percent increase over the \$2.1 billion in 2003. Total cash receipts from livestock products increased by 25 percent to \$2.0 billion. The biggest impact of the increase came from cattle and calves which had a 25 percent growth to \$949 million and milk with a 27 percent growth, topping the \$1 billion mark for the first time in New Mexico history. Milk was once again the number one cash commodity for the state followed by cattle and calves as the number two cash commodity. Total crop cash receipts increased by 2.3 percent to \$565 million. Despite the decline in hay sales of 13 percent to \$128 million, hay still remained the third ranking commodity in the state for 2004. Pecans, fourth in the state in total cash receipts, had a significant increase from 2003, coming in with \$89 million due to higher prices. Greenhouse and nursery receipts showed only a slight decrease from the previous year and are ranked fifth. Corn silage, with \$50 million in cash receipts, was ranked sixth. Chile's cash receipts at \$46 million moved to a seventh ranking, up a notch from last year.

Direct government payments to New Mexico producers totaled \$78.9 million in 2004, down 15 percent from 2003 payments of \$92.5 million. If ranked with cash receipts, government payments would be our fifth largest cash commodity. Conservation program payments increased by 6.9 percent to \$27.9 million. The implementation of new programs authorized by the Farm Security and Rural Investment Act of 2002 (the Farm Bill) caused a shift in payments from the 1996 Farm Bill's Production Flexibility program to the current Fixed Direct and Counter Cyclical Contract programs. Ad hoc and emergency programs totaled \$19.7 million in 2004, down 28 percent from 2003. Production Flexibility payments were \$5,000 in 2004. Fixed direct payments decreased by \$3.5 million to \$17.4 million in 2004. Counter-cyclical payments decreased to \$6.0 million, down from the \$12.1 million a year earlier. Milk Income Loss Payments were down 4.5 percent to \$2.8 million and the Peanut Quota Buyout program payments dropped 68 percent to \$353,000.

---

***PRICES***

Ranchers in 2004 received higher prices than were recorded in 2003. Prices for beef cattle averaged \$82.00 per hundredweight (cwt), an increase of \$12.50 over the price in 2003. Calf prices showed the largest increase, \$18.00 per cwt, to \$119.00. Cow prices, at \$51.50 per cwt, increased by \$8.20. Steer and heifer prices averaged \$104.00 per cwt compared to \$88.20 in 2003. Milk prices continued to see increases bringing in an average of \$15.10 per cwt compared to \$12.00 the previous year. Alfalfa prices for the year averaged \$123.00 per ton compared to \$144.00 per ton in 2003. All hay also had a decrease averaging \$120.00 per ton compared to \$142.00 the previous year. Other hay prices averaged \$102.00 per ton in 2004 and \$118.00 per ton in 2003. Prices for corn for grain, wheat, sorghum grain, upland cotton, American-Pima cotton and chile all decreased in 2004. Prices for dry beans, potatoes and peanuts had increases in 2004. Pecan prices also increased significantly due to crop losses in the southeastern part of the nation.

<sup>1/</sup> Value of agricultural sector production is the gross value of the commodities and services produced within a year. Net value-added is the sector's contribution to the national economy and is the sum of the income from production earned by all factors-of-production. Net farm income is the farm operators' share of income from the sector's production activities. The concepts presented are consistent with those employed by the Organization for Economic Cooperation and Development (OECD).

# LIVESTOCK

---

## *CATTLE AND CALVES*

New Mexico's inventory of all cattle and calves as of January 1, 2005, was 1,500,000 head, a slight decrease from 2004. Milk cow inventory dropped from 325,000 head to 318,000 head. Dairy producers kept 100,000 heifers for replacement, 33 percent more than the previous year. Beef cow inventory increased by 3.7 percent to 472,000 head in 2005. Ranchers held on to 90,000 heifers for beef cow replacement, up 5.9 percent from 2004. The number of steers weighing 500 pounds and over dropped 21 percent to 150,000 head. Bull inventory remained unchanged at 45,000 head. Calves on hand less than 500 pounds, including both beef and dairy calves, totaled 240,000 head. The 2004 calf crop was estimated at 600,000 head, up 1.7 percent from 2003. Cattle and calves on full feed for the slaughter market on January 1, 2005, increased to 126,000 head compared to 115,000 head the previous year. Gross income from cattle and calves totaled \$952 million in 2004, up 25 percent.

---

## *RANGE AND PASTURE FEED*

Beginning in mid-March weekly measurements of range and pasture conditions were taken with ratings of 44 percent very poor, 37 percent poor, 18 percent fair, and 1 percent good. This continues a downward trend from the previous two years and was considerably worse than last year which was 24 percent very poor, 27 percent poor, 38 percent fair, and 11 percent good. April reports indicated ranchers had enough moisture throughout the month to improve range and pasture conditions slightly. May showed business as usual with ranchers feeding, watering, and branding. Pasture conditions in June declined to 15 percent very poor, 47 percent poor, 28 percent fair, and 10 percent good. The decline was mainly due to temperatures hitting 100 degrees in early June. Ranchers received moisture in July, benefitting most crops, livestock, and range conditions. August and September showed an improvement in conditions as temperatures dropped

and rains increased throughout the state. In October ranchers began weaning calves and moving cattle from summer pastures. Throughout the rest of the year, conditions continued to improve due to winter rains and cooler temperatures with the final report in the last week of November indicating 7 percent very poor, 23 percent poor, 38 percent fair, 31 percent good, and 1 percent excellent.

