Cooperating with Wisconsin Department of Agriculture, Trade and Consumer Protection

March 17, 2023 - For Immediate Release

Media Contact: Greg Bussler

Honey production from producers with five or more colonies in Wisconsin totaled 2.92 million pounds in 2022 according to the USDA, National Agricultural Statistics Service – *Honey* report. This was 48 percent higher than the 1.97 million pounds produced in 2021. The number of honey producing colonies in the state, at 53,000, was up 11,000 from 2021. This number does not include producers with fewer than five colonies or producers who did not harvest honey. Yield per colony in Wisconsin averaged 55 pounds, compared to 47 pounds per colony in 2021. Wisconsin ranked 11th nationally in honey production, up from 17th place in 2021. Colonies which produced honey in more than one state were counted in each state where the honey was produced. Therefore, at the United States level yield per colony may be understated, but total production would not be impacted.

On December 15, 2022, producer honey stocks in Wisconsin, excluding stocks under government loan programs, were 816,000 pounds, 9 percent higher than 2021. The state's 2022 honey crop was valued at \$8.86 million, up 45 percent from the previous year's \$6.10 million. The average price per pound for all marketing channels in Wisconsin was \$3.04, down 5 cents from 2021.

Honey - Selected States and United States: 2021 and 2022

¹ Honey producing colonies are the maximum number of colonies from which honey was taken during the year. It is possible to take honey from colonies which did not survive the year.
² Stocks held by producers.
³ Average price per pound based on expanded sales.
⁴ Value of production is equal to production multiplied by average price per pound.
⁵ Due to rounding, total colonies multiplied by total yield may not exactly equal production.
⁶ United States value of production will not equal summation of states.

UNITED STATES HONEY

United States honey production in 2022 totaled 125 million pounds, down 1 percent from 2021. There were 2.67 million colonies producing honey in 2022, down 1 percent from 2021. Yield per colony averaged 47.0 pounds, unchanged from 2021. Colonies which produced honey in more than one State were counted in each State where the honey was produced. Therefore, at the United States level yield per colony may be understated, but total production would not be impacted. Colonies were not included if honey was not harvested. Producer honey stocks were 23.3 million pounds on December 15, 2022, down 1 percent from a year earlier. Stocks held by producers exclude those held under the commodity loan program.

United States honey prices increased 12 percent during 2022 to \$2.96 per pound, compared to \$2.65 per pound in 2021. United States and State level prices reflect the portions of honey sold through cooperatives, private, and retail channels. Prices for each color class are derived by weighting the quantities sold for each marketing channel. Prices for the 2021 crop reflect honey sold in 2021 and 2022. Some 2021 crop honey was sold in 2022, which caused some revisions to the 2021 crop prices.

The average prices paid in 2022 for honey bee queens, packages, and nucs were \$22, \$98, and \$129, respectively. Pollination income for 2022 was \$241 million, down 11 percent from 2021. Other income from honey bees in 2022 was \$55.2 million, down 31 percent from 2021.
