## USDA TO GATHER DATA ABOUT ON-FARM LABOR

**LAKEWOOD, Colo. – March 1, 2024** – The U.S. Department of Agriculture’s (USDA) National Agricultural Statistics Service (NASS) will conduct its biannual Agricultural Labor Survey during the second half of April. The survey will collect information about hired labor from more than 3,500 farmers and ranchers in the Mountain Region states of Arizona, Colorado, Montana, New Mexico, Utah, and Wyoming.

“The beginning of the year is the time when agricultural producers plan out the rest of their growing season and it is a great time to assess on-farm labor needs,” said Rodger Ott, Director, Mountain Regional Field Office. “The data that farm operators provide through NASS’s Agricultural Labor Survey allows federal policymakers to base farm labor policies on accurate information.”

USDA and the U.S. Department of Labor use statistics gathered in the Agricultural Labor Survey to establish minimum wages for agricultural workers, administer farm labor recruitment and placement service programs, and assist legislators in determining labor policies.

In the survey, NASS asks participants to answer a variety of questions about hired farm labor on their operations, including total number of hired farm workers, total hours worked, base wage rate, and total gross wages paid for the weeks of January 7-13 and April 7-13. For their convenience, survey participants have the option to respond online or by mail. If we do not receive a response by April 19<sup>th</sup>, we may contact you for an interview.

“By asking about two separate time periods each time we collect data during the year, we are able to publish quarterly data and capture seasonal variation,” said Ott. “This approach reduces the number of times we survey farm businesses while ensuring that accurate and timely data are available.”

As with all NASS surveys, the results of this survey will be available in aggregate form only, ensuring that no individual operation or producer can be identified. NASS will compile, analyze, and publish survey results in the May 22 *Farm Labor* report. These and all NASS reports are available online at <http://www.nass.usda.gov/Publications/>. For state specific questions, please contact your USDA NASS State Statistician at 1-800-392-3202.