---

## *DAIRY*

The state dairy industry again began on a high note with the average number of milk cows in January totaling 325,000 head. The number of milk cows during the year averaged 326,000. Milk production continued to climb setting an all time high of 6.7 billion pounds. Cash receipts from marketings and gross producer income, both with growths of 27 percent, surpassed the \$1 billion mark for the first time. New Mexico continues to be ranked seventh in the nation in milk production and number of milk cows. Milk was ranked the state's number one cash commodity for the third year in a row.

---

## *SHEEP AND LAMBS*

Sheep and lamb inventory as of January 1, 2005, totaled 145,000 head, down 9 percent from a year earlier. The number of breeding sheep for 2004 decreased by 13,000 head to 120,000 head. Market sheep and lambs also dropped to 25,000 head. The 2004 lamb crop, at 85,000 head, was 14 percent below the previous year. Producer gross income decreased 1.8 percent to \$7.6 million. Wool was sheared from 140,000 sheep and lambs, producing 1.02 million pounds. Value of wool produced declined 25 percent to just over \$1.0 million as the average price of wool dropped \$0.10 to \$1.00 per pound.

# ***FIELD CROPS***

---

## ***HAY***

All harvested hay totaled 330,000 acres in 2004, up 30,000 acres from 2003. Yield for all hay totaled 4.14 tons an acre for a total production of 1.4 million tons. The average price for all hay was \$120 per ton. Harvested alfalfa acreage totaled 240,000, an increase of 10,000 acres from the previous year. Yield remained unchanged at 4.9 tons an acre for a total production of 1.18 million tons. The price of alfalfa hay averaged \$140 per ton.

---

## ***SORGHUM***

New Mexico's sorghum acreage harvested for grain increased to 92,000 acres compared to 62,000 harvested in 2003. Yields averaged 46 bushels per acre for a total production of 4.2 million bushels compared to the 1.7 million bushels produced a year earlier. The average price dropped to \$1.96 per bushel. Total value of production was \$8.3 million, a large increase from the \$4.2 million in 2003. A state record of 35,000 acres were harvested for silage with an average yield of 17 tons per acre, which produced a record 595,000 tons.

---

## ***CORN***

Corn for grain production increased to 10.4 million bushels in 2004. Yield remained at 180 bushels an acre, but harvested acres increased 10,000 acres to 58,000. The 2004 price per bushel averaged \$2.35 for a total value of production of \$24.5 million. Acres harvested for silage were down in 2004, mostly due to the lack of water which influenced growers to grow more sorghum silage. Silage acreage totaled 66,000 acres compared to 80,000 acres in 2003. Yield improved to 25 tons per acre for a total production of 1.7 million tons.

## ***WHEAT***

Winter wheat production in the state for 2004 climbed to 7.8 million bushels. Harvested acreage was 300,000 compared to 140,000 acres in 2003. The average yield was 26 bushels per acre, a decrease of 4 bushels per acre from the previous year. The value of production was \$24.6 million with an average price of \$3.15 per bushel.

---

## ***PEANUTS***

Peanut harvested acreage was unchanged from the previous year at 17,000 acres. Hot temperatures with little precipitation made for great growing conditions to allow a record yield of 3,500 pounds per acre. Production was 59.5 million pounds, 13.6 million pounds above the harvest in 2003. Crop value also increased from \$10.6 million in 2003 to \$14.3 million in 2004 with the average price slightly higher at \$0.19 per pound.

---

## ***COTTON***

Upland cotton producers harvested 64,000 acres in 2004, an increase of 68 percent from the previous year and the highest since 2001. Yields were only slightly lower than the previous year averaging 848 pounds per acre. Total production for the year was estimated at 113,000 bales. Price per pound came in at \$0.55 per pound with total value of production at \$30 million, the highest since 1990. American-Pima harvested acreage was the highest since 1997 with 11,000 acres planted and harvested. Yields for the year averaged 869 pounds per acre with total production at 19,000 bales. The value of production was placed at \$7.3 million with prices averaging \$0.80 per pound.

<sup>1/</sup> Production in cwt., season average price in dollars per cwt.

<sup>2/</sup> Production in 480 pound net weight bales.

<sup>3/</sup> 2004 value of production is preliminary.

<sup>4/</sup> Production includes both wet and dry tonnage combined.

<sup>5/</sup> Value of production may not equal production times season average price.

# CHILE

**CHILE:** New Mexico chile production bounced back from the previous year to 106,850 tons, 25 percent above 2003. The increase stems from an increase in harvested acreage, estimated at 15,400 acres, and higher yields.

