WYOMING WINTER WHEAT VARIETIES 2021 CROP

Wyoming winter wheat farmers planted an estimated 115,000 total acres in Wyoming during the fall of 2020 for harvest in 2021. SY Monument was the most popular variety planted, with 15.2 percent of the reported acreage, followed by Cowboy, at 8.4 percent, Warhorse, at 7.7 percent, Buckskin, at 7.2 percent, and SY Wolf, at 6.4 percent. Brawl CL Plus, Pronghorn, WB 4303, WB 4462, and WB 4595 each had one percent or more of the reported seeded acreage but are not published separately to avoid disclosure of individual operations and are included in the Others category. Other reported varieties included AP503 CL2, Byrd CL Plus, Crescent AX, Goodstreak, Snowmass, SY 517 CL2, and WB 4269 which are also included in the Others category to avoid disclosure of individual operations.

Data for this report was collected along with the 2020 December Agricultural Production Survey conducted by the USDA/NASS, Mountain Regional Field Office. The survey was sampled to only provide a percentage of acreage for each variety, not an expansion of the acreage by variety or a measure of the sampling error.

We would like to thank all of the Wyoming farmers and ranchers who provided data and the Wyoming Business Council for providing funding for this report. Please call (800) 892-1660 or (800) 392-3202 with questions or comments.

Winter Wheat: Reported Percent, Planted by Variety, Wyoming 2012-2021

Variety	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021
	Percent									
SY Monument	----	----	----	----	----	3.2	10.0	17.2	13.9	15.2
Cowboy	----	----	2.2	16.7	16.7	7.9	15.7	20.6	16.8	8.4
