**Certified Organic Highlights**

The 2016 Certified Organic Survey is a survey of all operations identified as having certified organic production. Certified organic farms must meet the standards set out by USDA’s Agricultural Marketing Service’s (AMS) National Organic Program (NOP) and be certified compliant by an approved agent of NOP. Results from the survey provide acreage, production, and sales data for a variety of certified organic crops and certified organic livestock.

In 2016, the United States had 14,217 certified organic farms that produced \$7.6 billion in certified organic products. Arizona had 38 certified organic farms that produced \$117.8 million in certified organic products. Of the 33,183 acres of certified land in Arizona, 27,063 acres were cropland and 6,120 acres were pastureland/rangeland. The top two certified commodities sold in Arizona were spinach with sales valued at \$24.7 million and lettuce with sales valued at \$18.8 million.
