CROP PROGRESS AND CONDITION MONTH OF FEBRUARY 2019

AGRICULTURAL SUMMARY: Wyoming experienced near normal temperatures for the month, according to the Mountain Regional Field Office of the National Agricultural Statistics Service, USDA. Moisture levels have improved for both topsoil and subsoil from last year. A reporter from North Central Wyoming reports that they are doing well pasture and water wise and the livestock look good. They also indicated that things are much dryer to the south of them. A reporter from South Central Wyoming stated that producers are filing reports of need to buy extra feed due to snow but the hay sources are low. Two reporters from Southeastern Wyoming noted that dry conditions and one reported concern for the winter wheat conditions. Another reporter from Southeastern Wyoming indicated that calving had started and for a few producers calving had started earlier than expected. Hay and roughage supplies for Wyoming were rated 6 percent very short, 11 percent short, 82 percent adequate, and 1 percent surplus. Stock water supplies across Wyoming were rated 1 percent very short, 12 percent short, 86 percent adequate, and 1 percent surplus.

Note: The next monthly report will be released on Monday, March 25, 2019. The first weekly report will be released on Monday, April 1, 2019.
