NEW MEXICO AGRICULTURAL STATISTICS

NEW MEXICO DEPARTMENT OF AGRICULTURE

OFFICE OF THE DIRECTOR
Box 3189/Las Cruces, New Mexico 88003
Telephone (505) 646-3007

AN OPEN LETTER FROM THE DIRECTOR:

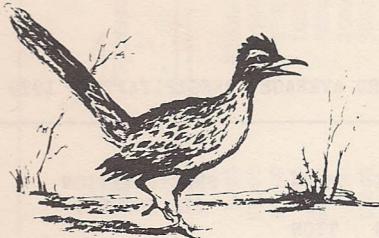

Agriculture is a high risk business with fluctuations in demand, supply, and price, as well as unpredictable weather. Each year presents a different picture. In 1980 we must cope with a tough economic situation.

Agricultural producers are faced with a multitude of decisions, a few of which are how much to plant, number of livestock replacements to buy and credit needs for the year.

The information supplied in this publication can be a valuable resource in the decision-making process.

This publication is a cooperative effort of the New Mexico Department of Agriculture and the Economics, Statistics and Cooperatives Service of the United States Department of Agriculture.

W.P. Stephens
William P. Stephens
Director

NEW MEXICO

CROP AND LIVESTOCK REPORTING SERVICE

ECONOMICS, STATISTICS & COOPERATIVES SERVICES • NEW MEXICO DEPARTMENT OF AGRICULTURE

American agriculture has progressed dramatically over the past 100 years. Today's agriculture requires a high degree of mechanical technology and management expertise to operate efficiently. Accurate agricultural statistics provide valuable information when making management decisions.

Data supplied by New Mexico farmers, ranchers, and agribusiness is voluntary and the Department is grateful for their contribution. Without their response to numerous survey questionnaires, this publication could not contain such comprehensive and valuable data.

This publication is made possible through the combined efforts of the New Mexico Department of Agriculture and the Economics, Statistics, and Cooperatives Service of the United States Department of Agriculture.

Eugene J. Berger

Eugene J. Berger

Agricultural Statistician in Charge

1/ Includes farms and ranches having one or more head of species; ranch or farm estimates by specie are unofficial and should be used only as a guide.

2/ NEW DEFINITION beginning in 1975: Farms and ranches with annual sales of \$1,000 or more.

3/ Preliminary.

ANNUAL CROP SUMMARY - 1979

Cash receipts from farm marketings of crops in New Mexico totaled 249.8 million dollars in 1979, up 17 percent from a year earlier. Farms and ranches in the State were estimated at 11,200 and accounted for 46.7 million acres.

Upland Cotton: Acres planted in 1979 were 154,000, 17,000 acres more than last year. Harvested acres totaled 126,000, up 17,000 acres from 1978. Production was up only 3 percent from 1978 for a total of 104,000 bales. Average yield per acre was 396 pounds, 47 pounds less than last year. Acreage abandoned and low yields may be attributed to a short season plus unfavorable weather conditions.

American-Pima Cotton: Total production of 7,500 bales was 42 percent less than last year. Acres harvested in 1979 totaled 14,800 for an increase of 8 percent over 1978. Per acre yield was 246 pounds average, 208 pounds per acre less than 1978.

Sorghum Grain: Total production increased 9 percent in 1979 to 13,416,000 bushels. Harvested acres were down 3 percent for a total of 258,000 acres. Average yield increased from 46 to 52 bushels per acre (irrigated and dryland combined).

Corn for Grain: The average yield per acre increased from 106 to 109 bushels per acre for a total production of 8,066,000 bushels in 1979. Production increased by 434,000 bushels over the 1978 crop.

Winter Wheat: Production of 8,756,000 bushels was up 59 percent from last year's crop. The average yield of 22 bushels per acre is up 4 bushels from 1978. Acres harvested were up 30 percent to 398,000.

Barley: A 141,000 bushel increase boosted total production to 1,566,000 bushels. Yield per acre increased to 58 bushels, a 1 bushel increase from 1978. Total acres harvested were up by 2,000 to 27,000 acres.

All Hay: Production increased to 1,158,000 tons in 1979 for an average yield of 3.7 tons per acre. Alfalfa hay accounted for 236,000 acres and 1,062,000 tons of the total production. Total acres of all hay harvested in 1979 came to 310,000.

Peanuts: There were 9,200 acres of peanuts harvested in 1979. Production totaled 25,300,000 pounds, an increase of 5 percent from 1978. Average yield increased from 2,560 to 2,750 pounds per acre.

Irish Potatoes: Total production increased from 779,000 cwt. in 1978, to 1,210,000 cwt. in 1979. Harvested acres increased by 600 to 4,400. The average yields over the State increased from 205 to 275 cwt. per acre.

Pecans: Production for 1979 declined 2 percent from 1978. 1979 production totaled 14,700,000 pounds.

