

Wisconsin had 5.2 **days suitable for fieldwork** for the week ending November 27, 2022, according to the USDA’s National Agricultural Statistics Service. Above normal temperatures helped melt much of the state’s snow leaving some fields muddy and difficult to access. Fall tillage and corn harvest continued on fields that were dry enough or where the ground was still frozen.

**Topsoil moisture** condition rated 2 percent very short, 17 percent short, 76 percent adequate and 5 percent surplus. **Subsoil moisture** condition rated 3 percent very short, 19 percent short, 75 percent adequate and 3 percent surplus.

Harvest of **corn** for grain was 87 percent complete, 12 days behind last year. Moisture content of corn harvested for grain was 18 percent.

**Winter wheat** condition was rated 83 percent good to excellent statewide, unchanged from last week.

**Fall tillage** was 83 percent complete, 6 days behind last year.

**Crop Condition as of November 27, 2022**

| Item                | Very Poor | Poor      | Fair      | Good      | Excellent |

This is the final weekly *Wisconsin Crop Progress and Condition* of the season. The USDA’s National Agriculture Statistics Service would like to thank the many farmers and FSA, NRCS, Extension, and agribusiness personnel who provided the information for this report each week. The new season of *Wisconsin Crop Progress and Condition* is scheduled to begin April 3, 2023.
