Southern Region Crop Progress and Condition Report

Cooperators: USDA, Farm Service Agency | Alabama Department of Agriculture and Industries | Alabama Cooperative Extension
Florida Department of Agriculture and Consumer Services | UF/IFAS Extension Service | Georgia Department of Agriculture
UGA Cooperative Extension Service | South Carolina Department of Agriculture | Clemson Cooperative Extension Service

Southern Regional Field Office · 355 East Hancock Avenue, Suite 100 · Athens, GA 30601
(706) 713-5400 · www.nass.usda.gov

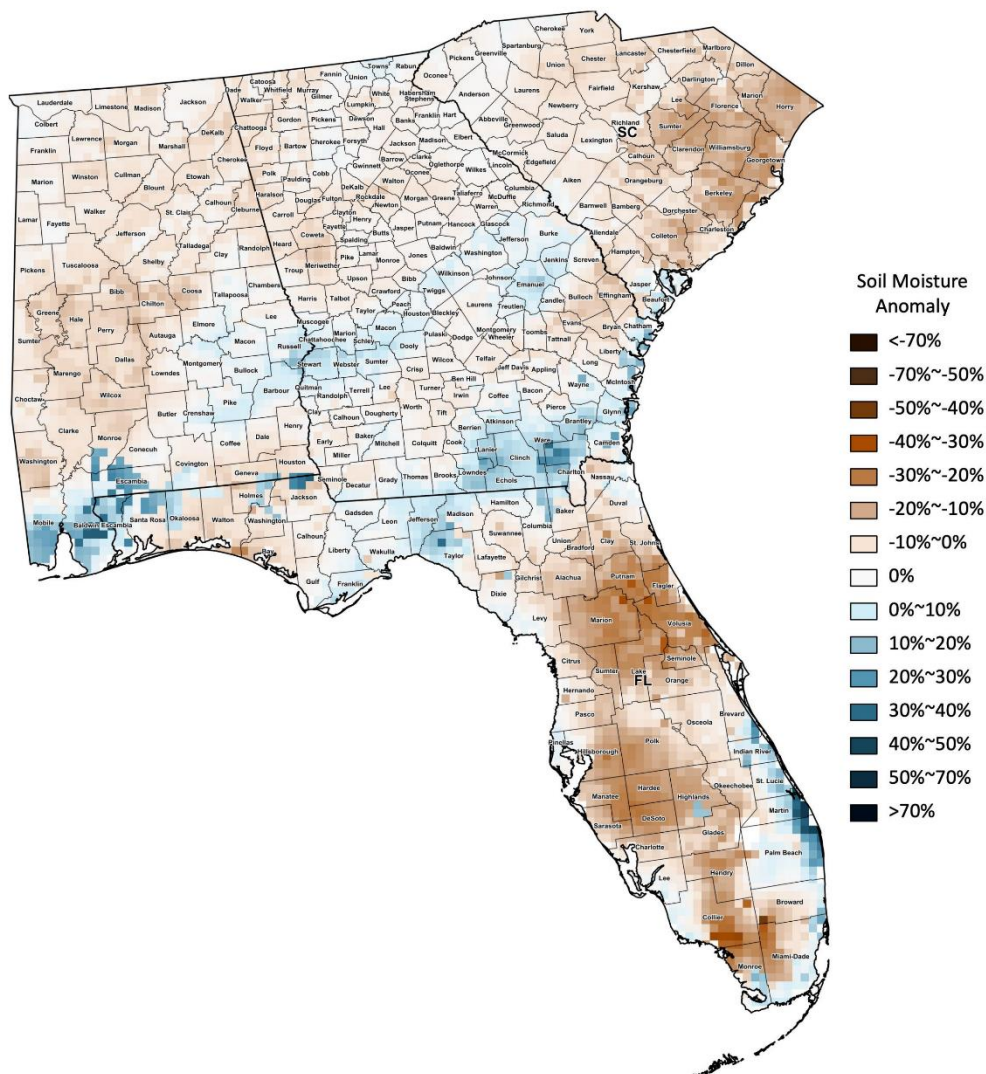

This report contains data collected each week from respondents across the state whose occupations provide them opportunities to discuss agricultural production with farmers in their counties as well as to make visual observations. We thank all who have contributed to this report.

Southeastern Regional Topsoil Moisture Map for April 10, 2025

The Soil Moisture Active Passive (SMAP) soil moisture anomaly (SMA) map measures the deviation of the soil moisture value from the historical average soil moisture value for the day or the week in percentile. It provides measurements of soil moisture in the topsoil represented by pixels. Each pixel represents 9 by 9 kilometer plot or about 20,000 acres. More information and additional mapping is available on Crop-CASMA at <https://nassgeo.csiss.gmu.edu/Crop-CASMA/>.

Days Suitable for Fieldwork and Soil Moisture Supply for Week Ending 04/13/25

State	Days Suitable for Fieldwork	Topsoil Moisture Supply				Subsoil Moisture Supply			
		Very short	Short	Adequate	Surplus	Very short	Short	Adequate	Surplus
		(percent)	(percent)	(percent)	(percent)	(percent)	(percent)	(percent)	(percent)

Pasture and range	4	8	30	46	12	75	84
Winter wheat	0	0	18	72	10	87	87

(NA) Not available

¹ The formula for the condition index is $I = (110E + 90G + 60F + 25P + 5V)/100$ where I = crop condition index and E, G, F, P, V = percentage of crop rated excellent, good, fair, poor, very poor.

U.S. Drought Monitor Southeast

April 8, 2025
(Released Thursday, Apr. 10, 2025)
Valid 8 a.m. EDT

Intensity:

The Drought Monitor focuses on broad-scale conditions. Local conditions may vary. For more information on the Drought Monitor, go to <https://droughtmonitor.unl.edu/About.aspx>

Author:

David Simeral
Western Regional Climate Center
