## UNITED STATES

### November Prices Received Index Up 4.5 Percent

The November Prices Received Index 2011 Base (Agricultural Production), at 133.4, increased 4.5 percent from October and 23 percent from November 2021. At 127.1, the Crop Production Index was up 4.3 percent from last month and 19 percent from the previous year. The Livestock Production Index, at 143.4, increased 3.2 percent from October and 30 percent from November last year. Producers received higher prices during November for lettuce, soybeans, market eggs, and cattle but lower prices for hogs, hay, milk, and cotton. In addition to prices, the volume change of commodities marketed also influences the indexes. In November, there was increased monthly movement for corn, milk, cattle, and cotton and decreased marketing of soybeans, grapes, lettuce, and wheat.

### November Prices Paid Index Unchanged

The November Prices Paid Index for Commodities and Services, Interest, Taxes, and Farm Wage Rates (PPITW), at 137.1, is unchanged from October 2022 but up 11 percent from November 2021. Higher prices for feeder cattle, feeder pigs, concentrates, and nitrogen offset lower prices for other services, hay & forages, complete feeds, and other machinery.