Apples: The annual production for 1979 was estimated at 14,000,000 pounds, down 18 percent from last year.

Vegetables: Spring lettuce production declined 57 percent to 150,000 cwt. in 1979. Acres harvested went from 1,300 to 1,000 and yields dropped from 270 to 150 cwt. per acre. Fall lettuce yields increased from 190 to 200 cwt. per acre and acres harvested dropped from 3,700 to 3,200. Total onion production dropped 224,000 cwt. to 960,000 cwt. for the State total. Acres harvested declined to 3,200, a 500 acre decrease. Average yield per acre fell from 320 to 300 cwt. Chile production continued on the upswing with a 900 ton increase in 1979 to 18,100 tons. Harvested acres climbed from 11,200 in 1978 to 15,100 in 1979. Chile tonnage includes green chile converted to a dry basis using a 5:1 ratio.

NEW MEXICO AGRICULTURAL STATISTICS

ANNUAL LIVESTOCK SUMMARY - 1979

42

The cattle herd reduction cycle reached its final stage during 1979. This applies to both New Mexico and the Nation, and came about after four consecutive years of inventory declines. The increase recorded in total numbers at the national level, however, was very limited. Cow numbers, curiously enough, continued to decline. Throughout 1979, New Mexico enjoyed one of the best years in recent history, as far as rainfall and general weather conditions were concerned. Range and pasture condition stayed good to excellent from June through October. Furthermore, pasture and range condition was highest (percentage wise), for all 12 months, since 1973.

Cash receipts for livestock and livestock products were estimated at 841,600,000 dollars, which is a record high. Higher values than in previous years for all commodities involved were the major factor affecting this increase. Cattle and calves totaled 1,600,000 head as of January 1, 1980. This was a 7 percent increase from the preceding year. Beef cows were estimated at 630,000 head. This was 5 percent above the comparable figure a year ago, which in turn is the lowest estimate on record. Milk cows increased for the second year in a row and were estimated at 35,000, highest since 1968. Bulls (500 pounds plus) were estimated at 46,000, highest on record and the same as in 1975. Heifers for beef cow replacement (500 pounds plus) were estimated at 114,000, 52 percent above last year's and highest since 1975. Heifers for milk cow replacement (500 pounds plus) were estimated at 8,000, same as the year before. Other heifers (500 pounds plus) were estimated at 105,000, same as two years ago and highest on record. Steers (500 pounds plus) were estimated at 224,000, 22 percent above a year ago and highest since 1975. Steer, heifer, and bull calves (under 500 pounds) were estimated at 438,000, 9 percent below previous year's and second lowest since 1974. Calf crop was estimated at 580,000, 4 percent above previous year's and highest since 1976.

Cattle and calves being fed for slaughter market were estimated at 239,000 as of January 1, 1980, highest on record since estimates began in 1960. Marketings out of feedlots totaled 343,000 during 1979, highest since 1974. Placements were estimated at 433,000 for the year, a record high. Other disappearance (including death loss, shipments to other feedlots, and returned to pasture) totaled 53,000 in 1979, another record high.

Sheep and lambs were estimated at 660,000 as of January 1, 1980, highest since 1974 and 9 percent above previous year's. Of these, 65,000 were estimated as being fed for slaughter market, highest since 1967. Wool production was estimated at 4,978,000 pounds in 1979, which is 2 percent below previous year's. The number shorn was estimated at 545,000, 2 percent higher than in 1978. Average fleece weight, however, declined to 9.1 pounds from 9.6 pounds in 1978. The average price per pound of wool was estimated at 92 cents, a record high. Total value of wool production was estimated at 4,580,000 dollars.

Hogs and pigs were estimated at 87,000, as of December 1, 1979. This is the highest estimate as of that date. Value per head declined ten dollars to \$56.50 from a year ago. Total inventory value was estimated at 4,900,000 dollars, a record high.

Chickens were estimated at 2,190,000, a new record high. Of these, 1,619,000 were hens and pullets of laying age, also a new record high, and 569,000 were pullets not of laying age. Egg production totaled 368,000,000 eggs of which 367,000,000 were sold at an average price of 61 cents per dozen for a total of 18,700,000 dollars in cash receipts. Both egg production and cash receipts are the highest estimates on record.

Commercial red meat production from slaughter plants in New Mexico - including federally and state inspected, and custom exempt plants - totaled 317,900,000 pounds (dressed weight) in 1979. This is 1 percent below the comparable figure in 1978. The number of animals slaughtered during 1979 and 1978 were, in that order: Cattle - 506,800 and 539,400; hogs - 35,700 and 29,200; sheep - 79,900 and 82,500.

Milk production was estimated at 506,000,000 pounds in 1979, a new record high. Average production per cow at 14,457 pounds is also a new record high. Average number of milk cows increased to 35,000 during 1979. The value of milk produced was estimated at 67,200,000 dollars in 1979, compared to 54,400,000 dollars in 1978.
