WYOMING WINTER WHEAT VARIETIES 2022 CROP

Wyoming winter wheat farmers planted an estimated 100,000 total acres in Wyoming during the fall of 2021 for harvest in 2022. Cowboy was the most popular variety planted, with 15.3 percent of the reported acreage, followed by Warhorse, at 10.6 percent, SY Monument, at 6.8 percent, Crescent AX, at 6.2 percent, and SY Wolf, at 6.0 percent. AP18 AX, AP503 CL2, Breck, Buckskin, Denali, Infinity CL, Settler CL, SY Spur, WB 4418, WB 4483, and WB 4792 each had one percent or more of the reported seeded acreage but are not published separately to avoid disclosure of individual operations and are included in the Others category. Other reported varieties included Goodstreak, Ray, Robidoux, WB 4269, and WB 4595 which are also included in the Others category to avoid disclosure of individual operations.

Data for this report was collected along with the 2021 December Agricultural Production Survey conducted by the USDA/NASS, Mountain Regional Field Office. The survey was sampled to only provide a percentage of acreage for each variety, not an expansion of the acreage by variety or a measure of the sampling error.

We would like to thank all of the Wyoming farmers and ranchers who provided data and the Wyoming Business Council for providing funding for this report. Please call (800) 892-1660 or (800) 392-3202 with questions or comments.

Winter Wheat: Reported Percent, Planted by Variety, Wyoming 2013-2022

Variety	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022