Overall state yields were much higher than the previous year with green long mild averaging 14.5 tons per acre, green long hot averaged 8.7 tons per acre, and cayenne averaged 9.9 tons per acre.

The value of New Mexico chile was estimated at \$50.33 million, 23 percent above the previous year.

### Green Chile Production, 2004

### Red Chile Production, 2004

<sup>1/</sup> An 8:1 drying ratio was used to convert cayenne production to a dry weight.

**ONIONS:** New Mexico onion growers produced 3.7 million hundredweight in 2004, down almost 15 percent from 2003. Harvested acres decreased by 600 acres, and the average yield decreased from 550 to 515 hundredweight per acre. The value of the 2004 crop decreased by 27 percent to \$44.6 million with prices averaging \$12.20 per hundredweight.

The major varieties of commercially grown New Mexico onions include Grano, Granex, Sweet Spanish, and mid-summer hybrids such as the popular Nu-Mex variety. Most of the state's onions are non-storage types. During our peak summer harvest period, New Mexico is a major supplier for the nation. Harvest usually begins mid-May and continues through September.

## Pecans: Production, Price, and Value

Crop Year	Production (in shell)	Price Per Pound	Value of Production
	1,000 <u>Pounds</u>	<u>Dollars</u>	1,000 <u>Dollars</u>
1980	14,500	.85	12,325
1985	29,000	.88	25,520
1990	34,000	1.53	52,020
1995	45,000	1.24	55,800
2000	35,000	1.37	47,950
2001	60,000	.64	38,400
2002	36,000	1.25	45,000
2003	55,000	1.28	70,400
2004	39,000	2.28	88,920

**PECANS:** Pecan production in New Mexico totaled 39 million pounds in 2004, a low bearing year in the alternating cycle of our trees. This was 29 percent lower than 2003's 55 million pounds, but 8 percent higher than 2002's 36 million pounds. Price per pound increased \$1.00 to \$2.28, the highest price in the country. The low supply, with 2004 being an off year and the weather damage in Georgia, plus the high quality of this year's crop contributed to the high prices. Value of production totaled \$88.9 million compared to \$70.4 million the year before and \$45 million in 2002.

***Introducing New Mexico Department of Agriculture***

<http://www.nmda.nmsu.edu>

***--Ag's Partner***

**OFFICE OF THE DIRECTOR/SECRETARY (I. Miley Gonzalez, Ricardo Rel, and Tom J. Bagwell)**  
505-646-3702

Establishes policy for the daily operation of the department; provides liaison between agricultural producers and state and federal government; and serves on national committees on behalf of agriculture.

**AGRICULTURAL AND ENVIRONMENTAL SERVICES (Larry Dominguez) 505-646-3208**

Oversees the Bureau of Pesticide Management, which administers pesticide-use laws, certification, and licensing of all pesticide applicators; the Bureau of Entomology and Nursery Industries, which is designed to handle agricultural and biological work, in-store inspection of nursery plants, and entomology programs; the Bureau of Feed, Seed, and Fertilizer, which administers the commercial feed, seed, and fertilizer laws; the Dairy Bureau, which ensures milk quality; and supervises the chemistry, seed, and entomology laboratories.

**State Chemist Laboratory 505-646-3318**

Provides analyses of official samples of feed, fertilizer, and pesticide products; and on a fee basis for the public and other agencies.

**Seed Laboratory 505-646-3407**

Provides official seed testing to determine germination, quality, and weed content and seed testing for the public and other agencies on a fee basis.

**AGRICULTURAL PROGRAMS AND RESOURCES (Julie Maitland) 505-646-2642**

Supervises the cooperative predatory wild animal and rodent pest program; supervises farm and range improvement fund activities; coordinates a soil and water conservation program; and coordinates a noxious weed control program.

**MARKETING AND DEVELOPMENT (Edward Avalos) 505-646-4929**

Responsible for state, national, and international market expansion and development for New Mexico products; livestock and processed foods; commodity promotions; specialty crop development; produce quality inspection; market news; agricultural statistics; and licensing of produce brokers and packers.

**STANDARDS AND CONSUMER SERVICES (Joe Gomez) 505-646-1616**

Oversees the Consumer Services Bureau, which provides inspection of weighing and measuring devices, packaged commodities, eggs, dairy products, and weighmaster licensing; the Petroleum Standard Bureau, which provides inspection of petroleum measuring devices and quality of petroleum products; and supervises the metrology and petroleum standards laboratories.

**Metrology Laboratory 505-646-1616**

Maintains custody of official state standards for mass, volume, and length; provides calibration of weights and measures used in department regulatory activities; and calibration services on a fee basis for industry.

**Petroleum Standards Laboratory 505-646-1616**

Provides analyses of official samples in the enforcement of petroleum product quality standards and specifications and sample analyses on a fee basis for industry and other agencies.

**VETERINARY DIAGNOSTIC SERVICES (Flint Taylor) 505-841-2576**

Provides diagnostic analyses of animal specimens on a referral basis for the public and other agencies.
