

## Mushroom Program April 2024

Every 5 years NASS conducts a program review following the completion of the Census of Agriculture. The primary purpose is to ensure that the NASS annual estimating program targets commodities and states most relevant based on the latest available information. Last fall we announced the program review and requested stakeholder input.

The primary source of information for the program review is the Census of Agriculture, since it is the most comprehensive source of data; however we also take into consideration estimates from the current annual estimating program and administrative data.

The program changes balance resources across all of the programs included in the annual estimating program, which represents over 400 individual reports.

### States included in the estimating program for mushrooms.

Total mushroom sales from the 2022 Census of Agriculture were arrayed from largest to smallest. States that account for the largest proportion of the total were identified for inclusion in the annual estimating program. This allows us to provide the most useful data to the agricultural sector in the most efficient means possible given the limited available resources.

| Annual Mushroom Program |                             |
|-------------------------|-----------------------------|
| Estimating States       | States Removed From Program |
| California              | Florida                     |
| Maryland                | Illinois                    |
| Oklahoma                |                             |
| Pennsylvania            |                             |
| Tennessee               |                             |
| Texas                   |                             |
